Phone No: 737-637-1892

Sr. System Engineer

SUMMARY

- ❖ An organized IT Professional with around 9+ Years of Managing Large Scale Enterprise Datacenters with core Skills revolving around Complete Linux (CentOS, RHEL, SUSE, Ubuntu) Installation, Configuration & Troubleshooting.
- ❖ Experienced in Installation of Operating Systems, Packages and Patches, adding peripherals, maintaining user accounts, System Security maintenance, backup/recovery, performance tuning, troubleshooting at various levels etc.
- ❖ Extensive experience with Kickstart in Red hat Linux, Jumpstart, Live Upgrade, Flash Install in Solaris, and Ignite in HP - UX.
- ❖ Expertise in implementation and maintenance of NFS, NIS, DNS, LDAP name services.
- ❖ Experience in installing DB2 software, creating instances, databases and configuration management on DB2 servers.
- ❖ Experience in DB2 Linux System/Application DBA skills including HADR, setting up cronjobs for monitoring disk space, memory utilization, watchdog etc.
- ❖ Expertise with maintaining and updating the domain controllers in Windows server 2003/2008/2012.
- ❖ Expertise in upgrading of ESXi 4.1 to ESXi 5.x and 6.x hosts, vCenter as well as upgrading 2000+ vm's from virtual machine hardware as part of a major enterprise upgrade.
- ❖ Extensive experience Computer Networks and System Administrator with a primary focus on Windows Server and VMware Administration. Experience with Data Center migration in virtualization infrastructure.
- ❖ Extensive experience in Windows 2000/2003/2008/R2/2012/2016/2019 Servers, Wintel Servers at single or multi domain platforms. Experience with Cloud based hosting solutions (AWS-EC2/S3, Azure, Google Cloud)
- ❖ In depth knowledge of server administration, networking and security, Datacenter migrations and consolidations, Storage administration, Computer Operations, Network Services, Desktop Services, System Development, Enterprise information management for end users.
- ❖ Handling and driving various Projects individually including Project Management from procurement & delivery.
- ❖ Experience in WINS, DNS, DHCP, Virtual Server Administration, and Patch Management on Microsoft Windows Servers.
- ❖ Experience in implementing and administering VMware vSphere, Permissions, HA settings, DRS settings, Cluster groups, Resource Pools, Host Profiles, Licensing, Templates, ThinApp, Data Stores, and Networking
- ❖ Experience with x86 / x64 Intel, HP, IBM & Dell hardware like rack-mounted servers, tower servers, desktop, laptop and other peripherals. Strong working experience on HP ProLiant and Dell PowerEdge servers.
- ❖ Patch updating, Patch deployment on all physical and virtual servers using WSUS/SCCM console/ services.
- ❖ Solving different user's related issue/ problems within SLA period. Design and implement disaster recovery solutions.
- ❖ Experience with server monitoring and management tools such as HP SIM, SCOM and Solar winds Orion.
- ❖ Proficient in daily Windows server administration, including system stability, integrity, and troubleshooting.
- ❖ Extensive experience with Virtualized environments and managing the configuration and deployment of enterprise level infrastructure services. Experience in iSCSI SAN, NAS, NFS storage and RAID 0, RAID 1, RAID 5 concepts.
- ❖ Installing, Configuring, and troubleshooting of Active directory services and Domain naming systems in windows environment.
- ❖ Experience in Active Directory, GPOs, DNS, DHCP, File & Print Server, IIS (Web Server), FTP, Terminal Server, RIS/WDS, RRAS, NAT, WSUS, Microsoft Clustering, Exchange Mail Server, and ISA Server
- ❖ Working Experience with Active Directory Components (AD Users and Computers, DNS, DHCP and WINS etc.)
- ❖ Installation and configuration of Microsoft Windows Vista, XP Wintel server, Professional, Windows 2003, 2008 and 2012 WintelServers.
- ❖ Migrate Virtual machines from VMWare vSphere to Azure Cloud using Azure Migration tool.
- ❖ Worked on V Sphere, vCloud Suite /vRealize suite - vRealize Operations Manager (vRops), Log Insight, vRealize Orchestration(vRO), and vRealize Automation (vRA/ vCAC), VMware Virtual SAN (vSAN).
- ❖ Experience in WINS, DNS, DHCP, Virtual Server Administration, and Patch Management on Microsoft Windows Servers. Extensively worked with Windows NT 2003/2008/2008R2/2012/2016/2019 server architecture and administered them successfully on HP/Compaq, Dell PowerEdge, IBM xSeries Hardware Platforms
- ❖ Expertise in installing, configuring, administering, and performance tuning Microsoft SQL Server 2000/2005/2008/2016 familiar with Database Creation, Database Security, Database Replication/ Migration, Database Performance Monitoring, User Management, Database Backup/Restoration, Import/Export of SQL Database, Transact SQL, SQL Query analyzer and profiler.

