Professional Summary

- **7 years** of experience as a Software Developer, specializing in building scalable, performance-driven, and user-centric web applications, with expertise in both frontend and backend integration. Proficient in all stages of the **Software Development Life Cycle (SDLC)**, from planning and design to deployment and maintenance, ensuring high-quality and efficient solutions.
 - **Proficient in ReactJS, AngularJS and TypeScript:** Skilled in developing dynamic and responsive user interfaces with modern JavaScript frameworks and libraries, ensuring smooth and efficient user experiences. Expertise in TypeScript allows for enhanced type safety and better code quality.
 - **Expert in MERN and MEAN stack development:** Experienced in building full-stack web applications using the **MERN** (MongoDB, Express, React, Node.js) and **MEAN** (MongoDB, Express, Angular, Node.js) stacks, with a strong focus on developing dynamic, scalable, and efficient applications through seamless integration of frontend and backend technologies.
 - **Designing and developing RESTful APIs:** Expertise in building fast and efficient **RESTful APIs** using **FastAPI** and **Flask** in **Python**, ensuring high-performance backends. Proficient in creating APIs with **Express** and **Node.js**, applying best practices for scalability, security, and performance optimization.
 - **Database management:** Experienced in working with **Oracle, MS SQL Server, MySQL, PostgreSQL**, and **Mongo DB** including data modeling, database design, and optimization for performance and scalability. Skilled in managing large datasets and implementing efficient database queries and transactions.
 - **State management with Redux and NgRx (for Angular):** Adept at handling application state in React applications using Redux, ensuring predictable and centralized state management for large-scale projects. Additionally, I am experienced in using **NgRx** for state management in Angular applications, implementing reactive patterns and managing complex state in a scalable way.
 - **Integration of third-party services:** Expertise in integrating APIs and external services into applications, including payment gateways, social media APIs, and cloud services, to enhance app functionality.
 - **Cloud deployment:** Experienced in deploying applications on **AWS** and **Azure**, leveraging cloud platforms to ensure scalability, high availability, and cost-efficiency. Proficient in configuring cloud services, managing environments, and optimizing application deployments for enhanced performance.
 - **Agile development experience:** Strong background in working in **agile environments**, collaborating with cross-functional teams to iterate and deliver software solutions on time and in line with client requirements.
 - **Collaborative teamwork:** Skilled in working closely with product managers, designers, QA engineers, and other stakeholders to deliver high-quality, well-tested solutions that meet business objectives.
 - Experience applying the latest development approaches including MVC framework in the browser, event-driven applications using **AJAX, Object Oriented (OO) JavaScript, JSON** and **XML**. Experience working with JavaScript MVC frameworks Angular JS.
 - **Excellent team player** with the ability to work independently, strong interpersonal communication skills, troubleshooting and debugging expertise, and strong analytical problem-solving skills to deliver technology products and consulting solutions.
-

Technical Skills

- **Front-End:** ReactJS, AngularJS, NextJS, VueJS, TypeScript, Fluent UI, Material UI, Tailwind CSS, Bootstrap, HTML5, CSS3, Webpack, Redux
- **Back-End:** NodeJS, ExpressJS, REST API, GraphQL, Python, Django, Flask, FastAPI
- **Testing Tools:** JEST, React Testing Library, Jasmine
- **Database Systems:** MongoDB, MySQL, Oracle Database, PostgreSQL, Microsoft SQL Server
- **Cloud Services:** AWS (EC2, S3, Amplify, CloudFront, DynamoDb, IAM)
- **Version Control/DevOps:** Git, Docker, Azure DevOps
- **Other:** Agile Methodologies

Education

- **AEC-Information Technology Programmer Analyst** **2020 - 2021**
LaSalle College, Montreal
Subjects: Object Oriented Programming, Scripting Languages, Application & Web Development.
- **Bachelor of Engineering, Information Technology** **2015 - 2019**
LDRP Institute of Technology & Research, Gandhinagar, Gujarat, India
Subjects: Data Structure and Algorithms, Artificial Intelligence, Database System, Computer Science.

Professional Experience

Software Developer, LexisNexis Inc, Toronto, Canada.

Feb 2022 - Present

Company website: [LexisNexis](https://www.lexisnexis.com)

1. **Lexis Create:** Microsoft Word Add-In built with Angular, React and OfficeJS Using a Micro Frontend Architecture
 - Developed and maintained multiple **micro-frontend** applications using **Angular, React, TypeScript, Redux,** and **Python**, working on both frontend and backend development. Collaborated closely with backend developers and cross-functional teams to ensure seamless integration, optimal performance, and alignment with project goals.
 - Led code quality initiatives by implementing Husky in front-end code repositories, fostering a culture of clean, efficient, and maintainable coding practices across the team.
 - Styled applications using **Fluent UI**, ensuring visual consistency, improved user experience, and adherence to design standards through effective coordination with designers.
 - Developed and exposed backend APIs using **Python Fast API**, ensuring smooth data flow and efficient communication between frontend and backend.
 - Championed the adoption of **Redux**, introducing it from scratch and mentoring team members on transitioning to a Redux-based state management system, resulting in streamlined and scalable state handling.
 - Managed **micro-frontend** builds on **AWS S3 buckets**, utilizing **EC2** for backend hosting and ensuring effective deployment and version control.
 - Demonstrated leadership in architecting and delivering large-scale enterprise web applications, guiding intern developers, conducting code reviews, and facilitating knowledge-sharing sessions to ensure high-quality deliverables.
2. **Admin Portal:** Web Application built with MongoDB, Express, Angular/NgRx and Node.js (**MEAN** stack).
 - Designed the front-end using **Angular, TypeScript,** and **Material UI**, aligning with business requirements and collaborating with stakeholders for design approval.
 - Implemented Angular features such as API integrations, state management with **NgRx**, and reactive programming. Optimized performance using **lazy loading, code splitting,** and **local storage**.
 - Styled the UI with **Material UI**, ensuring responsiveness across devices and addressing QA feedback for design improvements.
 - Leveraged HTML5 features like **local storage**, new input attributes, and **ES6** to enhance functionality and improve user experience.
 - Worked with AngularJS **directives, components, filters** and **services** to customize controllers.
 - Used **AJAX** and **JSON** for asynchronous HTTP requests, ensuring efficient data communication between the client and server.
 - Developed **RESTful APIs** with **Node.js** and **Express**, managing routing, middleware, cookies, and sessions to ensure secure communication.
 - Designed **MongoDB** schemas for CRUD operations and built data access services to interface with the database.
 - Used **Jasmine**, to test cases of AngularJS code and interacted with the QA team to fix issues.

