# Jeron Cole Lamotte

## Senior Software Engineer

4807 Wilderness Glen CT, Katy, TX 77449

(414) 263-9969

jersoncolelamotte@gmail.com

## SKILLS

**Languages:** Python, JavaScript, TypeScript, PHP, SQL, HTML5, CSS3

**Frontend:** React.js, Angular, Redux, jQuery, Bootstrap, Tailwind CSS, Material-UI, SASS

**Backend & APIs:** Django, Flask, FastAPI, Node.js, GraphQL, REST API, WebSockets, Express.js

**AI & LLMs:** OpenAI API (GPT-4), LangChain, Hugging Face Transformers, LLaMA 2, spaCy, NLTK, TensorFlow, PyTorch, AWS SageMaker, Pinecone, FAISS

**Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, Redis

**Cloud & DevOps:** AWS (Lambda, API Gateway, EC2, ECS, S3, RDS, DynamoDB, CloudFront, SNS, SageMaker), Microsoft Azure, Docker, Kubernetes, Terraform, Jenkins

**Testing & Automation:** PyTest, Cypress, Selenium, Jest, Enzyme, Mockito, Postman

**Architecture & Practices:** Microservices, Serverless Architecture, Event-Driven Systems, CI/CD, Agile/Scrum, OOP, TDD, DDD, Design Patterns, API-First Design

**Developer Tools:** Git, Webpack, Babel, ESLint, Prettier, VS Code

## SUMMARY

Innovative and results-driven Senior Software Engineer with **9+ years** of experience in full-stack development using Python, React.js, cloud solutions, and microservices architecture. Extensive experience in designing, building, and optimizing scalable web applications, RESTful APIs, and event-driven backend systems. Proven track record in leading teams, mentoring developers, and implementing DevOps best practices to enhance software development efficiency. Passionate about delivering high-quality, maintainable, and performant software solutions.

## EXPERIENCE

### Floor & Decor, Katy, TX – Senior Software Engineer

August 2022 – Present

- Developed a high-traffic, real-time product catalog using Django and FastAPI, supporting thousands of concurrent users and providing seamless browsing and search functionality.
- Migrated legacy backend services to AWS Lambda, API Gateway, and DynamoDB, cutting infrastructure costs by 18% and improving scalability.
- Built a real-time inventory management system using Redis and WebSockets, providing live updates to store associates, reducing order fulfillment errors by 15%.
- Integrated AI-powered semantic search and product recommendations using OpenAI's GPT-4 embeddings and Pinecone, boosting user engagement and increasing conversion rates by 12%.
- Developed a knowledge retrieval chatbot using LangChain and OpenAI GPT-4 to assist store associates with inventory lookups and product specs, reducing support requests by 22%.
- Created an LLM-powered internal tool to summarize product reviews and extract sentiment using Hugging Face Transformers and spaCy, streamlining customer feedback analysis.

- Automated customer support responses using a fine-tuned LLaMA 2 model deployed via AWS SageMaker, reducing average response time by 35%.
- Designed a serverless order processing system using AWS Lambda, reducing processing time by 25% while ensuring fault tolerance across multiple services.
- Integrated AWS S3 and CloudFront for image and asset delivery, reducing content load times by 30% across mobile and desktop platforms.
- Developed React.js frontend features for real-time order tracking and product recommendations, utilizing Redux and Tailwind CSS.
- Refactored monolithic applications into microservices, improving system maintainability and uptime by 13% during high traffic.
- Created automated testing suites for RESTful APIs using pytest and Cypress, increasing test coverage and reducing manual testing time by 40%.
- Mentored 3 junior developers, providing hands-on guidance in Python, AWS, and CI/CD practices, boosting team productivity by 18%.
- Built a document Q&A system using LangChain and FAISS for internal operational docs, enabling natural language queries and improving onboarding speed for new developers.

### **Sony Interactive Entertainment**, Katy, TX – *Senior Full Stack Engineer*

June 2020 – July 2022

- Built and maintained scalable Python microservices with Flask and FastAPI, supporting 5M+ concurrent gaming sessions with 99.9% uptime.
- Developed a real-time analytics dashboard using React.js, Redux, and Chart.js, reducing data processing time by 45%.
- Deployed containerized applications using Docker and Kubernetes on AWS ECS, optimizing infrastructure costs by 22%.
- Designed and optimized PostgreSQL and Redis queries, reducing database response times by 40%.
- Implemented OAuth 2.0 authentication with Django and AWS Cognito, increasing security compliance.
- Developed end-to-end testing suites with Cypress, Selenium, and pytest, reducing production defects by 50%.
- Integrated AWS S3 and CloudFront for optimized content delivery, reducing load times by 30%.
- Improved Agile development processes, increasing sprint completion rates by 20%.
- Collaborated with cross-functional teams to enhance gaming APIs, improving matchmaking latency by 28%.

### **\*instinctools**, Potomac, MD – *Full Stack Developer*

June 2016 – April 2020

- Developed an AI-powered data analytics platform using Django and Flask, integrating machine learning models to predict customer behavior and improving business insights by 11%.
- Built and optimized RESTful APIs with Django REST Framework, reducing response times by 15% and improving data retrieval speed for analytics queries.
- Implemented real-time data pipelines using Redis Pub/Sub and WebSockets to deliver live notifications, improving user engagement and response times by 40%.
- Managed AWS services like EC2, Elastic Beanstalk, and RDS to streamline infrastructure and reduce operational costs by 14%.
- Collaborated closely with the product team to design and implement a customizable dashboard for data visualization using Angular 2+ and Bootstrap, Highchart, Chart.js, and D3.js
- Automated unit and integration tests using pytest, improving test coverage and ensuring bug-free releases.
- Improved database indexing strategies with MongoDB and PostgreSQL, boosting query performance by 22% and reducing latency during heavy data loads.

- 
- Designed and implemented CI/CD pipelines with GitLab CI, streamlining deployment and reducing release time by 10%.

## EDUCATION

**Texas Tech University**, Lubbock, TX

August 2012 – May 2016

Bachelor's Degree in Computer Science

## CERTIFICATIONS

- Software Engineer (Advanced)
- Python (Advanced)
- Frontend Developer (React)
- SQL (Advanced)
- JavaScript (Intermediate)
- Problem-Solving (Intermediate)