- ❖ Knowledge of Site Recovery Manager on disaster recovery and VCenter Operations Manager
- ❖ Familiar with Data Center/Server Farm environment like Server's deployment, Cabling & labeling maintaining AC cooling,
- ❖ Involved in day-to-day activities of remote maintenance / troubleshooting of Windows Server & VMWARE ESX servers in production / lab environment. Experience in migration of servers P2P, P2V and V2V by using VMware Converter.
- ❖ Specialized in secure infrastructure technologies such as Active Directory and domain services, identity and security, Azure cloud services, System Center, Hyper-V and client operating systems and server infrastructure.
- ❖ Experience in Cisco UCS /HP C7000 blades administration and troubleshooting, Writing PowerShell Scripts, vb and PowerCLI scripts.
- ❖ Experience in implementation of VMWARE ESXi 7.0/6.7/6.5/6.0/5.5/5.1/5.0, ESXi 4.1, ESX4.0, vSphere, VM virtual center, VMware Workstation. Expertise in administering File servers and Print servers
- ❖ Extensive knowledge in advance features of ESX VMOTION, SVMOTION, HA and DRS including Lab Manager and Orchestrator.
- ❖ Expertise with HP ProLiant Blades BL460C / BL620C Series, HP Blade C3000 Servers, Dell M1000 Blade Server, HP Blade enclosures, Dell Storage MD 3000i, 3600i series, HP ML/DL Series.
- ❖ Expertise in managing client accounts and the successful initiation, execution & delivery of Projects in VMware and Microsoft technologies. Administration & troubleshooting of Windows Technologies (AD, DNS, DHCP, WSUS, ISA etc.).
- ❖ Administration of Microsoft Windows Server 2003 | 2008 | 2008 R2 and 2012 R2 | 2016 | 2019 Active Directory Domain Services. DHCP migration from 2016 to 2019, using PowerShell automated certificate generation from internal CA.
- ❖ Installations, &configurations and troubleshooting, DNS, DHCP, Active directory, 2008R2, 2012, 2016, 2019 Server AD installation and administration. Knowledge and experience on scripting tools such as PowerShell, vCLI.
- ❖ Expertise in configuration and management of VMware vSphere vSwitches and vDS. Ability to implement VMware's Virtual Switch technology, port aggregation, NIC teaming, VLAN trunking and port groups
- ❖ Configured Azure web services, Cloud Management Gateway, Co-Management and Windows Autopilot using SCCM v1902.
- ❖ Responsible for Root Cause Analysis for server/Workstation configuration issues affecting multiple endpoints.
- ❖ Configuring and maintaining security updates for servers/workstations using WSUS/SCCM 2016 (SCCM v1902).
- ❖ Experience in networking concepts like DHCP, TCP/IP, IP Addressing, Networking Technologies and WLAN.
- ❖ Experience in installation and configuration of Apache 1.3.x, Tomcat, WebLogic 9, 10, and JBoss.
- ❖ Hands-on experience in diagnosing, troubleshooting various networking, hardware & Linux/ UNIX server's services issues and performing preventive maintenance.
- ❖ Experienced in writing / modifying shell scripts for process automation of systems, applications, backups etc.
- ❖ Experience in configuration and management of VMware vSphere vSwitches and vDS. Ability to implement VMware's Virtual Switch technology, port aggregation, NIC teaming, VLAN trunking and port groups

EDUCATION : Bachelor's in computer science from SRM Easwari Engineering College, Chennai, Tamil Nadu– 2014.

