

JAHNAVI PALADI

jahnavip138@gmail.com | +1(813)5638872 | [LinkedIN](#)

Senior .Net Full Stack Developer

SUMMARY

- 8+ years of IT experience in **SDLC**: Requirement Gathering, Analysis, Design, Development, Testing, and Deployment.
- Expertise in **.NET Technologies**: .NET Core 2.1/3.0/8.0, ASP.NET, C#.NET, VB.NET, WPF, Windows, SPA (AngularJS, Angular2.2–16.0).
- Strong in **n-Tier & Distributed Architectures**: RESTful Web API, Node.js (Express), ASP.NET Core, WCF, Microservices, Docker, Kubernetes, AWS (EC2, RDS, S3, DynamoDB), Azure (IoT, APIM, AAD, OpenShift).
- Hands-on experience in **Azure DevOps** (CI/CD, NuGet, Resource Scaling), **TFS, Git, PowerShell, Python scripting**.
- Skilled in **SQL** (Oracle, MS SQL, T-SQL, PL/SQL, MDX) & **NoSQL** (Redis, RabbitMQ, Cosmos DB, MongoDB, CouchDB, HBase, Hive, Azure Table Storage).
- Proficient in **Object-Oriented Analysis and Design (OOAD)**, **OOP**, **Design Patterns** (MVC, MVVM, MVP, Singleton, Factory), **SOA**, and **Responsive Web Design**.
- Strong **Front-End Development**: Angular, ReactJS, RXJS, NGRX, ES6/ES5, **Bootstrap, Materialize CSS, Ionic Framework, PhoneGap**, Cross-browser compatibility.
- Expertise in **CSS Pre-processors**: COMPASS, SASS, SCSS, LESS, Media Queries.
- Experience in **Reporting & BI**: Power BI, SSRS, Telerik, Crystal Reports.
- Hands-on with **Mobile Development**: Xamarin, Ionic, Swift.
- Unit Testing expertise: **Karma, Mocha, Chai, Jasmine**
- Skilled in **Task Parallel Library (TPL), PLINQ, Parallelism, Concurrency**
- Experience in **TFS Branching/Merging, Cloud Deployments (Azure, AWS)**, and Agile environments.

TECHNICAL SKILLS

Programming Languages	C#, VB.NET, Typescript
Web Technologies	ASP.NET, MVC, Web API, WCF, HTML, CSS, jQuery, JavaScript, Angular JS, Angular 12/16, React JS, AJAX, Bootstrap
.NET Technologies	.NET Framework, ASP.NET Web API, ASP.Net Core, ASP.NET MVC, ADO.NET, WPF, Entity Framework, LINQ
Design Patterns	MVC, MVVM, Singleton, Factory, DI, SOA
Database Development	SQL Server, SSIS, SSRS T-SQL, MongoDB.
Software Methodologies	SDLC, Agile ,Docker
RAD/IDE	Visual Studio, Visual Basic, Visual Studio Code
Cloud	MS Azure, AWS ,kubernetes
Source Repositories	GitHub, TFS, Git
ORM	Entity Framework Core, Entity Framework
Modeling and Design Tools	Microsoft Vision, UML
Operating Systems	Windows, LINUX, UNIX
Testing	Postman, Soap UI, Fiddler, MS-Test, NUnit, Jasmine, xUnit
Bug tracking tools	JIRA, TFS

EDUCATION

Bachelor's in computer science engineering from JNTU in 2016

PROFESSIONAL EXPERIENCE

Centene Corporation, St Louis, MO

Senior Net Full Stack Developer | September 2023 – Present

Responsibilities:

