Oracle Database Administrator leveraging 3+ years of expertise in architecting and optimizing mission-critical database environments supporting \$1M+ in business operations. Spearheaded implementation of Oracle 19c RAC infrastructure across 50+ databases, achieving 99.999% uptime and 40% performance improvement through advanced tuning methodologies. Expert in designing automated backup solutions and high-availability architectures using Data Guard, ASM, and RMAN, resulting in 65% reduction in recovery time objectives (RTO). Demonstrated success in managing complete database lifecycle, from capacity planning to performance optimization, while maintaining SOX compliance and zero security breaches. Collaborated with development teams to optimize database performance for 10,000+ concurrent users, directly contributing to 25% increase in customer satisfaction scores and \$1.5M in infrastructure savings.

PROFESSIONAL EXPERIENCE

AZTEC TECHNOLOGY SOLUTIONS INC.

Chicago, IL

Oracle Database Administrator

Nov. 2023 - Present

- Engineered automated backup validation framework monitoring 100+ daily backups across 50+ databases, achieving 99.99% backup success rate and reducing validation time by 70%
- Leveraged Oracle Enterprise Manager Cloud Control to monitor 200+ database metrics, establishing automated alerting thresholds that prevented 40+ potential outages and maintained 99.999% uptime for mission-critical systems
- Optimized Data Guard configurations achieving sub-second log shipping latency across 30+ databases; reduced failover time from 15 minutes to 2 minutes through Fast-Start Failover implementation and custom monitoring scripts
- Orchestrated quarterly patching strategy for 75+ databases with zero downtime, maintaining 100% security compliance; reduced patching window by 60% through parallel processing and automation
- Developed streamlined schema refresh process using Data Pump and custom masking scripts, supporting 300+ monthly refreshes with 99.9% success rate; reduced refresh time from 6 hours to 45 minutes
- Led primary on-call rotation for critical applications processing \$500M+ daily transactions; achieved 15-minute average response time and 30-minute MTTR for P1 incidents
- Spearheaded annual DR testing program achieving 100% success rate across 3 geographic locations; reduced RTO from 4 hours to 30 minutes through process optimization and automation
- Delivered 24/7 production support maintaining 99.99% uptime for systems supporting 50,000+ concurrent users; resolved 200+ critical incidents with average response time of 10 minutes

ELECTRONIC TRANSACTION CO.

Chicago, IL

Junior Oracle Database Administrator

JAN. 2022 - NOV. 2023

- Managed 25+ Oracle 11gR2/19c databases on Linux environments, achieving 99.99% uptime through proactive monitoring and maintenance strategies
- Reduced storage utilization by 40% through implementing Advanced Compression • Optimized database performance through AWR/ADDM analysis and SQL tuning, resulting in 60% reduction in response times and 45% decrease in CPU utilization; resolved critical bottlenecks affecting \$1M+ daily transactions
- Designed and implemented comprehensive Data Guard disaster recovery solution with 5-minute RPO/RTO SLAs across 3 geographic locations; maintained 100% successful failover rate during quarterly DR tests
- Established strategic partnership with Oracle Support, reducing P1 incident resolution time by 50% through streamlined escalation procedures and detailed root cause analysis documentation
- Engineered automated database refresh framework using Shell scripts, reducing refresh time from 8 hours to 45 minutes while ensuring data masking compliance; supported 200+ developers across 15 project teams
- Implemented multi-site Data Guard architecture with Real-Time Apply and Fast-Start Failover, achieving zero data loss protection and automatic failover capability within 30 seconds; maintained 99.999% synchronization rate
- Developed and executed comprehensive backup strategy using RMAN, reducing backup window by 65% while ensuring 100% successful recovery rate across 50+ critical restore operations
- Created automated monitoring framework using Shell/Python scripts for proactive health checks, reducing manual monitoring effort by 75% and preventing 30+ potential outages through early detection

EDUCATION

WESTERN GOVERNORS UNIVERSITY

Salt Lake City, UT

Bachelor's in information technology

ADDITIONAL SKILLS

Oracle Database Enterprise 12c, 19c, RAC, ASM, Data Guard, GoldenGate, Oracle Exadata Infrastructure Management, AWR, ADDM, SQL Tuning Advisor, SQL Plan Management, RAC, Data Guard, Fast-Start Failover, Oracle Streams, RMAN (Block-Level, Incremental, Merge), Data Pump, Flashback Technology, Oracle Cloud Infrastructure (OCI) Database Services, Oracle Enterprise Manager Cloud Control 13c/19c, Oracle Grid Control & ASM, Oracle SQL Developer, TOAD, PL/SQL Developer, Oracle Label Security & Advanced Security, Database Auditing & Access Control, Linux (RHEL, Oracle Linux), Solaris, Shell Scripting, Git, PL/SQL Programming & Optimization, Site Guard Implementation, Zero Data Loss Recovery Appliance (ZDLRA), Cross-Platform Database Migration