TECHNICAL SKILLS

Operating System	Windows Server NT 4.0/2000/2003/2008/R2/2012,2016,2019, WINTEL servers, Windows XP/Vista/ RHEL 5.x/6.x/7.x,8.x Ubuntu, Centos.
VMware	vSphere, VMware ESXI 3.5 and 4.1/4.0/5.0/5.1/5.5/6.0/6.5/7.0, VMware converter, VMware Update Manager, HA, DRS, DPM, vCenter Orchestrator (VCO) vCloud Automation, Hyper-V, Center (VCAC), VMware API, vMotion and SVMotion, Plate Spin power convert.
Server Hardware	Dell PowerEdge, HP, VNX, IBM Servers.
Networking Protocols	TCP/IP, WINS, DHCP, DNS, DDNS, SNMP, SMTP, Ethernet 10/100/1000, WAN/LAN Routing, Routers, Switches/Microsoft Active Directory, Group Policy Objects, DNS, SNMP, LDAP, DHCP.
Hardware:	Dell PowerEdge R610/620/710 Servers, Dell Rackmount Servers, Dell Power Vault NX3000 and NX3100 Servers, HP ProLiant DL320/360/380 G5/G6/G7 Servers, EMC VNX-5300, EMC VNXe3100, EMC Celera NS22, NIC and HBA cards, Printers, iSCSI/SATA Hard drives, Cisco Switches and routers, Dell and HP KVM device/switch.

Backup Software's	MS Office and MS Visio, Microsoft Exchange Server 2003,2007,2010,2013,2016 Altiris, SaaS, Symantec Ghost.
Applications	SQL Server 2019/2017/2016/2012/2008 R2/2008, MS-Access, My SQL.
Web Technologies & Tools	VNC, WebEx, ADMT, Remedy, IBM ISM MAXIMO, AD Snapshot Tool, Tivoli Backup Exec, ILO, Network Register and Blade Logic.
Microsoft Technologies	Active Directory /DNS/DHCP/WDS/WSUS/windows servers 2003, 2008, 2012, 2016, 2019/ SAN/ ISCSI SAN/ SCCM 2012

Professional Experience:

Client: Truist Bank, Irving, TX

Role: System Engineer (Windows & VMware)

Oct 2023 – Present

- ❖ Worked on EC2 instance upgrades/downgrades to scale up compute and memory resources to keep the service available.
- ❖ Updating the whole system with the latest software version and creating data backup for disaster recovery and maintaining data integrity by controlled user access through AWS application, continuous monitoring, and management of services.
- ❖ Used JIRA for creating bug tickets, storyboarding, pulling reports from dashboard, planning sprints. GIT for Version Control.
- ❖ Creating and managing Resource Pools and adding the VM's into Resource pools, Installing VM Tools into VM's and allocating for end user and setting up priorities on CPU, Memory (RAM) and other resources.
- ❖ Understanding and working knowledge of Microsoft Azure Cloud Compute, Azure Virtual Networks, Azure Active Directory.
- ❖ Design, implement and manage virtual networking within Azure and connect to on-premises environments, configure Express Route, Virtual Network, VPN Gateways, DNS and Load Balancers.
- ❖ Worked with Cisco UCS environment by creating service templates and service profiles for new blades introduced.
- ❖ Created virtual machine template with windows server 2012 R2 for the new environment and testing it currently for its performance and documentation.
- ❖ Working with Development and Test teams to create fully automated CI/CD Pipelines using AWS and Jenkins. Configuring dedicated VMkernel & multiple service Console for better performance.
- ❖ Constantly monitored that all 3 exchange-Servers that we used were up and running by sending mail from one server to another. Migrate and manage Virtual machines and ensure high availability of applications.
- ❖ Deployed VMware App Volumes and User Environment Management for faster application delivery, unified applications and user management to Horizon View Virtual desktops.
- ❖ Utilized Microsoft Azure to deploy VMs built MS Federation server, AD Domain controllers, DNS Server, on premise AD and Off premise Azure AD synchronized infrastructure.
- ❖ Performed troubleshooting on Cluster servers by upgrading firmware of NICs on cluster nodes, thereby stabilizing the cluster and preventing cluster failures. Worked VMware Data Center Virtualization and Microsoft Azure Cloud Computing.
- ❖ Implemented and Administered the Hyper-V. Running the scripts through PowerShell like creating users, patch updates etc.
- ❖ Creating new VM's or deploying VM from Template & adding/removing virtual hardware to VM's.
- ❖ Managing file server based on NAS for user home folder space and shared folder space.
- ❖ Coordination with SAN team for SAN components setup on Intel boxes e.g., HBA card, EMC, San Surfer, HDLM, VERITAS Storage Foundation.
- ❖ Managed and troubleshoot Windows file servers, Active Directory, WINS, DHCP, DNS, FTP, IIS & storage servers, SQL server 2005/2008/2012/2014/2017 and Exchange Servers, Service Manager, group policy. Constantly monitored that all 3 exchange-Servers that we used were up and running by sending mail from one server to another.
- ❖ Troubleshoot network issues between Distributed vSwitch, Layer 2 switches and resolved slow performance between SAN network and VM networks. Used AWS EC2 Instances Spinning up RHEL8 and Windows Server2019 EC2 Instances.
- ❖ Have set up QMM for migrating users, computers, OUs and groups. Installing and configuring Active directory certificate service (ADCS).
- ❖ In-depth knowledge of Active Directory and SCCM integration with Active Director.

