

Harika C

Java Full Stack Developer

Email ID: harikac887@gmail.com

Phone no.: 201-379-3668

PROFESSIONAL SUMMARY

- Results-driven **Java Full Stack Developer** with **6+ years** of experience in designing, developing, and deploying scalable and secure enterprise applications using **Java, Spring Boot, Microservices, AWS**, and modern front-end frameworks like **ReactJS** and **Angular**.
- Hands on experience in building applications using Java Frameworks like **Spring, Hibernate and JPA**.
- Strong experience on **Spring Frameworks** including Spring MVC, Spring Boot, Spring Security, Spring Webflow, Spring Eureka, Spring Cloud, Spring Batch and Spring Data.
- Experience in Spring Boot and other Java frameworks/libraries and **Cloud API development**.
- Extensive experience in **Hibernate** and in using Hibernate Connection Pooling, HQL, Collections, Hibernate Caching, Hibernate Transactions, and Optimistic.
- Proven expertise in building RESTful APIs, securing applications with **OAuth 2.0 and JWT**, and deploying on **cloud environments (AWS)**.
- Good experience with **AWS Cloud platform** and its features like EC2, VPC, EBS, Redshift, , IAM, S3, AMI, Lambda, SNS, RDS, CloudWatch, CloudTrail, CloudFormation, Auto scaling, CloudFront, Security Groups, and Route53.
- Experienced in **CI/CD automation, Kafka**-based event-driven systems, and containerized microservices using **Docker** and **ECS**.
- Skilled in using **Jenkins** for continuous integration and continuous deployment (CI/CD).
- Hands on experience with build tools like **Maven**. Skilled in Source Code Management with **GIT, GitHub, SVN, and Bitbucket**, managing repositories, branches, versioning, and tagging efficiently.
- Proficient in PL/SQL development, with experience in **SQL Server, Oracle, PostgreSQL, DB2, and MongoDB**.
- Expert in various Agile Project Management Tools (**JIRA**).
- Good expertise with **Junit and Mockito** for unit/integration testing of application components.

TECHNICAL SKILLS

Languages	Java 17/11/8, JavaScript, Typescript, XML, Shell, GraphQL
Frameworks	Spring (Boot, MVC, Security, Cloud, Batch, Data), Hibernate, JPA
Cloud Platforms	Amazon Web Services (AWS)
Web Technologies	HTML5, CSS3, JavaScript, ReactJS, Angular 15/13/11/9/7/5, Bootstrap, jQuery, AJAX, JSON
Build/CI-CD Tools	Maven, Ant, Jenkins, GitHub Actions
Messaging Systems	Apache Kafka, RabbitMQ, IBM MQ, ActiveMQ
Databases	Oracle, PostgreSQL, MySQL, SQL Server, MongoDB
Version Control	Git, GitHub, Bitbucket, SVN
Testing Tools	JUnit, Mockito
IDEs	IntelliJ, Eclipse, Spring Tool Suite (STS), NetBeans
Methodologies	Agile (Scrum, Kanban, XP), TDD, Waterfall
Other Tools	JIRA, Docker, Tomcat, WebLogic

PROFESSIONAL EXPERIENCE

Java Full Stack Developer

Umpqua Bank, Portland, OR

Jan 2024 – Present

Responsibilities:

- Designed and developed scalable **microservices using Spring Boot and Spring Cloud**, enabling modular architecture.
- Deployed services using **AWS Elastic Beanstalk, EC2**, and managed user access via IAM.
- Implemented **Kafka messaging** for inter-service communication and **Spring Batch** for flat file data processing.
- Developed **AWS Lambda functions** to automate S3 event processing.
- Designed and defined **RESTful APIs** using **AWS API Gateway** to expose Java-based microservices.
- Utilized **Spring Boot** extensively for creating microservices, improving modularity and simplifying deployment.
- Built responsive, user-friendly, and accessible front-end applications using **Angular 15**, HTML5, CSS3, and TypeScript.
- Designed, implemented, and optimized **Angular** components, directives, and services to ensure reusable and scalable UI elements.

- Implemented **OAuth 2.0** and **Spring Security** for securing REST APIs.
- Collaborated with ReactJS developers to integrate frontend and **GraphQL backend APIs** using Apollo Client.
- Implemented state management using **NgRx, RxJS, and Angular services** for handling complex UI interactions.
- Implemented **Spring Batch** framework to automate and streamline batch processing activities.
- Built **CI/CD pipelines** using Jenkins and GitHub Actions; handled deployments with **Maven and Tomcat**.
- Implemented hybrid data models by persisting structured and unstructured data using **PostgreSQL** and **MongoDB**.
- Containerized Java-based microservices using **Docker**, and deployed and orchestrated them on **AWS ECS**.
- Maintained unit tests with **JUnit** and followed **TDD** principles for test-first development.
- Used **CloudWatch** and **CloudTrail** for application performance monitoring and alerting.
- Utilized **Hibernate** with annotation-based mapping and caching strategies.
- Tracked tasks and bugs using **JIRA** in an Agile environment.
- Participated in daily stand-ups, sprint planning, and code reviews in an Agile/Scrum environment.

