Sr .NET Full Stack Developer

Professional Summary:

- **Around 8 years** of experience in **analysis, design, development**, and maintenance of high-performance applications using **.NET framework, .NET Core, C#, JavaScript, Angular**, and **AJAX**.
- Expertise in building **RESTful APIs, microservices**, and **cloud-native solutions** leveraging **ASP.NET Core, Blazor, Razor** and **Docker**.
- Proficient in **Entity Framework Core, SQL Server**, and **NoSQL databases** (MongoDB), with a strong focus on **database design, optimization, and data-driven architecture**.
- In-depth experience with **Azure** cloud services including **Azure DevOps, Azure App Service, Azure Functions**, and scalable cloud-based solutions.
- Extensive knowledge of **CI/CD pipelines, Git, TFS**, and **containerization** with **Docker**, enabling efficient development workflows and continuous delivery.
- Skilled in designing and implementing **microservices architecture, event-driven systems**, and **API gateways** to build robust, scalable applications.
- Strong expertise in **frontend technologies** such as **Angular, TypeScript, jQuery, HTML/CSS, JavaScript**, and **AJAX** for creating interactive and dynamic user experiences.
- Advanced understanding of **design patterns** (e.g., **Singleton, Factory, Repository**), **SOLID principles**, and implementing **Test-Driven Development (TDD)**.
- Well-versed in securing web applications with industry standards like **OAuth2, JWT**, and ensuring compliance with best practices for web security.
- Proven ability to lead teams, mentor junior developers, conduct **code reviews**, and implement **Agile methodologies** (Scrum, Agile, Kanban) to drive productivity and collaboration.
- Strong **problem-solving** skills, focused on optimizing application performance, ensuring high scalability, and resolving complex technical challenges.
- Hands-on experience with **legacy applications** built with **Windows Forms, ASP.NET, VB.NET**, and **VB6**, providing ongoing maintenance and support.
- Expertise in **SSIS (SQL Server Integration Services)** for ETL processes, **SSRS (SQL Server Reporting Services)** for report generation, and creating **RDLS (Report Definition Language)** and **RDLC (Report Definition Language Client-side)** packages for reporting and data visualization.
- Committed to continuous professional growth, staying up-to-date with emerging **.NET technologies** and industry best practices to provide innovative solutions.

Technical Skills:

Category	Skills
Language	C#, Vb6, JavaScript, TypeScript, HTML5, CSS3, SQL, T-SQL, VB.NET, jQuery, Phyton, C++
Framework and Libraries	NET Framework, .NET Core, ASP.NET Core, MVC, Windows forms, Angular, EF, ADO .NET, VB .NET
Front End Technologies	Angular JS, Angular, TypeScript, JavaScript, jQuery, HTML5, CSS3, AJAX, Bootstrap.

Backend Technologies	ASP.NET Core, Web API, MVC, Microservices, RESTful Services, Web Services, Windows Forms
Cloud Technologies	Azure (Azure App Services, Azure DevOps, Azure Functions)
Databases	SQL, Mongo DB, SQL Server Reporting Services (SSRS), SSIS
Version Control	GIT, TFS
CI/CD	Jenkins, TFS, CI/CD
Reporting and Data Visualization	SSRS, RDLC, RDL
Design and Architecture	Microservices, Event-driven Architecture, RESTful APIs, MVC, Design Patterns, SOLID Principles, TDD
Security	OAuth2, JWT, Authentication & Authorization techniques
Testing & Debugging	NUnit, MS Test, xUnit, Moq, Postman, Fiddler, Unit Testing, Integration Testing, Apache Load test
Tools and IDE	Visual Studio, Visual Studio Code, SQL Server Management Studio (SSMS), Azure Portal, Postman, Microsoft report builder
Others	Agile Methodologies (Scrum, Kanban), Jira, Confluence, Agile Project Management, TFS

Project Experience:

Client: Pennsylvania state department of Corrections

Nov 2023 - Present

Role: Sr .NET full stack developer

Responsibilities:

