PROFESSIONAL SUMMARY

Experienced Senior Business Analyst with over 7 years of experience in cybersecurity, regulatory compliance, and business process improvement. Specializing in driving cross-functional collaboration, enterprise operation analysis, and security requirements research across large, complex environments. Demonstrated expertise in leading cybersecurity initiatives, regulatory reporting (Microsoft 365, etc.), and ensuring compliance with IT security standards and frameworks like Cybersecurity Institute Security Agency and National Institute of Standards Technology Cybersecurity Framework. Proven ability to analyze business processes, identify operational improvements, and provide actionable insights that drive informed decision-making. Experienced in working with senior leadership to deliver high-impact projects within highly regulated sectors, including federal government and defense. Professional with proven track record in managing diverse projects and delivering high-impact results. Known for excellent problem-solving skills and ability to work seamlessly with cross-functional teams. Reliable and adaptable, consistently aligning with evolving business needs while maintaining strong focus on achieving results.

WORK HISTORY

Sr. Strategic Management Analyst, 03/2024 - Current

Cybersecurity & Infrastructure Security Agency (CISA) / Chevo Consulting Company – Arlington, VA

- Lead strategic business enhancements by collaborating with clients to define cybersecurity and regulatory compliance goals and develop actionable roadmaps to ensure alignment with CISA/NIST standards
- Spearheaded continuous improvements of Standard Operating Procedures (SOPs), driving operational efficiencies, reducing errors by 25%, and ensuring compliance with both cybersecurity standards and regulatory requirements.
- Managed the CISA Action Task Tracker (CATT) program, overseeing 100+ tasks per month, ensuring 95% of deadlines were met, and compliance with IT security requirements across cross-functional teams
- Provided comprehensive cybersecurity and regulatory compliance advice to senior management, ensuring all projects aligned with internal security standards and external regulatory requirements.
- Utilized SharePoint and other project management tools to track progress, ensuring smooth task execution and proper documentation aligned with security requirements

- Evaluated current processes to develop improvement plans.
- Collaborated with cross-functional teams to identify opportunities for process improvement and increased productivity.
- Enhanced decision-making capabilities with thorough research, data analysis, and presentation of findings to stakeholders.

Sr. Business Analyst, 11/2023 - 03/2024

Pentagon (DOD) / Macalogic Consulting Company – Alexandria, VA

- Led evaluation, design, and implementation of business processes for the Air Force's Program and Budget Enterprise System (PBES), improving process efficiency by 30% and ensuring cybersecurity protocols were integrated into system design.
- Developed and implemented security requirements for the PBES project, ensuring compliance with the Department of Defense (DoD) cybersecurity regulations
- Managed cross-functional teams using Agile methodologies (Jira, Confluence) to deliver over 50 user stories, enhancing system security features and achieving a 98% client satisfaction rate.
- Provided Tier 2 & 3 service desk support, resolving technical issues for over 20 users per week and ensuring compliance with cybersecurity standards to minimize downtime and security risks.
- Facilitated requirement gathering workshops, resulting in clear project objectives and deliverables.
- Generated ad-hoc reports to evaluate specific business requirements.
- Collaborated with stakeholders to identify business needs and data sources.

Sr. Associate Cyber Consultant, 07/2021 - 11/2023

Cybersecurity & Infrastructure Security Agency (CISA) / Lafayette Group – Arlington, VA

- Coordinated and supported cybersecurity and regulatory compliance efforts for multiple projects, aligning with security requirements and ensuring that all initiatives met CISA/NIST and other relevant regulatory standards.
- Managed project tracking using tools like SharePoint and CATT, overseeing over 80 tasks per month and ensuring 95% on-time completion while maintaining adherence to security protocols.
- Developed comprehensive reports for senior leaders detailing progress on cybersecurity and regulatory compliance initiatives, supporting decision-making and identifying areas for operational improvements.
- Assisted in the delivery of cybersecurity training materials to internal teams, improving team understanding of key security and regulatory requirements.
- Monitored and frequently reported on project status to clients and verified projects met client requirements and quality standards.

- Collaborated with cross-functional teams to drive successful completion of complex projects within deadlines.
- Consistently maintained strong relationships with clients, ensuring clear communication and timely updates on project progress.
- Implemented process improvements that led to significant time savings and increased accuracy in deliverables.