Environment: Java 17, Spring Boot, Spring Cloud, OAuth 2.0, Angular 15/13, JavaScript, Typescript, GraphQL, AWS (EC2, S3, Lambda, IAM, ECS), Kafka, Bootstrap, Ajax, PostgreSQL, MongoDB, JIRA, Jenkins, Git, Maven, Docker, Junit

Java Full Stack Developer

Morningstar Inc., New York, NY

Aug 2021 – Dec 2023

Responsibilities:

- Designed and developed **RESTful Microservices** using **Spring Boot**, deployed in **AWS Cloud**.
- Developed enterprise applications using **Java 11, Spring MVC, and Spring Boot** for back-end services.
- Built and deployed **microservices** architecture with Spring Boot, enabling modular releases and improved maintainability.
- Designed and developed the framework to consume the web services hosted in **Amazon EC2 instances**.
- Developed API for using **AWS Lambda** to manage the servers and to run the code in the AWS and with AWS services as event sources.
- Created **Lambda** Deployment function and configured it to receive events from **S3 buckets**.
- Configured AWS Identity Access Management (**IAM**) Group and Users for improved login authentication.
- Designed and implemented **batch processing workflows** using **Spring Batch** and secured **RESTful APIs** through **OAuth 2.0** authentication mechanisms.
- Utilized **Hibernate ORM** for efficient database interaction, implementing **caching** and **performance tuning** techniques to optimize data access.
- Provisioned and managed cloud infrastructure using **AWS services**, including **EC2, S3, VPC, and RDS**.
- Developed **event-driven microservices** using **Apache Kafka** for **asynchronous communication**.
- Created and maintained **CI/CD pipelines** with **Jenkins**, integrating automated **unit testing, builds, and deployments** into the development lifecycle.
- Developed and consumed both **SOAP** and **RESTful web services** within a **SOA** environment.
- Built reusable, responsive **Angular 9 components** and **Typescript** services, integrating them with **Java-based REST APIs** for full-stack functionality.
- Managed project builds and dependencies using **Maven**, and maintained **version control** through **Git**, following **Gitflow** branching strategies.
- Developed and executed **JUnit test cases** to validate application functionality and ensure high code quality.
- Utilized **JIRA** for **project tracking, bug tracking**, and sprint planning in an **Agile/Scrum** development environment.

Environment: Java 11/8, Spring MVC/Boot/Batch, OAuth 2.0, Hibernate, Angular 9/11, JavaScript, Typescript, AWS (EC2, S3, VPC, RDS), Kafka, Jenkins, HTML5, CSS3, JavaScript, jQuery, Bootstrap, MongoDB, Oracle, Maven, Git, JIRA, Agile.

Java Developer

Verkada Inc., San Mateo, CA

Feb 2019 – Jul 2021

Responsibilities:

- Participated in **all phases of the Software Development Life Cycle (SDLC)** including requirements gathering, system design, development, deployment, and application customization.
- Created request/response handlers using **Spring MVC Controllers** to manage client-server interactions.
- Built persistence layers using **Hibernate**, including POJO creation, annotation-based mapping, and transaction management.
- Developed and deployed Java Applications on **AWS**, built and maintained backend services using **Spring Boot**.
- Integrated **AWS services** (S3, DynamoDB) into Java applications using the **AWS SDK** for Java.
- Implemented **SOAP-based Web Services** using **JAX-WS** within a **Service-Oriented Architecture (SOA)**; transmitted large XML payloads over HTTP.

- Secured REST APIs by integrating **OAuth 2.0** for authentication and authorization.
- Routed and processed **JMS queue messages** using **WebSphere**, with route configurations and automated email notifications.
- Designed and developed dynamic UI components using **HTML5, CSS3, jQuery, Bootstrap**, and **Angular 5/7**, ensuring cross-browser compatibility and accessibility.
- Created and optimized complex **SQL queries, stored procedures, and triggers** in **Oracle database**.
- Implemented **CI/CD pipelines** using **Jenkins** and used **Maven** for build automation and managed deployments.
- Employed **Git** for version control, collaborating in a multi-developer environment.
- Conducted **unit testing and integration testing** using **JUnit**, with active participation in bug fixing and code reviews.
- Used **JIRA** to manage tasks, track bugs, and report QA issues during development and testing phases.

Environment: Java 8, J2EE, Spring Boot, Spring MVC, AWS, Hibernate, SOAP, REST, OAuth 2.0, JMS, WebSphere, Oracle, SQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap, Angular 5/7, XML, JSON, Tomcat, Maven, Jenkins, Git, JIRA, JUnit

EDUCATION

Bachelor of Technology in Computer Science, Adams Engineering College, India
