Professional Summary

Civil Engineer with over 12 years of experience in construction, oil & gas, refinery, and industrial projects, specializing in project coordination, cost control, and field engineering. Proven track record in capital improvement and tenant improvement projects, resource optimization, and subcontractor management. Strong communicator with expertise in budgeting, scheduling, and safety compliance, seeking to contribute to dynamic construction and real estate development teams.

Core Skills

- Project Planning & Execution
- Cost Estimation & Budget Control
- Capital & Tenant Improvement Projects
- Subcontractor & Stakeholder Coordination
- Quality Assurance & Safety Compliance
- Industrial & Refinery Construction
- Strategic Reporting & Forecasting

Professional Experience

Project Civil Engineer | Independent | Feb 2024 – Present

- Manage engineering projects ensuring on-time and on-budget delivery.
- Coordinate design, planning, and execution phases with cross-functional teams.

Field Technician | MIURA | Jun 2024 – Nov 2024

- Performed maintenance, installation, and repair of boiler systems in industrial facilities.
- Implemented preventive maintenance strategies, improving system uptime.

Field Control Engineer | Samsung (Refinery) | Dec 2021 – Feb 2024

- Planned and supervised resource allocation and construction cost budgets for refinery projects.
- Coordinated scope requirements across disciplines and ensured timely project definition.
- Produced cost and performance forecasts, reducing budget variance.
- Supported implementation of field control procedures that improved reporting efficiency.

Civil Engineering Coordinator | J.A. Diaz (Dos Bocas Refinery) | Dec 2020 – Jun 2021

- Reviewed and integrated architectural, structural, and engineering designs into the Master Plan.
- Directed subcontractors to maintain execution schedules and compliance with codes/standards.
- Conducted constructability reviews and value engineering, generating cost savings.

Construction Site Resident | Chufani (Nestlé Parish) | Nov 2019 – Dec 2020

- Supervised construction processes, ensuring compliance with safety protocols and technical standards.
- Verified materials and equipment, increasing quality assurance compliance.

Additional Roles (2011 – 2019)

- Project Engineer (Expectras), Industrial Project Engineer (Techint), Field Engineer (3mG & Oceanografía),
- Coatings Supervisor (Hutchison), Construction Engineer (Consortio ARA), Materials Manager (Coconal).

Education

Civil Engineer – Universidad Veracruzana (2007 – 2011)
