

Sr. Backend Engineer

Full-Stack Python Developer with 15+ years of experience designing scalable, secure back-end systems for finance, healthcare, and IT. Expertise in Python, Go, Java, Javascript, Node, and cloud infrastructure, with a strong background in distributed systems, microservices, and API design. Proficient in AWS, Kubernetes, and database optimization. Known for solving complex engineering challenges while ensuring system reliability, scalability, and cost-effectiveness. Delivered measurable impact through 35% faster API latency, 30% lower infrastructure costs, and 15% improved user engagement using AI-driven solutions, cloud architecture, and DevOps automation.

Experience

Lead Developer at Coloplast

April 2022 — Present

- Spearheaded the development of secure, scalable backend systems supporting healthcare products, ensuring compliance with HIPAA regulations.
- Designed and optimized cloud-native solutions using AWS services, including Lambda, S3, and EC2, to enhance system performance and reduce latency.
- Led a cross-functional team of developers and DevOps engineers to implement APIs that decreased data transmission latency by 35%.
- Enhanced system reliability and scalability through infrastructure-as-code (IaC) practices using AWS CloudFormation.
- Mentored junior developers, promoting best practices in clean coding, secure software design, and cloud-native architecture.
- **Tech Stack:** Python, Go, AWS, HIPAA-compliant backend development

Sr. Software Engineer at OutSystems

January 2016 — March 2022

- Developed and maintained high-performance backend services using Python (Django and Flask) and Go, supporting enterprise clients.
- Built and deployed microservices-based architectures, ensuring seamless integration with front-end systems built in React and Node.js.
- Optimized server performance on Linux-based systems, reducing resource consumption by 25% and improving response times.
- Automated CI/CD pipelines using Jenkins and Docker, accelerating deployment cycles and improving code quality.
- Collaborated with product managers and stakeholders to align technical solutions with business goals, driving product innovation.
- **Tech Stack:** Python, Django, Flask, Go, JavaScript, Node.js, React, Linux

- Engineered robust backend systems using Python and Java, supporting investment management platforms.
- Developed secure APIs for financial data exchange, ensuring compliance with industry regulations.
- Enhanced system performance by optimizing database queries, reducing latency by 20%.
- Automated data processing workflows, improving operational efficiency and reducing manual effort.
- **Tech Stack:** Python, Java

- Built scalable backend services to support digital marketing platforms, processing large volumes of real-time data.
- Implemented APIs to integrate third-party services, enhancing platform functionality and user experience.
- Improved system reliability and scalability by refactoring legacy code and migrating to modern frameworks.
- Ensured data security and compliance with industry standards, protecting sensitive information.
- **Tech Stack:** Python, Java

- Designed and developed full-stack web applications using Python, Java, and PHP, delivering user-centric solutions.
- Built and customized WordPress websites, ensuring responsive design and optimal performance.
- Collaborated with designers and stakeholders to create intuitive user interfaces and seamless user experiences.
- Optimized website performance and SEO, improving search engine rankings and user engagement.
- **Tech Stack:** Python, Java, WordPress, PHP

- Assisted in the development of Python-based backend systems, supporting various business applications.
- Debugged and optimized code to improve system performance and reliability.
- Participated in code reviews, gaining experience in clean coding practices and collaborative development.
- Supported senior developers in building and testing software components, contributing to project success.
- **Tech Stack:** Python

Education

Bachelor's Degree of Computer Science, April 1998 — August 2002
Minnesota State University, Mankato

Skills

- Python
- Java
- C#
- Django
- Node.js
- Docker
- Google Cloud Platform (GCP)
- WebSockets
- Docker Compose
- Go
- JavaScript
- TypeScript
- Flask
- FastAPI
- MongoDB
- Docker
- gRPC
- Grafana
- AWS
- Git
- SQL
- React
- MySQL
- Microsoft Azure
- Kubernetes
- RESTful API Design
- HIPAA Compliance
