

**Geethanjali Singiresu**

**[maadhyageetha@gmail.com](mailto:maadhyageetha@gmail.com)**

**203-444-6051**

**Professional Summary:**

- Over 9+ years of experience as a Salesforce developer, with a strong track record in implementing, customizing, and maintaining Salesforce solutions across various industries, including healthcare and biotechnology.
- Proficiency in Salesforce Administration, Configuration, Implementation, and Support, harnessing the power of the Apex Language and leveraging the Force.com Platform.
- Experience in utilizing Salesforce Lightning UI to create innovative lightning Apps that seamlessly integrate Lightning Design System, Lightning App Builder, and Lightning components. Proficient in SOQL.
- Extensive experience in managing and implementing Order Management Systems (OMS) to streamline order processing, tracking, and fulfillment operations.
- Developed and customized cases are routed to the most suitable representatives based on skill sets and availability.
- Worked closely with the sales team and business analysts, trained internal users, performed detailed analysis of business and user requirements, and customized various standard objects of Salesforce.com (SFDC).
- Experience in managing and implementing Sales Cloud, Service Cloud, and Custom Applications.
- Adept in Apex Programming, including custom trigger creation and the execution of Asynchronous calls to meet specific business requirements.
- Proficient in Case Management, Order Management, Marketing, Service Management, Sales, Self Service, Contracts CRM, Products CRM.
- Extensive experience in establishing and fine-tuning security measures and sharing rules at object, field, and record levels, catering to diverse users across various organizational hierarchies. Proficient in profile management and permission configuration.
- Proficient in setting up, maintaining, and optimizing Email marketing campaigns through Exact Target/Salesforce Marketing Cloud.
- Competent in data migration, employing tools such as Apex Data Loader, Import Wizard, and Data Loader.
- Hands-on experience in writing Lightning components using Lightning Web Components (LWC) and Aura Framework.
- Proficiently created Web Services to manage requests and build API-based applications using REST.
- Possess a strong foundation in Salesforce CI/CD Tools, including GIT, GitHub.
- Proficient in SFDC development using Apex classes, Triggers, Visual Force, Force.com IDE, SOQL.
- Expertise in setting up single sign-on using SAML and integrating with various systems.
- Hands-on experience in constructing automated processes with Process Builder in Salesforce.

- Proven track record of customizing standard objects, Workflow & Approvals, Reports, Custom Objects and Tabs, Email Services, Security Controls, Process Builder, App- Exchange Package & Custom Application, and Sandbox data loading.
- Hands-on experience with development tools like VS Code with Salesforce DX CLI, and experience in the design and development of REST API Enterprise Integrations between Salesforce and other legacy applications. Experience in deployment using Change Sets and Copado.
- Worked on creating LWC screens for different types of pages for the client based on logic for accounts and services. Navigated these screens and functionalities using Flows and LWC combination. Created various buttons and built an architecture of existing systems using LWC for better performance.
- Proficiency in SFDC administrative tasks, including profile and role creation, user management, page layout design, record type configuration, e-mail services setup, Workflow, Reports, Dashboards, Approvals, and Tasks.
- Strong knowledge in Salesforce customization, data validation, sales, marketing, customer service, and support development and administration.
- Proficient in web technologies such as HTML, XML, CSS, JSP, JavaScript.
- Well-versed in all phases of the Software Development Life Cycle (SDLC).
- Highly motivated team player with a forward-looking attitude and possess strong interpersonal skills, communication skills, and problem-solving skills; willing to work in a challenging and cross-platform environment.

#### **Certifications:**

- Certified Salesforce Platform Developer 1
- Certified Salesforce Administrator

#### **Education:**

- Bachelor of Technology in Electronics and Communication Engineering (2012)

#### **Technical Skills:**

#### **Work Experience:**

**Client: Biogen, Boston,  
MA March 2024 - Present**

**Role: Sr. Salesforce Developer****Responsibilities:**

- Developed and customized Salesforce solutions for the healthcare sector, focusing on patient data management, clinical workflows, and regulatory compliance.
- Led the development of a custom Lightning application on the Salesforce Work.com platform to enhance employee wellness, productivity, and healthcare operations.
- Integrated Order Management Systems (OMS) to enhance order processing and fulfillment workflows, ensuring seamless patient access to necessary medical products and services.
- Developed case management, efficiently routing customer inquiries and support requests to the appropriate representatives based on skill sets and availability, thereby improving response times and customer satisfaction.
- Collaborated with business analysts and stakeholders to design Salesforce solutions that align with business goals and healthcare regulations.
- Utilized Lightning Web Components (LWC) to develop responsive healthcare applications, improving patient care delivery and operational efficiency.
- Designed and implemented healthcare marketing campaigns using Marketing Cloud, enhancing patient engagement and care outcomes.
- Developed and deployed Salesforce applications to streamline clinical trials, patient data collection, and reporting, ensuring compliance with industry standards.
- Used Salesforce Flows to streamline business processes, allowing for smooth workflows without requiring much coding.
- Worked extensively with Salesforce standard objects like Cases, Contacts, and Opportunities, focusing on healthcare-specific customizations and integrations.
- Managed the deployment of Salesforce solutions from Development Sandbox to Production, adhering to compliance and security protocols.
- Conducted data audits and quality checks to ensure patient data accuracy and security, maintaining HIPAA compliance.
- Provided training and support to healthcare teams on Salesforce best practices, enhancing user adoption and system efficiency.
- Showing committed LWC screens on UI and updating the fields in LWC post-commit to the database.
- Worked on a variety of data table requirements using LWC which gets the data from data objects and dynamic grid configurations from temp metadata tables.
- Integrated Salesforce with third-party healthcare applications, improving interoperability and streamlining workflows.

