

Disha Patel | Full Stack Java Developer

613- 415-6295 | dp6125959@gmail.com

Professional Summary

- **Results-driven** highly skilled Full Stack Java Developer with **4 years** of experience in designing, developing, and deploying web applications using Java, Spring Boot, Hibernate, Angular/React, and REST APIs
- Skilled in front-end technologies including HTML, CSS, JavaScript, and modern frameworks like React and Angular.
- Experienced in developing **RESTful** APIs and integrating them with front-end applications to enhance user experience.
- Solid understanding of database management systems like **MySQL** and Oracle, with expertise in designing and optimizing schemas.
- Familiar with cloud platforms such as AWS and Azure, utilizing them for deploying and scaling applications.
- Proficient in version control systems like **Git**, ensuring collaborative and efficient development workflows.
- Involved in Coding Standards, Code Review, Documentation, Scalability, Productivity and Scalability.
- Experienced in **Agile** development methodologies, participating actively in sprint planning and code reviews.
- Committed to writing clean, maintainable code and adhering to best practices in software development.
- Strong problem-solving skills with a focus on delivering high-quality software solutions within deadlines.
- Excellent communication skills and collaboration abilities, working effectively in cross-functional teams

Skills

- **Programming Languages:** Java 11, Core Java, JavaScript, TypeScript, Linux
- **Backend Technologies:** Java, Spring Boot, Spring MVC, Spring core, JDBC, JPA, Hibernate, SOAP, RESTful APIs, Spring Framework, JMS, Apache Kafka, CI/CD Pipelines
- **DevOps & Cloud:** Docker, Kubernetes, AWS (EC2, S3, Lambda), Jenkins, GitHub Actions, Kubernetes, Docker, Docker Hub
- **Testing:** JUnit, Mockito, Selenium, Cucumber (BDD)
- **Other Platforms/Tools:** Postman, JIRA, Eclipse, VS Code, Log4J, Maven, Gradle, SonarQube, Swagger, Team City, OpenShift, Data Structures, Algorithms, Object-Oriented Programming
- **Database Management:** MySQL, SQL, PostgreSQL, MongoDB, Oracle, Unix Shell
- **Frontend Technologies:** HTML5, CSS3, JavaScript (ES6+), ReactJS, Angular, Bootstrap

Professional Experience

Molly Maid

Software Developer

07/2024 to 02/2025

- Developed and deployed scalable Enterprise **Spring Boot microservices Architecture** integrated with RESTful APIs and databases with Design Specifications
- Worked in an **Agile software development** environment, collaborating with cross-functional teams using **Scrum** and **Kanban** methodologies.
- Developed and maintained **REST APIs**, providing backend services to the frontend team for **seamless integration**.
- Enhanced application performance, reducing response time by **20%** through code optimization and query tuning.
- Worked with **Kafka** to set up event-driven architecture, improving **data stream handling** for real-time systems.
- Designed and implemented **React.js** frontend components, improving UI/UX and page load speeds.
- Optimized database queries and used **Hibernate** for efficient **ORM** mapping.
- Developed and consumed RESTful APIs to connect frontend and backend seamlessly.
- Implemented **JWT-based authentication and OAuth 2.0** security for secure API access.
- Deployed applications on **AWS** and automated CI/CD pipelines using **Jenkins & Docker**.
- Improved application performance by **30%** by optimizing backend logic and database queries.
- Engaged in end-to-end development according to business requirements.

Patel Infra

Web Developer

12/2020 to 05/2023

- Designed and built backend web services integration using **Spring Boot, Hibernate, and MySQL**.
- Involved in client requirement gathering and Object-Oriented Analysis and Design Patterns.
- Developed dynamic web applications with **JavaScript, Angular, and Bootstrap** for a seamless user experience.
- Wrote unit tests with **JUnit & Mockito**, improving code reliability by **95%**.
- Implemented **unit testing** using **JUnit** and **Mockito** to ensure code reliability and maintainability.
- Managed application deployment using **Docker & Kubernetes**, reducing deployment time by **40%**.
- Implemented application security using Spring security framework
- Resolved technical challenges through **effective communication and teamwork**, improving project efficiency.
- Integrated cloud-based solutions with **AWS services** such as **EC2, Lambda, and S3** for dynamic scalability.
- Automated deployment processes using Jenkins, streamlining release cycles and minimizing deployment errors.
- Collaborated closely with front-end developers to deliver user-friendly interfaces and seamless functionality.

Education

Bachelor of Computer Application

Dharamsinh Desai University | 2020
