

Douglas Galm

Senior Full Stack Engineer

Garden Grove, CA 92844 | douglas.galm777@gmail.com | (210) 939-7049

SUMMARY

Senior **Full Stack Engineer** with over 8 years of experience in designing, developing, and maintaining complex **web applications**. Expertise in building scalable, performant, and user-centric solutions using **TypeScript**, **React**, **Next.js**, and **Node.js**. Proven track record of leading cross-functional teams, mentoring engineers, and optimizing system performance for high-impact projects. Highly skilled in integrating **RESTful APIs**, improving **developer workflows**, and applying modern **CI/CD** practices. Strong communicator with a collaborative mindset, committed to delivering clean, maintainable, and reusable code following **best practices**.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, Python, Go
 - **Frontend:** React, Next.js, Redux, Sagas, Tailwind CSS, Material UI, GraphQL
 - **Backend:** Node.js, Express.js, PostgreSQL, MongoDB, RESTful APIs
 - **Tools:** Git, GitHub, Webpack, Vite, Rollup, Jenkins, Docker, AWS
 - **Testing Frameworks:** Jest, Mocha, Cypress
 - **Other:** CI/CD, Agile/Scrum, Cloud Platforms (AWS), Performance Optimization
-

PROFESSIONAL EXPERIENCE

LogixCare, LLC – Senior Software Engineer

Sep 2023 – Jul 2025

*Developed a leading-edge **home healthcare SaaS platform** focused on delivering secure, scalable, and user-friendly solutions for healthcare professionals.*

- Led the development and optimization of the **frontend** using **React** and **Next.js**, improving performance by 40% through **code-splitting** and **lazy loading**.
- Collaborated with cross-functional teams to define, design, and implement new features, increasing product adoption by 25%.

- Wrote clean, maintainable **TypeScript** code and contributed to improving **CI/CD pipelines**, which reduced deployment time by 30%.
 - Implemented **RESTful APIs** and integrated them with the frontend, enabling seamless communication between the application and third-party services.
 - Conducted comprehensive code reviews and mentoring sessions, improving team efficiency and adherence to **best practices**.
 - Troubleshoot and debugged legacy code, identifying performance bottlenecks, which led to a 15% improvement in application speed.
 - Optimized database queries and interactions with **PostgreSQL**, reducing database load and improving response times.
 - Drove continuous improvement through research and implementation of new technologies and frameworks like **React 18** and **AWS Lambda**.
 - Collaborated closely with **UX/UI** teams to ensure **responsive design principles** were applied consistently across all devices.
 - Played an instrumental role in maintaining **security best practices** in the application, ensuring compliance with healthcare regulations (HIPAA).
-

NeuroFlow – Full Stack Engineer

Jul 2020 – Jun 2023

*Developed an **AI-driven chatbot SaaS platform** and a **home healthcare SaaS** to enhance patient engagement and operational efficiency for mental health providers.*

- Built and maintained the **frontend** of the platform using **React** and **Redux**, improving user interaction speeds by 25%.
 - Designed and implemented core backend services in **Node.js** for real-time data processing and management of patient records.
 - Integrated **AI/ML** models into the chatbot feature, which handled over 50,000 monthly interactions, providing users with actionable insights.
 - Collaborated with teams to build and optimize **RESTful APIs**, enabling integration with third-party services for telehealth and scheduling.
 - Utilized **PostgreSQL** and **MongoDB** to manage data across different modules, ensuring data consistency and high availability.
 - Led **unit testing** initiatives with **Jest** and **Mocha**, ensuring robust testing coverage for both **frontend** and **backend** code.
 - Streamlined the **CI/CD pipeline** with **GitHub Actions**, automating deployments and reducing manual errors by 20%.
-

Ntiva, Inc. – Full Stack Developer

Feb 2019 – May 2020

*Contributed to the development and maintenance of a **social impact platform** aimed at connecting volunteers with non-profit organizations.*

- Designed and developed the **frontend** using **React** and **Sass**, enhancing the user experience by providing a smooth, responsive design.
- Built out key **RESTful APIs** in **Node.js** and integrated them with the frontend for a seamless user experience.
- Ensured the application was fully **responsive** across devices using **CSS3** and **HTML5** principles.
- Worked within an **Agile/Scrum** framework, collaborating daily with teams to release features on a two-week sprint cycle.
- Implemented **authentication and authorization** systems using **JWT** to ensure secure access control.
- Optimized performance of frontend components by applying best practices in **state management** and **code splitting**.
- Led code refactoring efforts that improved the app's maintainability and scalability by 30%.

EDUCATION

Bachelor of Science (B.S.) in Computer Science

California State University | 2013 – 2018
