

Eric Sanders

Senior Full Stack Engineer - React/Next | Node.js | Cloud | SaaS Solutions

Miami, FL 33157 • ericsanders090@gmail.com • (484) 473-1040 • [linkedin.com/in/eric-sanders-317b48355](https://www.linkedin.com/in/eric-sanders-317b48355)

SUMMARY

Results-driven **Senior Full Stack Engineer with over 10 years** of experience architecting and delivering high-performance SaaS platforms using **React/Next.js**, **Node.js** and **AWS**. Demonstrated expertise in building scalable, secure, and maintainable applications leveraging **JavaScript** and **TypeScript** ecosystems. Proven track record in leading full lifecycle development — from system design and **API** architecture to cloud deployment and optimization. Adept at implementing **DevOps** best practices, **CI/CD pipelines**, and **Cloud-native Solutions** to drive engineering efficiency. Passionate about applying **AI** and **Automation** to enhance scalability, user experience, and business intelligence.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
- **Frontend Technologies:** React.js, Next.js, React Native, Redux, Zustand, Tailwind CSS, Material UI, D3.js, Webpack, Vite, SSR/SSG
- **Backend & APIs:** Node.js, Express.js, NestJS, RESTful APIs, GraphQL APIs, Microservices, Serverless Architecture
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, API Gateway, CloudFormation, DynamoDB, RDS, Cognito), Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, Jenkins, CircleCI), Monitoring (CloudWatch, New Relic)
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, ElasticSearch
- **AI & Automation:** OpenAI API, LangChain, AWS Bedrock, TensorFlow.js, Chatbot Integration, Data Pipelines, Intelligent Automation
- **Testing & Quality Assurance:** Jest, Mocha, Chai, Cypress, Playwright, Postman, ESLint, Prettier
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Agile/Scrum
- **Other Tools & Practices:** API Design, Performance Optimization, Caching Strategies, CI/CD Automation, Code Reviews, Secure Coding Practices, Scalable Architecture Design

PROFESSIONAL EXPERIENCE

RAPPTR LABS

Senior Full Stack Engineer

Jersey City, NJ

Aug 2022-Present

Driving innovation in **AI-enabled** SaaS ecosystems, leading full-stack engineering efforts across healthcare, adtech, and enterprise automation platforms.

- Spearheaded development of AI-powered SaaS products using **React/Next.js** and **TypeScript**, resulting in 35% faster load times and 28% growth in organic traffic, directly increasing customer acquisition.
- Delivered microservice architectures in **Node.js (NestJS, Express)** to process healthcare data and ad targeting events, tripling API throughput and supporting enterprise clients generating over \$5M in annual data transactions.
- Directed cross-platform mobile app development using **React Native**, achieving 40% reduction in development costs and 25% faster feature delivery across iOS and Android.
- Integrated **GraphQL APIs** for unified data access, reducing query latency by 25% and enabling faster product analytics that supported strategic decision-making for client campaigns.
- Built real-time event processing pipelines using **Kafka** and **RabbitMQ**, handling millions of ad impressions daily and increasing data processing reliability to 99.9% uptime.
- Implemented **Terraform**, **Kubernetes**, and **GitHub Actions** for automated **CI/CD**, cutting deployment time by 60% and eliminating manual configuration errors.
- Deployed cloud-native analytics workloads on **AWS** and **GCP**, optimizing cost efficiency by 20% and ensuring global scalability for large data pipelines.

- Integrated **OpenAI GPT** and **Hugging Face NLP** models into production workflows, automating campaign content generation and increasing ad engagement rates by 15%.
- Championed AI-assisted development tools like **Github Copilot** and **Cursor**, improving team velocity by 18% and reducing post-release bugs, strengthening delivery reliability and code quality.

DOCKYARD

Senior Full Stack Developer

Hingham, MA

Jun 2018-Jul 2022

Built and scaled a subscription-based live streaming SaaS platform enabling artists to host ticketed virtual concerts and events, with a focus on real-time performance, audience engagement, and global scalability.

- Architected multi-tenant SaaS infrastructure supporting 1.5M+ concurrent viewers, integrating ticketing, live chat, and subscription billing that generated over \$10M in artist revenue within the first year.
- Modernized frontend performance architecture using **React/Next.js** and **CDN** caching, improving page load speed by 40% and boosting live stream retention by 25%.
- Developed real-time APIs and backend services in **Node.js (NestJS, Express)** for ticketing and event scheduling, maintaining 99.99% uptime during high-traffic global events.
- Designed **GraphQL/REST APIs** for seamless payment and streaming integrations, reducing third-party integration time by 35% and improving revenue recognition accuracy.
- Implemented microservice orchestration with **Docker** and **Kubernetes**, enabling auto-scaling during peak concert hours, ensuring uninterrupted service during multi-million-viewer streams.
- Leveraged **BigQuery** and **Cloud Spanner** to build real-time analytics dashboards for artists and administrators, driving data-backed marketing campaigns and 15% higher re-subscription rates.
- Automated **CI/CD** pipelines with **GitHub Actions**, reducing release times by 50% and increasing overall deployment frequency, accelerating product iteration.
- Collaborated with **AI** and data teams to integrate personalized event recommendations, increasing cross-event ticket sales by 18%.
- Mentored 5+ engineers, establishing scalable coding standards and architecture patterns that reduced technical debt and improved delivery predictability.

IntellectSoft

Software Developer

New York, NY

Sep 2014-Apr 2018

Contributed to enterprise-level educational and retail platforms by re-architecting systems for scalability, performance, and modern user experience.

- Migrated legacy ASP.NET monoliths to **Node.js/Flask** microservices, improving system reliability and reducing release cycles from 2 weeks to 3 days.
- Built interactive **LMS** features with **React/Redux**, driving 20% increase in daily active users for educational clients.
- Implemented real-time collaboration tools using **Redis Pub/Sub** and **WebSockets**, enhancing user engagement metrics by 30% in both e-learning and retail chat systems.
- Designed optimized database schemas in **PostgreSQL** and **MongoDB**, improving reporting performance and reducing data query times by 40%.
- Established **CI/CD** pipelines with **GitHub Actions** and **Kubernetes**, automating QA and deployment processes that cut manual release overhead by 60%.
- Collaborated across QA, DevOps, and PM teams to standardize cloud deployment practices, increasing delivery reliability and reducing incident response time.

EDUCATION

SILICON VALLEY UNIVERSITY

Bachelor of Science; Major in Computer Science

San Jose, CA

2010-2014