- ❖ Used SCCM 2012/2010/1802/1806 extensively for package deployment. Worked on creating collections, Advertisement, Configuration Manager Console, Package definition, Distribution points and Reporting. Installed OS, patches and security policies through SCCM Admin Tools.
- ❖ Used VMware 5.5/6.0/6.5/6.7/7.0 vCenter to manage, maintain and setup Wintel Windows server 2012/2016/2019 virtual machines on a HP Blade System and NetApp Data Storage.
- ❖ Installing and configuring enterprise level software and worked on Google OS, Windows 7/10 OS
- ❖ Creating and managing Resource Pools and adding the VM's into Resource pools, Installing VM Tools into VM's and allocating for end user and setting up priorities on CPU, Memory (RAM) and other resources.
- ❖ Installation and Configuration of networks, router/switches configuration and wireless access point/router with security, TCP/IP, VPN, Content Filtering, Access Control Lists on router/switches, VLANs port mapping, naming etc., and routing IP address in both LAN/WAN and wireless networks.
- ❖ Troubleshooting and repairing Hardware, software and network related problems.
- ❖ Performing Daily server checklist of servers from all over the locations.
- ❖ Implement and Manage VMware vRealize Orchestrator (vRO), VMware vRealize Automation (vRA), vRealize Operations Manager (vROPS). Installation, configuration and Troubleshooting issues related to vSphere 5.1, 5.5, 6.0, 6.5, 6.7, 7.0.
- ❖ Installed Windows Server 2019/2016/2012/2012R2, 2008 in 24/7 Datacenter Production environment Initiated and maintained VMWare vSphere and utilized VCenter Server to manage virtual servers.
- ❖ Installed and Configured WIN, TCP/IP, DNS, DHCP, IIS and Terminal Services. Installation and configuration of Virtual machines in physical ESX server. Taking Remote logging by Using Citrix console, troubleshooting issues like RDP, server freeze, hang etc.,
- ❖ Configuration of LAN, WAN, Dialup connections at the remote locations. Setup of Wireless access points, Switches and routers. Administered the WSUS and WDS (Windows Deployment services)
- ❖ Worked VMware Data Center Virtualization and Microsoft Azure Cloud Computing. Managed Virtual Desktop preferably using VMware Horizon View.
- ❖ Migration work, p2v, v2v and also day to day VMWare troubleshooting, performance and fault management.
- ❖ FTP access list editing and installing on clients in Linux and wintel Windows.
- ❖ Install and configure samba file server on the RHEL8 AWS EC2 instances, as well as configuring file and print sharing on the Windows server2019 EC2 instances.
- ❖ Experienced with x86 / x64 Intel, HP, IBM Dell hardware like rack-mounted servers, tower servers, desktop, laptop and other peripherals.
- ❖ Managing Exchange 2003 servers and troubleshooting issues related to mail delivery, configuring MX records to enable and disable domain.