- **Migrated APIs and MVC applications** from .NET Framework to .NET Core, ensuring a seamless transition with enhanced performance and scalability.
- **Designed and developed components using C# .NET** in an n-tier architecture, applying Object-Oriented Programming (OOP) techniques like Inheritance and Interfaces.
- **Built responsive websites for smart devices** using Responsive Web Design (RWD), CSS3, HTML5, and the Bootstrap framework.
- **Integrated migrated applications with Angular**, ensuring seamless frontend-backend communication.
- **Upgraded legacy AngularJS applications** to Angular 17, improving UI performance and maintainability.
- **Developed new APIs using .NET Core** to support modern application requirements and enhance scalability.
- **Implemented new features into existing applications** via Service Requests (SRs), enhancing overall functionality.
- **Created and optimized reports with RDL, RDLC, SSIS, and SSRS**, supporting efficient data integration and visualization.
- **Maintained 5 production applications** as part of the core maintenance team, ensuring high availability and system stability.
- **Managed legacy applications written in VB6, VB .NET, and Windows Forms**, ensuring continued operation and support.
- **Resolved production bugs** quickly and efficiently, minimizing downtime and ensuring a smooth user experience.

- **Collaborated with BA and development teams** to analyze legacy applications, creating UML diagrams and use case models for improved understanding.
- **Analyzed and planned migration** of VB6 applications to .NET Core and Angular, ensuring smooth transitions and future scalability.
- **Developed machine learning models** to automate the extraction of text from scanned documents and prepopulate form fields.
- **Conducted integration and load testing** using JMeter, Postman, and Swagger to ensure application reliability and performance.
- **Developed unit tests using XUnit** to ensure code reliability and robustness throughout the development lifecycle.
- **Mentored and guided junior developers**, providing technical leadership and fostering skill development within the team.
- **Deployed code using Jenkins CI/CD pipelines**, automating integration and delivery processes for faster releases.
- **Optimized database performance** by writing efficient stored procedures (SPs), triggers, and cursors for improved database-side operations.
- **Developed applications using Agile methodology**, participating in daily scrums, and leveraging continuous integration practices to deliver high-quality software faster.
- **Created and hosted RESTful Services, Web services, and Web APIs**, utilizing different bindings for compatibility with various clients.
- **Hands-on experience in developing RESTful WCF Services and ASP.NET Web API .NET Core HTTP Services** for web applications.
- **Set up Windows Server to Microsoft Web Server (IIS)** in DEV and QA environments, ensuring smooth deployment and testing.
- **Worked across Development, Test, and Production environments in Cloud-Microsoft Azure**, leveraging Azure services like Storage, Web Roles, Media Services, and more.
- **Familiar with Azure architecture** and services such as Web Roles, Media Services, Service Bus, Mobile Services, Access Control Services, and HD Insight.
- **Developed core functionality using ASP.NET MVC Framework** based on Visual Basic (VB6) application, leveraging C#.NET Entity Framework.

Client : Sunlife

Jun 2023 – Nov 2023

Role: .NET and ETL Developer

Responsibilities:

- **Designed and developed applications using ASP.NET MVC**, Razor Syntax, Razor View Engine, and front-end technologies such as HTML, CSS, JQuery, and JavaScript.
- **Implemented AJAX calls** for UI interactions, utilizing JQuery to send data to Controller Actions and receiving the data as JSON for parsing and displaying on the UI.
- **Responsible for implementing client-side validations** using JQuery and JavaScript, ensuring data integrity and a smooth user experience.
- **Extensively involved in designing SSIS packages** to export data from flat file sources into SQL Server databases, ensuring seamless data flow.
- **Designed high-performance ETL (Extract, Transform, Load) packages** using SSIS for data warehousing solutions, enabling effective data integration and transformation.
- **Implemented Model-View-Controller (MVC) architecture**, allowing multiple developers to work on separate modules simultaneously, reducing project effort and time.
- **Leveraged Dependency Injection** in the MVC framework using NInject to inject objects into classes, promoting loose coupling and easier maintainability.
- **Developed frontend using AngularJS**, creating Single Page Applications (SPA) to enhance the user experience with faster page loads and dynamic content updates.