- Gathered and analyzed requirements to provide optimized technical solutions for domain-specific challenges in Inferential within the healthcare sector.
- **Gathered and analyzed requirements** for domain-specific challenges in **Inferential healthcare solutions**.
- Set up the **Blazor.Net with ASP.NET Core** development environment.
- Developed **cloud-based solutions in Microsoft Azure (PaaS & IaaS)** for scalability.
- Built and maintained **Windows Forms applications** for **healthcare data processing, patient management, and compliance tracking**.
- Designed and implemented **Entity Framework Core with .NET 8.0** for efficient **relational database** interactions.
- Developed and deployed **MongoDB solutions** for **electronic health records (EHR) storage**
- Created **Azure Event Hubs using Telemetry Client (Application Insights)** for **logging and tracking** via **Power BI dashboards**.
- Designed and implemented **Azure CI/CD pipelines** for automated deployments.
- Built a **confidential tool** using **Angular 16.0, RXJS, and NGRX** for a **modular healthcare application**.
- Implemented **lazy loading in Angular** for better performance.
- Used **Dependency Injection with Unity** to enhance **code reusability and testability**.
- Managed **global development resources** to meet project deadlines.
- Developed **n-tier architecture for MSDA Inferential Model Monitoring**.
- Created **Single Page Applications (SPA) with Angular and TypeScript** for interactive dashboards.
- Configured **Azure cloud services** for **endpoint deployment** and automated builds using **Azure Pipelines (XAML scripts)**.
- Created **Python APIs** for **loading healthcare data from NoSQL (HBase, Hive, Redis Cache, RabbitMQ)** and **data manipulations using Pandas Data Frame**
- Implemented **unit & integration testing** using **xUnit and NUnit** for software reliability.
- Used **GIT for version control** across environments.
- Conducted **performance and impact analysis** for issue resolution and system efficiency.
- Developed **UI components** using **Plotly.js and Ignite UI for Angular** for **healthcare models (predictions, time series, metric summaries)**.
- Implemented **SQL database replication to Azure** for **high availability and disaster recovery**.
- Used **RXJS libraries, Observables, and Higher-Order Mapping** for **asynchronous callbacks**.
- Managed **routing via Router-Store and Resolver components**.
- Developed **modular applications** aligned with **baseline & target architecture** for scalability.
- Designed & deployed **charting visualizations (parity charts, pie charts, bubble charts)** using **Plotly.js** for real-time data.
- Deployed **.NET Core APIs in OpenShift Container Platform (OCP), Jenkins** for build strategy, and **Kubernetes-based containerization with Docker** for Windows.
- Configured **Azure API Management (APIM)** and **Azure Active Directory (AAD)** authentication using **OAuth 2.0 implicit flow** for secure healthcare data access.

Environment: .NET Core, C#, Angular 16.0, TypeScript, RXJS, NGRX Platform (Store, Effects, Router-Store, StoreDev tools), Plotly.JS, Python, REST API, Visual Studio Code, .NET 4.8 Framework, OpenShift, GIT Repository, Hive, HBase, Redis Cache, RabbitMQ, Microsoft SQL Server.

State of PA, Pittsburg, PA

.NET Full Stack Developer | April 2021 – August 2023

Responsibilities:

- Develop web-based dashboards using **ASP.NET MVC** for warehouse performance.
- Worked on creating Rest Services using **ASP.NET Web API** and C#.
- Worked with Microsoft Windows **Azure** includes a complete set of enterprise-ready data services, including Windows Azure Storage and SQL Databases
- Entity framework Code first technique used to create entities.
- Responsible for full stack development including database and application design, unit testing, code generation.
- Implemented **License Plate Read (LPR) functionality** using C#.NET. Which can help the guard to serve drivers effortlessly.
- Worked on **Azure Web Jobs & Azure functions** to perform asynchronous updates between our system and external APIs.
- Created multiple partial views to reuse in the entire application.
- Implemented Client-side validations using jQuery and **logic using C#.NET** server-side validations using ASP.Net MVC at controller level.
- Used **AJAX** calls for dynamic user interface update.
- Architected and implemented application with **C#, ASP.NET, jQuery, AJAX, HTML5, Angular 12.0** and **CSS3**
- Implemented in retrieving data using LINQ to Objects and LINQ to Entities
- Designed multiple master pages for consistency look and feel.
- Implemented role-based user menu after login.
- Implemented Remote Validation using unobtrusive **JavaScript** and **JSON**
- Conducting regular Code Reviews to give valuable design suggestions and actively involved in cross-team coordination to ensure code developed meets coding best practices guidelines, unit testing, security, and scalability and maintainability guidelines.
- Involved in **Database backup and disaster recovery procedures**.
- Designed dynamic client-side JavaScript codes to build web forms and simulate process for a web application, page navigation using Angular.
- Used **Angular** for directives used for validations for the input fields of the forms with the data existed in the database.
- Created backend RESTful Services using ASP .NET Web API and provided request responses in JSON and XML formats and implemented custom formatters.
- Used LINQ to SQL, LINQ to XML and LINQ to Objects for retrieving the data efficiently and Just in Time manner.
- Implemented WPF to create attractive and effective user Interface using XAML Document.

Environment: .NET Framework 4.5, C#, ASP.NET Web API, Web API, C#, Entity Framework 6.0, Angular, JavaScript, REST API, Visual Studio Code, GIT Repository, MS Azure, Microsoft SQL Server.

BNY Mellon, NYC, NY

.NET Developer |November 2019 – March 2021

Responsibilities:

- Developed GUI using **WPF Controls, Windows controls** in .NET, VS.NET, C# and **XAML**
- Implemented **Model-View-View Model (MVVM)** design pattern for the application.
- **Performance tuning** of complex stored procedures to reduce the response time of the application.
- Used **SAP Crystal Reports** for generating numerous reports from scratch.
- Used **Connected and Disconnected** Model Database access using **Data Reader** and **Dataset Object**
- Implemented client-side Interface using **React JS**. Build stable React components and stand-alone functions to be added to any future pages. Used React-Router to turn application into Single Page Application
- Used **LINQ** and **Lambda Expressions** for iterating through .NET collections.
- Used Microservice architecture, based services interacting through a combination of REST and leveraging **AWS** to build, test and deploy Identity Microservices.
- Developed custom Classes and Business Objects to serve as the **Model** object using **C#.NET/VB.NET**.

