Recent graduate of an intensive programming bootcamp, specializing in advanced web development with JavaScript/Node.js, React, Express, and PostgreSQL, as well as advanced Python development with Django and Docker. Actively seeking Front-end Developer opportunities to apply a strong passion for data, process optimization, and developing visually engaging front-end interfaces.

TECHNICAL SKILLS

Languages	JavaScript/NodeJS, HTML5, CSS3, Python, Git, SQL, Java, Bash, Matlab, C++, Lua
Libraries/Frameworks	React, Next.js, Flowbite, TailwindCSS, Angular, Bootstrap, Express, Axios, Django, PyQt5/6, pandas, BeautifulSoup4, Playwright, Numpy, Matplotlib
Tools/Platforms	PyEnv, VS Code, GitHub, MongoDB, PostgreSQL, MySQL, Docker, Jupyter Notebook

PROJECTS

AI Leads, Feb 2024 – github.com/Al-Insytes/ai-leads

- Finds potential leads with matching interests and uses AI to create personalized outreach emails.
- Constructed a user-friendly graphical interface using Python and PyQt6 to streamline user interaction.
- Designed and implemented a robust data storage system using JSON to efficiently manage information.
- Developed a web scraper using BeautifulSoup4 and Playwright to gather data from online sources.

Tea Explorer, Nov 2023 – github.com/Team-QUICM/Tea-Explorer

- Consolidates the complexity of finding new teas into one interactive website.
- Enhanced website engagement and user attraction through an interactive map powered by amChart.js.
- Created a dynamic calendar using tui.js to improve user organization and scheduling capabilities.
- Standardized CSS across the entire website to ensure a consistent and visually appealing look and feel.

ChaisBoard, March 2024 – github.com/CHAIS-Squad/ChaisBoard

- A simple and hassle-free whiteboard platform for developers to use during whiteboard interviews.
- Conceived and designed the tool, including its core functionality, user interface, and technology stack.
- Developed key features such as shape dragging and text box creation in the Konva.js framework.
- Provided technical leadership, coordinating with team members to ensure efficient code implementation.

Suite Spotter, Jan 2024 – github.com/Team-ADMIM/Suite-Spotter

- Helps users book flights, rent cars, hotels, and find recreational recommendations while planning trips.
- Built a robust backend server infrastructure with Express and integrated APIs using Axios.
- Designed and developed a functional and user-friendly frontend website using React and Bootstrap.
- Implemented authorization and authentication using Auth0 for secure user access.

EXPERIENCE

Data Handler at Magen

January 2020 – December 2021

- Safeguarded client privacy by proactively removing sensitive personal data from information brokering platforms.
- Implemented methods to boost task efficiency, including the company-wide introduction of MMO mice with programmable side buttons, resulting in up to a 50% increase in handling rate.
- Consistently outperformed expectations by a factor of three.
- Selected to coach new-hire data handlers and review fellow data handlers' work.

Math Tutor at Mathnasium

October 2017 – January 2019

- Provided personalized tutoring in Algebra, Trigonometry, Pre-Calculus, and Calculus to groups of 4-6 students, ranging from elementary school to college.
- Tutored students in preparation for the SAT and ACT, enhancing their test-taking strategies and subject proficiency.
- Adapted to a diverse range of educational needs in real-time to ensure effective learning outcomes.
- Coordinated with parents to ensure students achieved their academic goals.

EDUCATION

Courses taken towards a Bachelor of Science in Mathematics, 2018 – 2020

University of Washington

Associates Degree in Arts and Sciences, 2019

Bellevue College

CERTIFICATIONS

- Certificate in Advanced Software Development in Full-Stack JavaScript, Code Fellows, 2024
- Certificate in Advanced Software Development in Python, Code Fellows, 2024