- **Worked with ADO.NET Entity Framework** for database association and CRUD operations, using LINQ to Entities and Lambda Expressions for efficient data querying and manipulation.
- **Hands-on experience developing RESTful WCF Services and ASP.NET Web API .NET Core HTTP services** for building scalable and maintainable web applications.
- **Used Data Transformation Services (DTS)** to import data from heterogeneous sources like Excel and Access into SQL Server, ensuring smooth data migration.
- **Proficient in installing, configuring, and troubleshooting IIS versions 5.1, 6.0, and 7**, ensuring smooth deployment and hosting of applications on Windows Servers.
- **Created custom ASP.NET MVC filters**, actions, and validations to enhance the functionality and flexibility of the web applications.
- **Used Entity framework and ADO.NET** extensively
- **Worked with LINQ to Entities, Lambda Expressions**, and Object-Oriented Design Patterns to ensure clean and efficient data access layers for applications

Client: Virtusense Technologies

Dec 2022 – Mar 2023

Role: AI and ML Intern

Responsibilities:

- **Developed new modules in RESTful HTTP APIs** using .NET 4.5 and integrated them seamlessly with MVC applications to support modern application requirements.
- **Expertise in AngularJS** by creating and managing controllers, directives, components, factories, services, routing, and events to enhance dynamic user interfaces and improve application scalability.
- **Proficient in DOM manipulation** using JavaScript, JQuery, and AngularJS, improving UI responsiveness and ensuring a smooth user experience across devices.
- **Created data snapshots** for sensor data, ensuring efficient storage, retrieval, and processing of time-sensitive data for analytics and monitoring purposes.
- **Trained custom OCR and YOLO models** on proprietary datasets, utilizing OCR for precise text extraction and YOLO for accurate object detection to process complex document images and improve automated workflows.

Client: Bradley University (OSF Hospitals)

Jan 2022 – May 2023.

Role: Graduate and research Assistance

Responsibilities:

- **Developed a hospital data website** using .NET 4.5, building RESTful HTTP Web APIs and integrating them with an MVC application to streamline hospital data management.
- **Implemented client-side validation and AJAX calls** using JavaScript and JQuery, ensuring seamless communication and enhanced user experience in the hospital data application.
- **Utilized Tableau and SSRS** for data visualization, creating insightful reports and dashboards to analyze and present hospital data efficiently.
- **Worked on resolving user bugs** in legacy applications, ensuring continuous improvement and user satisfaction.
- **Taught undergraduate and graduate students** in Software Engineering and Web Technologies, providing guidance and fostering academic growth in technical fields.
- **Performed data analysis and visualization** using Excel, Tableau, SSRS, and RDLC for the publication of the "Smart Education and E-Learning" book by Prof. Dr. Uskov, supporting research with clear data insights.

Client: IBM India PVT, Ltd

Oct 2018 – Nov 2021

Role: .Net Full stack developer

Responsibilities:

