

EDUCATION

Purdue University Indianapolis Master's in Computer and Information Science	December'2025
Guru Nanak Institute of Technology Bachelor's in Electronics and Communication Engineering	July'2022

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience delivering web applications in automotive, logistics, and healthcare domains. Skilled in **React, Angular, Node.js (NestJS), PostgreSQL, MongoDB, and cloud platforms (AWS/GCP)**. Hands-on with API development, database optimization, and CI/CD pipelines. Currently pursuing a Master's in Computer & Information Science at **Purdue University**.

PROFESSIONAL EXPERIENCE

Software Developer Intern

Surviving Breast Cancer Organization | Jul 2025 – Present

- Developing Bloom 2.0, a full-stack cancer-support platform with modules for medical hub, check-ins, nutrition, and mindfulness.
- Building scalable Next.js (TypeScript) UI and FastAPI / Node.js backend services with Stripe-based billing and secure authentication flows.
- Deploying containerized applications on AWS (ECS, S3, CloudFront) using Docker & Terraform, ensuring reliable, HIPAA-compliant performance.
- Tech Stack:** Next.js (TypeScript), FastAPI (Python), Node.js (NestJS), PostgreSQL, MongoDB, AWS, Docker, Terraform, Stripe API

Full Stack Developer

Virtusa Consulting Services, Hyderabad | Dec 2020 – Dec 2023

TEMA-2 – Vehicle Component Testing Platform

Role: Full Stack Developer | **Domain:** Automotive Engineering

- Built 20+ Angular UI components and 15+ **Node.js APIs**, enhancing usability and real-time test tracking.
- Integrated **Kafka & gRPC**, reducing service delays by ~40%.
- Collaborated with cross-functional teams (QA, DevOps, Product) to ensure smooth deployments and faster issue resolution.
- Outcome:** Shortened testing cycles by ~40% and boosted throughput by ~35%.
- Tech Stack:** Angular, Node.js (NestJS), Kafka, gRPC, MongoDB

OPALE-2 – Lifecycle Management Web Application

Role: Full Stack Developer | **Domain:** Component Logistics

- Delivered 18+ backend endpoints and 25+ ReactJS modules, streamlining lifecycle tracking.
- Optimized **PostgreSQL** schemas, cutting query time by ~50%.
- Conducted UAT sessions with stakeholders, ensuring business requirements were met within 3 sprint cycles.
- Outcome:** Reduced manual tracking tasks by ~60% and improved data traceability.
- Tech Stack:** ReactJS, Node.js (NestJS), PostgreSQL

TP-2 – Batch Process Monitoring Tool

Role: Full Stack Developer | **Domain:** Data Synchronization & Internal Operations

- Built 12 **Angular dashboards** and 14 **Node.js services** to automate sync checks and alerts.
- Improved PostgreSQL queries and batch jobs, detecting sync issues ~45% faster.
- Integrated alert notification systems, enabling proactive issue handling across multiple environments.
- Outcome:** Increased sync reliability by ~50% and enabled proactive resolution.
- Tech Stack:** Angular, Node.js (NestJS), PostgreSQL

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java

Course Work: Data Structures and Algorithms, Natural Language Processing, Advanced Databases, Operating Systems

Databases: SQL, MySQL, PostgreSQL, MongoDB

Frontend Technologies: Angular, ReactJS, React Native

Backend Technologies: Flask Web Framework, Django Web Framework, Node.js with Express.js and NestJS, Spring Boot

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Jenkins, Argo CD

Development Tools: PyCharm, Visual Studio Code, IntelliJ IDEA, Eclipse

ACADEMIC PROJECTS

Sentiment Analysis with Emojis in Social Media

Improved sentiment analysis accuracy using **NLP models (BERT, Twitter Roberta)** on Twitter data, demonstrating the impact of emoji inclusion. Optimized the emoji encoding process, reducing model training time.

Security Starting Systems in Vehicles using Iot

Developed an IOT-based vehicle ignition system, reducing unauthorized access risks and enhancing overall vehicle security. Integrated realtime monitoring features, increasing system responsiveness by 25%.