Client: T-Mobile, Dallas, TX

Role: VMware/Windows Engineer

Apr 2021 – Sep 2023

- ❖ Installation and configuration of Windows servers 2012, 2016,2019 Virtual Machines in the Esxi host clusters.
- ❖ Deploy VMware Operations Manager Suite for enterprise level monitoring, resource utilization and weekly and monthly reports. Worked with NSX on VMware.
- ❖ Implemented Azure cloud integrations of enterprise architecture using Active Directory, Azure Service Bus, Azure Storage, Hybrid Connection Manager, and Azure SQL server.
- ❖ Integrate vRealize Automation with vRealize Operations 6.1 including Endpoint Operations (Hyperic) and vRealize Insight (Log Insight) Configured the Storage areas in Raid combinations of 0,1,5,6,10.
- ❖ Configured VMware on clustered environment, Implemented Migration of Virtual Machines using VMotion, Storage VMotion.
- ❖ Experience on Host Profiles, Distributed Switch, DRS, VMotion, SV-Motion, Resource pools, permissions, Patches, Snapshots, Tools Upgrade, disk expansions, Templates, and many more...
- ❖ Building Windows 2012, 2016 and 2019 Servers, Office 365, IIS, Lync, and upgrading Windows on both physical and virtual machines.
- ❖ Worked with ILIT, PCI, Security. Experience in the V2V and P2V migration of Physical servers to VMware ESXi hosts
- ❖ Administering Windows 2008 & Active Directory and migrated to 2012,2016,2019 R2
- ❖ Collaborate with development and QA teams to maintain high-quality deployment. Managed 2012, 2016 and 2019 R2 servers in the Citrix Farm environment.
- ❖ Configured VMware HA, VMware DRS and Fault Tolerance in acquiring higher efficiency for VMware Virtual Infrastructure
- ❖ Configuration of non-Profit Data center with OS images using Windows XP/7/8.1/10, Centos, Fedora and Debian Linux, wired and wireless network configuration.

- ❖ Worked on VMware Update Manager for updating or patching for all the ESX hosts and Virtual Administered and maintained servers with Microsoft Deployment Toolkit (MDT), SCCM.
- ❖ Worked with Citrix end users and with application teams to install, improve or deploy updates to their applications installed in Citrix. Monitoring Hardware health/Availability status and event alarms for Incident.
- ❖ Build, and implement new Esxi hosts from the scratch and Performed migration of all the VMs from Esxi5.0 to 5.5 and 6.0 and 6.5 with zero downtime. Installing, Configuring & Trouble shooting of the new Esxi6.7, 6.5, 6.0 on Cisco UCS, HP, Dell servers.
- ❖ Co-ordinated with the network team to plan the structure of network to be used for the new ESXi hosts like number of NICs, vLANs, subnets etc.
- ❖ Administered Windows 2012/2016 Active Directory, SharePoint, Exchange, DNS, DHCP, WINS, LAN, WAN, TCP/IP and building new windows physical/virtual servers as per the requirement of the project.
- ❖ Configured Azure Cloud Infrastructure to take VM level backups using the ARM templates by creating groups and users using IAM and protect the VMs using Azure Backup vault. Knowledge on AWS Elasticsearch
- ❖ Configuring fault tolerance (FT) for critical VM's Configured and Managed VMware cluster with HA and DRS rules.
- ❖ Implemented SVCMM Microsoft System Center Configuration Manager R2 Cluster
- ❖ Deployed and updated services in n-tier architecture vCloud air environment.
- ❖ Created Azure VMs and Storage accounts. Created ACS and integrated with applications, service bus to manage partner's access to the APIs, managed storage in table and blob using explorer tools (IAAS)
- ❖ Implemented SRM on vSphere across multiple sites to provide Disaster recovery solution for VMware vSphere Environment and working with SAN and NAS team to replicate storage across multiple datacenters.
- ❖ Actively used BigFix to review computers for vulnerabilities, patch compliance, and other areas of concern.
- ❖ Involved in Conversion of physical machines to virtual machines (P2V migration) using VMware enterprise converter and Plate Spin. Worked with vRealize Orchestrator (VRO) to run the Work flow for VRA for VM's.
- ❖ Installing and administering the various virtualization components like vCenter, vSphere etc.
- ❖ Performed ESXi Hosts and Virtual Machine migrations between Development, Integration, and Production environments and across Datacenters.
- ❖ Created data store clusters and configured Storage vMotion as per requirements.
- ❖ Created Multiple subscriptions for various departments to Manage azure subscription consumption
- ❖ Providing and maintaining user access in VMware virtual Center, configuring mail alert for any failure in HA, DRS, CPU and memory. Configuration of different Port Groups Policies, applying security policy and Traffic Shaping.
- ❖ Virtual Machine (VM) Build Base OS Setup/Patching/Security Scans VNX storage system Implementation and administration in VMware environment. Performed Hot Cloning, Cold Cloning, Classic vMotion and Storage vMotion.
- ❖ Trouble shooting issues related to VMware ESXhost, VMware center, VMware update manager.
- ❖ Calculation of RPO and RTO to implement VMware SRM in the environment. Implementation of VMware VDP for data protection of Virtual Machines. Assisted with a team for maintenance of DFS and some of the member servers
- ❖ Configured and deployed Azure IaaS VMs and PaaS instances into secure Virtual Networks by configuring DNS settings, DHCP address blocks, Virtual Networks, Azure Network settings, security, and routing policies.