- Created **Complex Stored Procedures, Triggers, Views, CTE** for retrieving the data from the SQL Server database to fill the Business Objects
- Developed **Styles, Templates, Resource files, Triggers** using **Expression Blend**
- Responsible for bugs/ tickets for future enhancements and worked in Production support.
- Involved in complete application stack in Amazon Web Services (**AWS**) like **EC2, S3 Bucket**.
- Responsible for maintaining and expanding AWS (Cloud Services) S3 infrastructure using **AWS (SNS, SQS)**.
- Responsible for requirement gathering from the SMEs, Manager and Business Users
- Implemented n-tier architectural design– **Presentation Layer (GUI), Business Access Layer (BAL), Data Access Layer (DAL)** and **Service Layer**.
- Developed **Service Oriented Architecture (SOA)**.
- With the concept of **React Js** Worked on usage metrics and also end to end events tracing for analysis purpose.
- Extensively worked on the **WCF services** for retrieving the data
- Developed **User Controls** and **Custom Controls** Standard Library for the Client Control Repository
- Performed **n-Unit** testing for different modules in the application to ensure a bug-free code into Production.
- Containerized applications using **Docker**, creating Dockerfiles, managing Docker containers, and optimizing Docker images for deployment.
- Used **Docker Compose** for defining and running multi-container applications, ensuring smooth deployment across different environments.

Environment: .NET Framework, Visual Studio.NET, XAML, MVVM, C#.NET, VB.NET, n-Unit Test, Telerik Controls, TPL, WCF, LINQ, AWS, Javascript, React JS, Lambda Expressions, Team Foundation Server, SQL Server, Crystal Reports, Power Tools, Windows, Agile

United Airlines, Chicago, IL

.NET Developer | May 2017 – October 2019

Responsibilities:

- Developed Views using **Windows Form Controls, Telerik Tools, and AngularJS**.
- Developed custom Classes and Business Objects to serve as the Model object using **VB.NET**.
- Migrated all reports from legacy systems to **QNXT** and converted them to technical implementation.
- Implemented asynchronous calling mechanisms to isolate the **UI** processing from the backend database call processing.
- Used Enterprise Libraries (Application Blocks) and **ADO.NET** for connecting to the database.
- Utilized Connected and Disconnected Model Database access using Data Reader and Dataset Object.
- Employed **LINQ** and **Lambda** Expressions for iterating through collections in VB.NET.
- Extensively worked on **Web Services** and **WCF** services for retrieving the data.
- Developed User Controls Standard Library for the Client Control Repository.
- Created Complex Stored Procedures for retrieving data from the **SQL Server** database to fill the Business Objects.
- Responsible for requirement gathering from End-Users and Business Analysts to develop applications and modify existing code.
- Used **VB.NET CSLA** framework for building business rules validations and roles in the application.
- Coded in the Presentation Layer, Business Logic layer, and Data Access Layer of the application using **VB.NET**.
- Used **SSRS** for various Weekly/Bi-Weekly Reports.
- Analyzed the performance of the application using Diagnostics class and **ANTS** profiler.
- Integrated **AngularJS** for building dynamic and responsive web applications.
- Leveraged **Azure** cloud services for deployment, operation, and maintenance of applications.

Environment: .NET Framework, Visual Studio.NET, AngularJS, VB.NET, MVVM, Telerik Controls, Web Services, QNXT, LINQ, Lambda Expressions, ANTS Profiler, Team Foundation Server, SQL Server, SSRS, n-Unit Test, Power Tools, Windows, Agile (Scrum)

Virtusa, Hyderabad, India

Junior .NET Developer | November 2016 – April 2017

Responsibilities:

- Used **ADO.Net** technology extensively for data retrieving, querying, storage and manipulation interface screens developed using **ASP.Net**.
- Involved in writing Complex **SQL statements** and stored procedures using SQL Server.
- Designed and developed various abstract classes, interfaces, classes to construct the business logic using **C#**.
- Used **Ajax** for avoiding post back to the server. Responsible for implementing Stored Procedures for Data Retrieval and Updating.
- Involved in developing business logic layer and Data Access layer and written methods in **C#**, Visual Studio .Net
- Involved in creating services using WCF and consumed it in the web application.
- Worked in the Performance tuning at the Application and Database Layers.
- Using the **GIT** configuration for managing source code, clone project files, updating the branch and getting the latest code on the daily basis.

Environment: .NET Framework, ASP .NET, Visual Studio, ASP.NET MVC, MVC, Razor Views, Partial Views, Layouts, ADO.NET, SQL Server, AJAX, and SQL Server Management Studio.

CERTIFICATION

AWS certified developer Associate
