SUMMARY:

I am a strategic and innovative **Software Engineering Expert with 10+ years of experience** designing and scaling high-performance backend systems using Node.js, microservices and cloud-native technologies. I have a proven history of delivering enterprise-grade platforms across fintech, healthcare, e-commerce, real estate and education. I am skilled in crafting clean, high-performing code and resilient architectures. I am known for mentoring developers, leading agile teams, and aligning engineering with business goals. I bring a strong foundation in DevOps, security, and compliance. I am passionate about solving complex technical challenges through innovation and automation. I am an expert in scaling Node.js system architectures.

Skill Highlights:

Frontend Technologies: JavaScript (ES6+), TypeScript, HTML5, CSS3, React.js, Vue.js

Backend Technologies: Node.js, Python

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3), Google Cloud, Azure, Oracle Cloud, Firebase, Docker, Kubernetes, Jenkins, Terraform, Git, CI/CD Pipelines

Testing: Jest, Mocha, Chai, Cypress

Security: OWASP Standards, SSL/TLS, Application Security, Vulnerability Assessment

Workflow: Agile, Scrum, Project Coordination, Team Leadership

Experience:

SENIOR ENGINEERING MANAGER | 03/2023 to Current
Picsello

- Led the end-to-end architecture of scalable, production-grade Node.js systems across fintech and healthcare domains.
- Engineered real-time communication layers using WebSockets, event emitters, and REST APIs for responsive user experiences.
- Delivered cross-functional features integrating Node.js with modern frontend frameworks (React, Vue.js) to enhance system cohesion.
- Built CI/CD workflows with GitHub Actions, Docker and Kubernetes, improving deployment reliability and reducing lead time by 70%.
- Provided technical leadership through code reviews, mentoring, and setting engineering standards for distributed teams.

ENGINEERING MANAGER | 01/2021 to 01/2023
Rinsed

- Built highly available event-driven services using Node.js, AWS Lambda, and SQS for transaction processing.
- Led a successful cloud migration initiative, improving system throughput by 30% using containerized Node.js services.
- Implemented monitoring and observability using New Relic and Prometheus across distributed services.
- Collaborated cross-functionally on architecture design, performance tuning, and infrastructure automation.

SOLUTION ARCHITECT | 10/2017 to 12/2020
Karsun Solutions

- Designed and developed real-time, scalable backend systems using Node.js (Express.js, Socket.IO) and a microservices-based architecture.

- Refactored services into reusable modules, improving deployment efficiency and enabling horizontal scaling.
- Built automated CI/CD pipelines using Jenkins and Azure DevOps, leading to a 40% boost in release frequency.
- Created interactive admin dashboards and reporting tools using Vue.js, enhancing internal process visibility.
- Led Agile delivery cycles, mentoring developers on clean architecture, unit testing, and DevOps best practices.

SENIOR SOFTWARE ENGINEER | 01/2015 to 09/2017

Peek

- Developed and maintained full-stack web applications using Node.js (Express.js), React, and PostgreSQL, supporting dynamic business workflows.
- Redesigned and optimized backend architecture by breaking down legacy code into reusable Node.js modules, improving scalability and easing future development.
- Collaborated closely with frontend teams to ensure clean API contracts and seamless integration across services.
- Led code reviews and implemented unit testing using Mocha and Chai, enhancing code quality and reducing bugs in production.

Projects:

Here are a few projects that showcase my professional expertise and accomplishment.

RevBits (CIP - Cyber Intelligence Platform)
Project Overview: RevBits Cyber Intelligence Platform harnesses the power of sophisticated security modules, which are part of an array of unique security solutions, and integrates them into one user dashboard. With single sign-on capability, system administrators have the power to monitor, interact with, and control security solutions including Endpoint Security, Email Security, Privileged Access Management, Deception Technology, and Zero Trust Networking.
URL: www.revbits.com

Picsello (Photography CRM)

Project Overview: Help you reduce the overwhelm of running your photography business with our software, support, and education. More than just your all-in-one photography business software.

URL: <https://www.picsello.com/>

QliqSOFT (Quincy Digital engagement platform)

Project Overview: With QliqSOFT's Quincy Digital engagement platform, you can now proactively reach patients with a personalized digital outreach. Using a chat-like experience, Quincy truly engages patients the way they prefer. And it does not require an app or login.

URL: <https://www.qliqsoft.com/>

Tudo (Service App)

Project Overview: Tudo is an On-Demand Service App offering 200+ services in 3 major categories providing highly rated professionals on demand. The best service delivery app brings everything you need with just a tap.

Website: <https://www.tudo.app/>

Apple Store:

https://apps.apple.com/us/app/tudo/id1572085278?ign-itscg=30200&ign-itsct=apps_box_badge

App Store: https://play.google.com/store/apps/details?id=app.tudo&pcampaignid=web_share

Clinta (Healthcare Solutions)

Project Overview: ClinTa is an advanced platform that offers comprehensive health and business records, along with specialized tools for healthcare professionals across various settings, including hospitals, clinics, labs, and pharmacies.

URL: <https://www.clinta.biz/>

HealthDesk (AI Chatbot and Gym CRM)

Project Overview: Automated Communication Platform. It is an Ai Assistant and Support as a Service platform, to streamline lead and member communication.

URL: <https://healthdesk.ai/>

Stitch (Healthcare Coordination Platform)

Project Overview: Stitch is a care coordination platform for healthcare teams. Send messages, share files, and stay in sync on any device.

URL: <https://teamstitch.com/>

ShuftiPro (Identity Verification Platform)

Project Overview: Shufti Pro's global trust platform. Award-winning IDV solutions for highly configurable, fast, and accurate verification, screening, and monitoring.

URL: <https://shuftipro.com/>

Homepie (Online Real Estate Platform)

Project Overview: Homepie is an online property-selling site that allows users to list their homes and get customers directly without dealing with a third-party agent.

URL: <https://homepie.com/>

SmartTrainer (Smart Trainer LMS)

Project Overview: Smart Trainer LMS is a powerful online e-learning platform to train and evaluate your entire organization.

URL: <https://www.smarttrainerlms.com/>

EDUCATION

Bachelor of Science in Software Engineering

COMSATS University, 2010 – 2014

LANGUAGES:

English (Fluent)

Hindi (Conversational)

Urdu (Native)