Client: Walmart, Nashville, TN

Role: VMware/ System Admin

Feb 2019 to Mar 2021

- ❖ Work on point release OS upgrade on RHEL 8.2 and RHEL 8.1 with different version as well as building and configuring RHEL8 servers.
- ❖ Experience with SAP Database, application and cluster builds in Physical and VMware environment.
- ❖ Manage Red Hat cluster on RHEL 5, 6 and 7 environments with ccs and pcs utility for SAP and open text environment.
- ❖ Security hardening and Monitoring of VM's & ESX servers (CPU, Memory, Disk, Network Utilization) for Security Compliance.
- ❖ Design and architecture review for VREALIZE installation based on VMware recommended best practices
- ❖ Install, configure and troubleshoot vSphere5.5/5.x, VUM, vCops, Hyperic Server, Syslog Collector and Dump Collector, VMware vRealize Orchestrator, Infrastructure Navigator, vRA, VDP, VCM and Capacity planning.
- ❖ Installing, configuring, administration of Windows 2003/08/12 servers, Active Directory Services, DNS DHCP, FTP, WSUS, IIS Web Server and SQL Database Server, System Management Servers (SMS) servers.
- ❖ Design and implement Active directory Services/DNS/DHCP/IIS in Windows 2003/2008/2012 Server environment.
- ❖ Investigated slowness of NetBackup clients and implemented multiplexing to speed up backup performance.
- ❖ Manage Windows Server functions, including file and folder management and access, network printing services, server performance monitoring, user access and administration, application and services management.

- ❖ Implementing and installing the VMware View (VDI), creating a base image (replica) for desktops with win 7 OS and spinning the number of required desktops for Users.
- ❖ Pushing the updates to the base image and rolling them to the existing desktops and also for the new desktops. Installation, configuration, and administration of Windows 7, 8, 10 & Professional Client OS.
- ❖ Experience in updating/upgrading ESX/ESXi servers, Virtual Center servers and windows virtual machines using VMware Update manager and manual upgrades.
- ❖ Conducted firmware updates on the Cisco UCS environment. Patches were deployed on a phased rollout based on Groups the Customers chose.
- ❖ Proactively maintained VMWare Horizon View platform, including notifying and working with necessary infrastructure support teams. Supported technical escalations and worked with different teams to identify technical solutions.
- ❖ Knowledge of Cisco UCS, Dell Blades, and HP servers, and Storage, as it relates to VMware vSphere (DRS, vMotion, and HA), Horizon View/Window Servers (Horizon View 5.x, Horizon View 6.x)/Window 2008 and 2012 Windows Servers (DHCP, DNS, Active Directory). Performing Snapshots, Cloning, Cold Migrations and Hot Migrations.
- ❖ Created PowerShell scripts to pull the patch data each month from the WID database to be documented for general user consumption. Use ITIL v4 standards to complete projects and tasks.
- ❖ PowerShell, Batch file scripting as it relates to Horizon View Administration Installation, customization, capacity management and maintaining vSphere ESX.
- ❖ Created and deployed of virtual machines from templates and creating snapshots, clones of virtual machines for future deployments Installing and Configuring VMware vSphere 5.1 servers on Cisco UCS chassis and HP ProLiant 250 blade servers.
- ❖ Providing timely tier-II/III support and resolved tickets related to hardware, software, printer servers and Server builds.
- ❖ Created Custom PowerShell scripts to automate the monthly Patch administration on the WSUS Servers.
- ❖ Installed and configured several servers (2008, 2012, 2012 Core, Hyper-V Core). Monitored and resolved all issues related to the Horizon View Environment (Including Windows Servers)
- ❖ Designed and implemented an SCCM 2007 environment that is used daily for software compliance, deploying software packages, and installing Microsoft updates. Work with network team to get the VMware internal network configured properly.
- ❖ Configuring virtual environments for VMware High Availability (HA), vMotion, NIC Teaming, Host Profiles, VLAN tagging and Distributed Resource Scheduler (DRS), Resource group to group the resources by Environment.
- ❖ Troubleshoot issues with VMware and document the VM mapping with the LUNs allocated from the array.
- ❖ Generating reports on SLA for all client locations in End user computing.
- ❖ Reports on pending incidents, tasks and follow up for closure. Moderate testing experience in Microsoft Hyper-V and Citrix XenServer.

