dipakgopaleetl@gmail.com

Professional Summary:

- Results-driven **ETL & BI Consultant / Data Analyst / Data Engineer** with over 12 years of experience in designing, developing, and implementing end-to-end data solutions, proven expertise in **SAS, Informatica, Azure Data Engineering** with hands-on experience in **data integration, automation, and analytics** across large enterprise environments.
- Strong background in **data extraction, transformation, and loading (ETL)** from diverse sources including SQL Server, Oracle, Excel, DB2 and flat files.
- Extensive experience in **ETL Data** transformations such as Append, Extract, Table Loader, Surrogate Key Generator, SCD Type 2, Splitter, and Lookup.
- Proficient in **programming** (Base SAS, SAS Macros, SQL) and analytical procedures like PROC MEANS, PROC FREQ, PROC TABULATE, PROC SQL, and PROC REPORT.
- Skilled in **data optimization** using pass-through queries, hash objects, parallel processing, and indexing for large datasets.
- Delivered Proofs of Concept (POCs) and production-ready solutions using various tools like **SAS Visual Analytics, DI Studio, and Enterprise Guide**.
- Experienced in **job deployment and scheduling** through admin tools and Process Flow Manager.

Azure & Cloud Data Engineering:

- Hands-on experience with **Microsoft Azure** services including **Azure Data Factory (ADF), Azure Synapse Analytics, Azure Data Lake, Databricks, Snowflake, Microsoft Fabric, and SAS Viya – basic**.
- Designed and orchestrated **Azure ETL pipelines** integrating on-prem and cloud data sources for analytics and reporting.
- Experienced in **Power BI**—developing end-to-end dashboards from requirements and data modelling to DAX, scheduling, and publishing.
- Familiar with **GCP services** such as Big Query, Cloud Storage, and Dataflow.

Additional Experience:

- Created **shell scripts** and automated workflows using **Zena** and **SKED** schedulers.
- Proficient in **Informatica PowerCenter 10.4** for ETL development and migration.
- Familiar **Python** for ETL scripting, data cleansing, and model preparation.
- Experienced in working with **Agile teams**, version control, and change management tools.

Technical Skills:

SAS Programming: BASE SAS, SAS MACROS, SAS SQL, SAS PROC, SAS ODS

SAS, ETL, BI Tools: SAS Data Integration Studio 4.9, Informatica PowerCenter 10.4, SAS Enterprise Guide 7.1, SAS Information Delivery Portal 4.3, SAS Information Map Studio 4.3, SAS Management Console 9.4, SAS Web Report Studio 4.3, SAS BI Dashboard 4.3, OLAP Cube, SAS Visual Analytics, Power BI, Hyperion, SAS Customer Intelligence, Azure Synapse Analytics, Azure Data Factory, Azure Databricks, Microsoft Fabric, SAS Risk Governance Framework, SAS Infrastructure for Risk Management, SAS Studio, SAS Viya

Programming Languages: PowerShell script, C, C++, Java, JavaScript, PHP, HTML, Unix, Python

Database: Oracle, SQL Server 2008, Teradata

Basics: SAS Data Flux, Hadoop (HDFS, HIVE, MapReduce, Pig, Sqoop, HBase, Flume, Oozie), SSIS, SSRS, Pentaho, MongoDB (NoSQL), Python, Tableau, AWS.

Professional Experience:

MetLife Inc, Sr. Data Analyst
Cyber Sphere LLC, New York, USA

Oct2022 – Present

Role & Responsibility:

- Supported IFRS17 **implementation** for MetLife's global business entities by analyzing actuarial and financial data to ensure accuracy and compliance with reporting standards.
- Designed and developed **data extraction, transformation, and loading (ETL)** processes using SAS Data Integration Studio to prepare datasets for actuarial and finance reporting.
- Conducted detailed **data analysis, validation, and reconciliation** between source systems and data models to ensure completeness and integrity of financial inputs and outputs.
- Collaborated with actuarial and finance teams to interpret **Contractual Service Margin (CSM)** and other metrics, ensuring accurate mapping of data to business rules.
- Created and maintained **data models and analytical frameworks** in SAS RGF and SAS IRM to support regulatory reporting and management dashboards.
- Performed **trend and variance analysis** on key financial indicators to identify data inconsistencies and support decision-making.
- Developed and automated **reporting workflows** for recurring financial reports and analytics, ensuring timely data availability across environments.
- Supported **data governance activities**, including metadata documentation, data lineage tracking, and process audit readiness.
- Handled **change requests**, optimized existing ETL and analytical processes, and collaborated with cross-functional teams for continuous process improvement.

Tools & Environment: SAS Data Integration Studio, SAS Enterprise Guide, SAS Management console, SAS RGF, SAS IRM, Process Flow Manager, SQL Server

Tokio Marine Insurance, Sr. Data Analyst
Ernst & Young (EY), Malaysia

Feb 2021 – Sept 2022

Role & Responsibility:

- Led the **end-to-end delivery** of the **SAS** Subledger and Columnar Reporting solution, covering the business lines.
- Defining business logic and creating **FSD** and **TSD** documentation in collaboration with actuarial and accounting teams.
- Extracted data from SQL Server and loaded it into SAS Studio; also retrieved JSON files from source systems, converted them to **CSV using Python scripts**, and ingested them into SAS for further processing.
- Designed and implemented the **SAS Subledger** using **SAS RGF**, **SAS IRM**, and **SAS Studio**, ensuring accurate financial reporting, CSM calculation, and GL interfacing.
- Built and scheduled **ETL processes** in **SAS Studio**, **SKED**, and **Process Flow Manager**, handling data ingestion, transformation, and load into compliant structures.
- Configured reporting workflows, access control via **SAS Management Console (SMC)**, and integrated **SAS Visual Analytics (VA)** for financial and actuarial reporting.
- Coordinated **UAT and production deployment** activities, managed test scenarios and defect tracking through **JIRA**, and supported ongoing client communication and issue resolution.
- Earned certification in **SAS Risk Solution** for IFRS 17 (**Viya 3.5**) to support solution customization and performance tuning.

