

Igor Guntsov

Front-End Developer

+1 (303) 717-7500 @ testroot512@gmail.com github.com/ID-G9088
Sarasota, FL

SUMMARY

I am a Front-End Developer with over 5 years of experience working with React, React Hooks, JavaScript (ES6), and HTML5/CSS3. Friendly, responsible, and possessing strong problem-solving skills and analytical thinking, I am capable of working efficiently both independently as a lead developer and collaboratively as part of a productive team. I have extensive experience working with international teams and am highly motivated to pursue self-development, improving my existing skills, and learning new ones.

EXPERIENCE

Lead Front-End Developer 02/2023 - Present
Innova Solutions, Inc. (formerly ACS Solutions) Remote, US

Overview: I have been working on multiple healthcare-related projects as the lead front-end developer. One of these projects is a web application for auditing, tracking, uploading, creating, and updating healthcare claims records that were denied for various reasons. Built from scratch medical code auditing software that will replace the company's paid subscription, saving tens of thousands of dollars every year. It will empower healthcare organizations to enhance accuracy, compliance, and financial performance.

Responsibilities:

- Built the front end part of the projects from scratch using React, handling both design and functionality. Participated in PoC development.

Used technologies: ReactJS, React Hooks, TansStack Query, ReactStrap, Vite, AWS services.

Front-End Developer 10/2021 - 09/2022
EPAM Systems (Project: Sonatype Inc.) Ukraine/Spain

Overview: The Sonatype platform empowers speed and security in open-source development. Its software (Nexus repository, repository firewall, lifecycle) blocks malicious components, stops vulnerabilities automatically, and releases cleared components. It gives organizations complete control over their SDLC for more confidence in every piece of open-source code, source code, and containerized code.

Responsibilities:

- Migrated existing code from AngularJS to React.
- Created new components according to UI designs using React Hooks.
- Optimized the application's data rendering and filtering performance.
- Wrote unit and integration tests, fixed discovered bugs, and updated Java functional tests.

Used technologies: React, Redux Toolkit, React Hooks, JS (ES6), React Testing Library, Ramda

Front-End Developer 04/2021 - 09/2021
WebZone Ukraine

Overview: a website for renting real estate.

Responsibilities:

- Created website layouts and new reusable components based on designer mockups using React.
- Refactored and enhanced existing application code.
- Added Redux state management to the project.
- Wrote tests and fixed bugs.

Used technologies: React, Redux, Redux Thunk, React Hooks, JS (ES6), JEST, RTL.

HTML Developer 08/2019 - 04/2021
Websites4U Ukraine

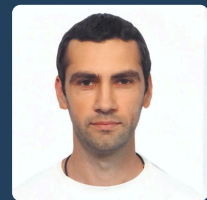

Project Overview:

Created responsive websites and landing pages.

Responsibilities:

- Developed responsive websites and landing pages according to mockups and client requirements, using best practices for HTML5 and CSS3.
- Debugged front-end code and ensured cross-platform compatibility, accessibility, and usability.

Used technologies: HTML5, CSS3, JS (ES6), SASS, GULP

EDUCATION

Master degree in Mathematics

Kyiv National Taras Shevchenko University
2007 - 2012 Kyiv, Ukraine

SKILLS

Front-End development

React · Redux · Redux Toolkit ·

TanStack Query (React Query) ·

React Hooks · JavaScript (ES6) · HTML5 ·

CSS3 · NPM · Git · SASS · BEM · Webpack ·

Vite · Gulp · Bootstrap · Ramda

Development

Agile development · Scrum · Kanban ·

Best development practices ·

Coding standards

Testing

Jest · React Testing Library · Jasmine ·

Enzyme