**Environment:** Salesforce Health Cloud, Eclipse Force.com IDE, Salesforce DX, Lightning Web Components, Apex, SOQL, SOSL, Informatica, Agile Methodologies.

**Client:** Meijer, Greenville, Michigan

**June 2023 – Feb 2024**

**Role:** Sr. Salesforce Developer

**Responsibilities:**

- Conducted a detailed analysis of both functional and technical requirements. Designed and deployed custom objects, identifying lookup and master-detail relationships, and creating junction objects.
- Implemented security and sharing rules at object, field, and record levels, catering to various users throughout the organization.
- Developed profiles and configured permissions based on the organizational hierarchy.
- Managed MongoDB databases using the MMS Monitoring Tool to ensure efficient performance.
- Created custom objects, assigned fields, designed page layouts, custom tabs, components, and custom reports.
- Established integration between Salesforce CRM and Gmail through Force.com AppExchange's Email integration engine.
- Designed and developed web pages utilizing JSP, HTML, and ASP, incorporating JavaScript for client-side validation.
- Registered events and listeners to handle Lightning events, enhancing application functionality.
- Implemented validation rules on objects, tabs, page layouts, custom tabs, and components to align with application requirements.
- Utilized Lightning app-builder and Lightning components to create and build apps that met client requirements.
- Developed numerous Lightning Components and server-side controllers, aligning with business needs.
- Implemented REST APIs to facilitate integration with client databases and provide flexible e-commerce services.
- Designed Validation Rules and Roll-Up Summary Fields to maintain data quality and consistency.
- Managed installed Managed Packages in Lightning using Apex.
- Added methods that could be called from Visualforce pages to Controller Extensions, enhancing customization capabilities.
- Created Web-to-Lead and Web-to-Case forms to streamline case management. Implemented Escalation rules for efficient case handling.

**Environment:** Force.com IDE, Lightning, Apex Classes, Apex Triggers, Visualforce pages, Validation Rules, Formula Fields, Data Loader, JIRA, HTML5, Reports and Dashboards, Workflow Approvals, Web Services, Force.com Eclipse Plug-in. REST API.

**Client:** Diebold Systems Private Limited, Hyderabad, India

**May 2014 – Oct 2021**

**Role:** Salesforce Developer

**Responsibilities:**

- Designed, developed, and deployed Apex classes, controllers, extensions, and Apex triggers in Visualforce and Force.com to meet various functional needs of the application.
- Developed a customer portal using the Lightning framework within Communities.
- Created and customized Visualforce pages, profiles, roles, and page layouts, configuring permissions based on organizational hierarchy requirements.
- Worked on Service Cloud to provide client support and Sales Cloud to manage and maintain sales territories using Enterprise Territory Management.
- Utilized standard objects such as Leads, Accounts, Cases, and Contacts; worked with search layouts, page layouts, the migration tool, app customization, custom links, and related links.
- Implemented Salesforce Automation (SFA) for Campaign Management, Lead Management, and Opportunity Management, and wrote Apex REST web service classes for inbound Salesforce calls.
- Created workflow rules for email alerts, field updates, and sending outbound API messages to external partners.
- Implemented approval processes for content control, designed HTML email templates for auto-responses, and created approval page layouts tested using Sandbox.
- Developed Lightning Components using Aura Framework and Lightning Web Components (LWC). Experience in creating modern Enterprise Lightning Apps.
- Used SOQL for data manipulation within the application using platform database objects.
- Built and integrated mobile-optimized Visualforce Pages for Salesforce1 application and Lightning Experience, deploying Apex code using the Force.com IDE and Change Sets.
- Maintained data cleanliness and accuracy by adding custom validation rules, formulas, tabs, reports, and dashboards.
- Implemented escalation rules and automatic case generation, ensuring quick issue resolution through email alerts for call center representatives.
- Configured Data Loader for CSV file uploads into Salesforce.com, ensuring data correctness.
- Created roles, role hierarchies, and sharing rules, and implemented object-level field security to manage critical information on user profiles. Managed field tracking and record follow-through using Salesforce Chatter, enabling notifications and publisher actions.
- Extracted data from Salesforce.com into large databases (Oracle) for generating extensive data reports, working on the full lifecycle implementation of Service Cloud.
- Implemented web-based case management and automatic web-to-case tracking on the Case object to solve customer issues. Developed project estimates, implemented Salesforce.com customizations, and drove User Acceptance Testing (UAT).
- Worked closely with the sales team and business analysts, trained internal users, performed detailed analysis of business and user requirements, and customized various standard objects of Salesforce.com (SFDC).
- Created various reports (summary reports, matrix reports, dashboards, pie charts, and graphics) and folders to assist managers in utilizing Salesforce as a sales tool, configuring test scenarios in the Sandbox environment to implement QA testing.

**Environment:** Apex Classes, Apex Triggers, Visual force, Security Management, Workflows and Approval processes, HTML, Web services, SOQL, JavaScript, Sandbox testing environment, Force.com Eclipse IDE Plug-in, Apex Data loader.