Tools & Environment: SAS Studio, SAS RGF, SAS IRM, SAS VA, SAS VIYA, SAS SMC, SKED, SQL, Python

KAF Digital Bank, ETL Developer
Ernst & Young (EY), Malaysia

Apr 2020 – Jan 2021

Role & Responsibility:

- Managed IBM DQ tool setup and **coordinated** activities with **RHB IT** and **vendor**.
- Reviewed DQ SAS scripts and **translated** them into **SQL**.
- Built IT measurement metrics and **performed** AML impact analysis.
- Led RFP/RFI proposal activities and **designed** digital bank architecture.
- Collaborated with **Temenos**, **implementation teams**, and **clients**.
- Participated in migrating data pipelines and analytical logic from **SAS** to **Python**.
- Assisted team members in **translating SAS logic** into reusable **Python components**.
- Contributed to **code optimization**, **parameterization**, and **validation** of migrated scripts.

Tools & Environment: Digital Banking, EA Metrics, SAS, Python, SQL

NXP Semiconductor, BI Consultant
Accion Labs Sdn Bhd, Malaysia

Dec 2018 – Mar 2020

Role & Responsibility:

- Collaborated with **global manufacturing teams** (ATKL, ATBK, ATKH, ATTJ) to gather **requirements**, perform **POCs**, and **design, develop, and deliver** insightful **Microsoft Power BI** reports.
- Developed interactive dashboards using **DAX**, **drill-down/drill-through** features, and **line and stacked column charts** to visualize machine performance, production efficiency, and total working duration metrics.
- Automated Power BI dataset refreshes using **PowerShell scripts** and Power BI Service scheduler (SaaS), and published reports through **Power BI Apps** and **SharePoint** for enhanced accessibility.
- Configured **automated** email alerts and approval workflows using **Microsoft Power Automate (Flow)** to improve reporting efficiency and stakeholder communication.
- Created Operational Data Store (ODS) files through **Power Query** for downstream reporting and scheduled **data transfers** via **Power Update**.
- Managed and scheduled ETL and reporting jobs in **Hyperion** and **Microsoft Task Scheduler** to ensure **timely data availability** and **accurate report delivery**.

Tools & Environment: Power BI, Power Query, DAX, PowerShell, Power Automate, Hyperion, SQL, SharePoint

RHB Bank, SAS ETL Developer
Tentacle Technology Sdn Bhd, Malaysia

Jul 2016 – Nov 2018

Role & Responsibility:

- Developed ETL jobs in SAS DI Studio to process business logic and generate **daily/monthly Data Marts**.
- Built **dashboards** in **SAS Visual Analytics** to display **customer scores**, **rankings**, and **account status**.
- Automated flows using **shell scripts** and **batch programs** executed via **ZENA scheduler**.
- **Extracted** and **transformed Oracle data** for **CSV/XML generation** and **validated** in **Fusion Invest** system.
- Performed LSF setup in **SMC** and **managed process flows** through **Process Flow Manager**.

Tools & Environment : SAS DI, EG, SMC, VA, ZENA, Fusion Invest

Role & Responsibility:

- Developed and automated **ETL workflows** using **SAS Data Integration Studio** to process data from **DB2**, flat files, and CSVs for both banking and airline reporting systems.
- Designed and deployed **branch sales reports** and **financial dashboards** using **SAS Web Report Studio**, **Information Map Studio**, and **Visual Analytics**, with interactive features like prompts, filters, and drilldowns.
- Created **summary and detailed reports** using **PROC REPORT** and **PROC GPLOT**, and scheduled delivery to business users.
- Registered libraries, managed metadata, and configured job execution using **SAS Management Console (SMC)** and **Load Sharing Facility (LSF)**.
- Conducted **data profiling and cleansing** activities to improve data quality in reporting layers.
- Customized the **BI portal layout** and reporting templates to align with business branding.
- Provided **report documentation**, user training, and post-deployment support for modules related to **credit cards**, **personal loans**, and **financial KPIs**.

Tools & Environment: SAS DI Studio, SAS Info Map Studio, SAS Web Report Studi, SAS Visual Analytics, SAS SMC, LSF, FileZilla, DB2

Role & Responsibility:

- Built and optimized **ETL workflows** using **SAS DI Studio** to load patient, diagnosis, physician, and geography data from **Oracle**, **SQL Server**, and flat files.
- Developed robust **data validation logic** using **splitter transformations**, and implemented **performance optimization** techniques such as **multi-threading**, **indexing**, and **loop transformations**.
- Designed and scheduled **adjustment and claim reports** in **PDF** using **SAS Base**, **Macros**, and **ODS**, with automated **batch execution** in **Unix environments**.
- Created interactive dashboards and reports using **Web Report Studio** and **Information Map Studio**, incorporating **drilldowns**, **filters**, and **conditional formatting**.
- Managed **OLAP cube creation**, **report bursting**, and **publishing** via the **SAS Publishing Framework** for automated report distribution.
- Applied **job parameterization** and batch scripting for **iterative loads** and ad hoc reporting.
- Shared project knowledge and best practices through structured **knowledge transfer (KT) sessions**.

Tools & Environment: SAS DI Studio, Info Map Studio, Web Report Studio, Oracle, SAS Base, Macros, ODS, SQL, Web Report Studio, Unix

Education:

BCS (Bachelor of Computer Science) – Pune University – 2011

MCA (Master of Computer Applications) – Pune University – 2014