Client: Accenture, India

Role: Windows Administrator

Aug 2016 to Sep 2018

- ❖ Installing, configuring, administering, and performance tuning Microsoft SQL Server 2008/2012 familiar with Database Creation, Database Security, Database Replication/ Migration, Database Performance Monitoring, User Management, Database Backup/Restoration, Import/Export of SQL Database, Microsoft SQL Clustering, SQL Query analyzer and profiler.
- ❖ Excellent understanding of SAN, NAS storage architecture. Responsible for Security Patch Management and Deployment to all clients using Microsoft WSUS.
- ❖ Administering DHCP Server-creation of reservation and under reservation options, configuring of router IP address.
- ❖ Troubleshoot hardware, software, and network related issues, provide quick resolution to problems, and participate in finding root causes of issues and may work on action items to prevent future occurrences.
- ❖ Responsible for infrastructure standards which will include OS standards, system configuration, high availability, and server virtualization offerings. Ensuring security and upgrades are applied and kept up to date on desktops and laptops.
- ❖ Configured Terminal Server to access to the servers using Remote Desktop Protocol (RDP)
- ❖ LAN Cabling, RJ-45 crimping, Labelling, Patch Panel, PC Junction boxes, Phone Switches and Rack set-up.
- ❖ Actively participated in migration from Windows 2003 to 2008/2012 server and application updates.
- ❖ Troubleshooting of file server system issues with remote servers via telnet and putty.
- ❖ Experienced with x86 / x64 Intel, HP, IBM & Dell hardware like rack-mounted servers, tower servers, desktop, laptop and other peripherals. Installation and configuration of virtual machines in physical ESXi server.
- ❖ Expertise in handling L3 level requests and project tasks involving various technologies e.g., windows server, active directory, patching tools. Experience with IIS and SQL Server 2003/2008/2012 and good knowledge of DNS.
- ❖ Responsible for Active directory, GPO, Domain users, Adminstrating users and groups and given appropriate permissions and privilege to access our LAN and Domain environment.

- ❖ Creating a backup job and also took backup of data center on daily, weekly and monthly basis. Setting up Permissions and giving VMware Access on VMware Boxes.
- ❖ Installation of ESX server version 4.0/4.1/5.0 & vSphere. Virtual center for ESXi server hosts. Migration of existing physical server to VMware ESXi server using VMware converter tool.
- ❖ Expertise in Creates and maintains customer loyalty by serving customers above and beyond their expectations.
- ❖ Responsible for Windows 2003/2008 R2/2012 server, DNS, and TCP/IP support.
- ❖ Analyze, log, track and complex software and hardware matters of significance pertaining to networking connectivity issues, printer, server, and application to meet business needs. Responsible for OS Support, patches and upgrades.
- ❖ Handled system administration of Windows server-side infrastructure (Windows 2008, 2012, Active Directory, Server Hardware etc.) and associated technologies DNS, DHCP, WINS and Group Policies
- ❖ Additionally, involved in internal maintenance of all systems, networking, and networking devices.