- **Involved in the complete Software Development Life Cycle (SDLC)** including Analysis, Design, Implementation, Testing, and Maintenance to ensure end-to-end application functionality.
- **Implemented AJAX calls** for UI interactions using JQuery to communicate with Controller Actions, retrieving data as JSON and parsing it onto the UI for seamless user experience.
- **Designed and developed applications** using ASP.NET MVC, Razor View Engine, and front-end technologies such as HTML, CSS, JQuery, and JavaScript.
- **Developed RESTful WCF Services and ASP.NET Web API .NET Core HTTP Services** to build scalable, robust web applications and support modern web services architecture.
- **Designed and developed Microservices** using .NET Core, ensuring high scalability and fault tolerance for mission-critical applications.
- **Extensive experience with HTML, JavaScript, .NET Core 2.0, JQuery, AngularJS (2/4/5), and TypeScript**, enhancing both the front-end and back-end capabilities of applications.
- **Developed login portals** using Angular 2, along with HTML5, CSS3, and TypeScript, ensuring secure and responsive user authentication.
- **Implemented client-side and server-side validations** using ASP.NET Validation Controls, JQuery, and AngularJS for enhanced input validation and user interaction.
- **Worked extensively with ASP.NET MVC and .NET Core** for application development, implementation, and ongoing maintenance to meet evolving business needs.
- **Developed and maintained web applications** for UBS, focusing on fund management, using C#, ASP.NET, Web Services, WCF, SQL Server 2016, Angular 4, and Ajax.
- **Created custom ASP.NET MVC filters, actions, and validations** to streamline application functionality and improve user experience.
- **Utilized ADO.NET Entity Framework** for CRUD operations and worked with LINQ to Entities, Lambda Expressions, and Object-Oriented Design Patterns for efficient data manipulation.
- **Created Software Requirement Specifications (SRS) and Test Cases**, employing Object-Oriented Analysis and Design using UML and Microsoft Visio 2017 for effective project planning.
- **Developed Web API controllers in ASP.NET MVC** for building and maintaining RESTful APIs, and consumed them client-side using Angular 6 for data binding and dynamic content rendering.
- **Deployed Applications** using CI/CD Jenkin Pipelines
- **Refactored legacy WinForms applications** by migrating to WPF/MVVM platforms, modernizing the UI and ensuring improved performance and maintainability.
- **Developed applications using WPF, C#, MVVM, XAML, and Entity Framework**, leveraging Visual Studio 2015/2017 for efficient development and version control.
- **Created custom control templates, data templates, and value converters** for WPF applications to enhance user interaction and visual appeal.
- **Designed and implemented WPF applications** using MVVM and Repository patterns, managing the application's structure from design through to completion.
- **Developed WPF controls** with .NET 4.5 to create visually appealing and user-friendly interfaces that engage users.
- **Worked with Agile methodology** by participating in daily scrums and utilizing continuous integration practices to ensure timely and high-quality software delivery.
- **Created and hosted RESTful Services, Web Services, and Web APIs**, utilizing different bindings to ensure compatibility with a variety of client types and devices.
- **Developed backend systems** using ASP.NET, C#, and SQL Server 2016, with stored procedures, EDMX as the conceptual model, and LINQ to Entities for efficient data binding and manipulation.
- **Designed the graphical user interface (GUI)** using Master Pages, HTML, JavaScript, and CSS, ensuring a visually engaging and functional user interface.

- **Implemented CRUD functionality** with Entity Framework in ASP.NET MVC, incorporating sorting, filtering, and paging for efficient data management.
- **Hosted and maintained applications on IIS**, ensuring stability, performance, and secure deployment across production environments.

Client: Electronics Corporation of India Limited

Jan 2018 - May 2018.

Role: Application Inter

Responsibilities:

- **Developed wireframes** using HTML, CSS, and Bootstrap to create visually appealing and responsive designs for various web applications.
- **Created reactive screens** using JavaScript and JQuery for an access system, ensuring a dynamic and responsive user interface.
- **Performed unit testing** of APIs using NUnit and Moq frameworks, ensuring the reliability and correctness of backend functionality.
- **Created Use Case and UML diagrams** using Microsoft Visio for visualizing system architecture and improving project planning and communication.
- **Designed and developed the login portal** using Angular 2, HTML5, CSS3, and TypeScript, ensuring secure authentication and an intuitive user experience.
- **Implemented server-side and client-side validations** using ASP.NET Validation Controls, JQuery, and AngularJS to improve data integrity and enhance the user interface.

Educational Details:

- **Master of Science in Computer Science**
Bradley University — GPA: 4.0, May 2023
- **Bachelor of Technology in Computer Science**
Jawaharlal Nehru Technological University Kakinada (JNTUK) — GPA: 8.2, 2018