- Involved in daily stand-up meetings and coordinated with the QA team, used **Agile** methodologies for software development.

3. **Lexis Connect:** Web Application built with React, TypeScript and Fluent UI

- **Integrated** acquired the company's **React components** into the existing front-end application, utilizing **TypeScript** and **Fluent UI**, ensuring seamless compatibility with the new system and enhancing user interface consistency.
- **Refactored and adapted Storybook components** from the acquired company's repository to fit the current React-based architecture, while ensuring code quality and maintaining best practices for UI development.
- Collaborated with design and development teams to ensure the **Fluent UI** components were implemented in alignment with the branding and UI guidelines of the new merged platform.
- Implemented and tested the front-end components to ensure they function properly within the new **SaaS-based** ecosystem, streamlining user interactions and improving the overall user experience for the platform.

Web Developer, Monlove, Montreal, Canada.

April 2021 - Feb 2022

Company website: *MonLove*

- Constructed various websites using React and Materialize UI framework while ensuring cross-browser compatibility and significantly reducing page load speed.
- Analyzed business requirements to translate functional requirements into technical specifications and developed web applications using **MongoDB, Express, React.js/Redux**, and **Node.js (MERN stack)**.
- Constructed websites using **React** and **Materialize UI** framework, ensuring **cross-browser compatibility** and significantly reducing page load times.
- Used HTML5, CSS3, and JavaScript to build interactive user interfaces (UI) and created responsive web pages with React and bootstrap frameworks.
- Developed a **full-stack web application** for online event ticket purchasing, using open-source frameworks like **GraphQL** for efficient data queries and **Tailwind CSS** for responsive design.
- Worked with lifecycle **methods, state, props**, and **events** in React to create interactive and stateful components and implemented routing using **React Router**.
- Created function-based components, added necessary event listeners, and implemented **communication strategies** between React components.
- Designed rich-featured **action creators** and corresponding **reducers** for state management with **Redux**, enabling efficient data flow and UI updates.
- Used **Axios** in React to call web APIs, fetch data from the backend, and update the states in the **Redux** store.
- Involved in design and development of **RESTful APIs** and services to interact with data storage layer.
- Interfaced with **REST APIs**, leveraging **MongoDB** for data storage and dynamic content generation, designing schemas and building data access services to communicate with the database.
- Used **Node.js** and **Express** to build server-side logic and applied middleware to handle HTTP requests efficiently.
- Built reusable React components and functions to enhance the development process and ensure scalability for future pages.
- **Applied JWT middleware** for backend authentication and implemented secure user login and authorization mechanisms to ensure safe access to protected resources.
- **Worked in Test-Driven Development (TDD)**, utilizing the **Jest** framework for both component-level testing and broader application testing to ensure high code quality and reliability.
- Utilized **GIT** for version control, **Webpack** as a module bundler, and **Azure DevOps** for bug tracking and continuous integration and deployment.
- Actively participated in **daily scrum meetings** and contributed to multiple phases of the project development using **Agile methodology**.

- Built an **e-commerce portal** using **WordPress** and **React**, and developed an instructional website with the **React framework**.

Full-stack Developer, Innoventaa Technology, India

Jan 2017 - Dec 2019

- Completed training as a Full-stack Developer with additional focus on database management, collaborating with teams to identify the best software development processes and align with customer needs.
- Developed **dynamic and responsive web applications** by combining **AngularJS** for the front end and **Flask** for the back end, leveraging **RESTful APIs** to ensure smooth communication between components.
- Actively participated in **brainstorming sessions** with development teams and product managers to develop innovative software solutions.
- Created **Flask views and templates** using **Jinja templating engine**, ensuring user-friendly and accessible web interfaces for a seamless interaction experience.
- Gained hands-on experience in **Amazon EC2**, setting up instances, configuring **Virtual Private Clouds (VPCs)**, and managing security groups to ensure secure deployment of applications.
- Applied **MVC architecture** using **Flask**, ensuring a clean separation of concerns between logic, data, and presentation layers for maintainable code structure.
- Developed **Python scripts** for **database content updates** and file manipulation, ensuring efficient data processing and seamless integration with the front-end.
- Designed and implemented **complex SQL Views, Stored Procedures, Functions, and Triggers** to optimize data manipulation and maintain data consistency across platforms.
- Reviewed and optimized Python code, running troubleshooting test cases to identify and resolve issues, ensuring a smooth user experience.
- Utilized Python packages like **cx_Oracle**, **pyodbc**, and **MySQLdb** to integrate with **Oracle, SQL Server, and MySQL** databases.
- Followed **Test-Driven Development (TDD)** practices, writing unit tests using **Flask's testing tools** to ensure application reliability and bug-free functionality.
- Managed **SQL and NoSQL databases** such as **MongoDB**, ensuring data integrity, efficient access, and high availability.