Sr. Analyst, 07/2021 - 02/2022

Cybersecurity & Infrastructure Security Agency (CISA) / Vision Centric – Dulles, Virginia

- Managed supplier relationships and implemented Lean Manufacturing principles, ensuring that procurement processes adhered to IT security and compliance standards. Successfully supported over 30,000 government employees on the Microsoft SharePoint Server 2007 platform, managing daily monitoring, troubleshooting, and performance analysis to maintain system reliability.
- Acted as the technical liaison between business units, government employees, and the ServiceNow DevOps team, ensuring clear communication and support for technical initiatives.
- Created interactive platforms to enhance citizen engagement in regulatory and rulemaking processes, improving transparency and public participation.
- Supported application releases by validating end-to-end functionality, providing valuable findings and recommendations to developers and stakeholders.
- Evaluated and recommended improvements to automate solutions, enhancing efficiency, security, and process improvements across the organization.
- Assisted in identifying issues by developing and reviewing system audits, logs, and research processes, as well as conducting administrative tasks within ServiceNow and service desk software.
- Improved business productivity by optimizing dynamic responses and offering support to CISA leadership, SharePoint developers, content creators, and stakeholders.
- Strengthened business management policies by developing and enforcing user security protocols, such as account creation, password rules, and access control measures.
- Oversaw SharePoint support efforts, providing one-on-one and group training for SharePoint 2013 users and administrators, acting as the liaison between developers and business units.
- Ensured data accuracy by analyzing reports to prevent discrepancies, facilitating clear communication among business units during site configurations and supporting maintenance for web pages such as the CISA Exec Secretary main page and web applications, while adhering to Section 508 compliance standards.

- Enhanced technical support efforts by testing and resolving broken links within SharePoint using JavaScript, and keeping the team updated on Microsoft Teams Tracker project utilization.
- Managed critical service operations, ensuring seamless service delivery while meeting the diverse needs of business stakeholders.
- Utilized JavaScript and HTML5 for front-end portal development and back-end console enhancements, improving user interface and system functionality.

Sr. Buyer, 07/2020 - 07/2021

Gate Gourmet – Dulles, Virginia

- Managed supplier relationships and implemented Lean Manufacturing principles, ensuring that procurement processes adhered to IT security and compliance standards.
- Led process optimization initiatives that reduced procurement cycle time by 20% and ensured suppliers met regulatory requirements for security and operational standards.
- Collaborated with cross-functional teams to ensure that the company's procurement systems and processes were compliant with cybersecurity and regulatory standards.
- Managed a diverse portfolio of products, ensuring timely delivery and quality control.
- Played an instrumental role in major project launches by managing all aspects of procurement from planning to execution.
- Coordinated with finance teams on budgeting processes, providing accurate forecasts for product expenditures.
- Enhanced supplier performance through regular evaluations and performance improvement plans.

OPC Data Analyst, 06/2019 - 07/2020

Gate Group – Mclean, VA

- Led data analysis efforts focused on improving operational efficiency and ensuring compliance with IT security protocols.
- Developed reporting mechanisms that tracked key performance indicators (KPIs), identifying opportunities to streamline operations while maintaining cybersecurity compliance.
- Utilized data visualization tools to effectively communicate business insights.
- Streamlined reporting processes, resulting in faster turnaround times for monthly performance reports.
- Improved data governance practices, ensuring compliance with regulatory standards and internal policies.
- Enhanced business efficiency by identifying trends and patterns in complex datasets.
- Provided actionable insights through comprehensive reports and dashboards, supporting strategic initiatives.

- Integrated multiple sources of disparate data into cohesive datasets using ETL processes, improving overall analytic capabilities.

EDUCATION

Master of Science: Cyber Security Technology, 05/2015

University of Maryland

Bachelor of Science: Health Education, 05/2013

Jackson State University

TECHNICAL SKILLS AND TOOLS

- Cybersecurity & Compliance Tools: IAM, IT security frameworks, M365, NIST, CISA
- Business Analysis Tools: ServiceNow, SharePoint, HTML, Jira, Confluence
- Data Analysis & Reporting: Excel (Pivot Tables, VLOOKUP), Process Improvement, Data Documentation, SOPs
- Project Management: Agile, Scrum, Milestone Tracking
- Security & Risk Management: Security Policies, Risk Assessments, Control Implementation

SKILLS
