

Elvis Solis

Software Developer Engineer

Result-oriented developer with a proven track record of developing efficient and innovative solutions. Skilled in back and frontend development with experience in large-scale systems and project management. Seeking to leverage technical and leadership expertise in an engineering role.

WORK EXPERIENCE

Ralphs, Burbank — *Co-Manager*

Oct 2009 - June 2023, April 2024 - Present

- Managed daily operations with focus on safety and compliance metrics
- Developed scheduling workflows to optimize efficiency for a team of employees
- Mentored employees, contributing to overall store performance and customer satisfaction

Amazon, Irvine — *Software Developer Engineer*

June 2022 - Aug 2022, Aug 2023 - May 2024

- Designed and developed APIs for automotive HUB
- Supported media & navigation projects with bug fixes and feature enhancements
- Spearheaded individual projects, including implementing complex integrations between Alexa and automotive systems

EDUCATION

University of California, Berkeley

July 2020 - June 2023

Bachelor of Science in Electrical Engineering & Computer Science

PROJECTS

Mini SQL Engine

- Designed a simplified relational database system to handle query parsing, optimization and execution.
- Implemented indexing, joins and basic transaction management for improved efficiency.

Operating System Kernel

- Built a basic kernel featuring process scheduling, memory management and I/O handling.
- Explored thread synchronization techniques and inter-process communication for system stability.

AI-Based Game Player

- Developed an AI agent for a strategy based game incorporating minimax and Q-learning
- Optimized performance through Alpha-Beta pruning
