PROFESSIONAL SUMMARY

Web developer specializing in TypeScript/Node.js/React.js and C#/ASP.NET, with experience in building secure, high-performance applications. Architected a web platform using ASP.NET, C#, and EF Core, achieving a 20% reduction in server load and a 15% increase in customer leads. Dedicated to continuous learning and staying up-to-date with emerging technologies.

SKILLS

Languages and Frameworks:

JavaScript/TypeScript (Node.js), C# (.NET Core), Python (Scripting, Automation)

Frontend Development:

HTML, CSS, JavaScript/TypeScript, Bootstrap, Tailwind CSS, jQuery, React.js, Next.js

Backend Development:

Node.js, Express, ASP.NET (MVC, Razor Pages, etc.), Entity Framework

Cloud Technologies:

Microsoft Azure (App Service, Functions, VMs, etc.)

Algorithms and Debugging:

Skilled in leveraging AI tools (such as GPT and Gemini), debuggers, and algorithmic techniques to effectively troubleshoot and resolve complex problems, ensuring optimized and reliable solutions.

Operating Systems:

Strong experience with Unix-like systems, including Linux and BSD.

Databases:

Experience with relational (MySQL) and non-relational (MongoDB) databases.

APIs and Data Formats:

Proficient in REST APIs, JSON, XML/XAML.

Version Control and Deployment:

Experience using Git, GitHub, and CI/CD pipelines for effective software management and deployment.

Containerization:

Hands-on experience with Docker, Portainer, and related tools for deploying and managing containerized applications.

PROJECTS

[Innotech Security, Inc:](#)

Developed a website for Innotech Security, a CCTV company specializing in innovative security products. Utilized ASP.NET, C#, Razor syntax, Entity Framework Core, and MySQL for a robust backend. Resulted in 20% reduction in server load times and 15% increase in customer inquiries due to improved UX and cryptographic security for SEO.

[My Portfolio Website:](#)

Created a simple yet effective portfolio site using Next.js, React, and TypeScript, showcasing my portfolio and skills. Reduced load times by 30% using CDN caching.

Chaos Cell:

Designed and developed a game in C# during the Ludum Dare Game Jam, completed in 48 hours. Focused on rapid prototyping and creativity under time constraints.

PollarStar:

A full-stack demo app that enables users to login/register and create/share/vote on polls. Built with the MERN stack (MongoDB, Express, React, Node) and more.

ArkadeGFX:

Mock website for an arcade-style business created with Next.js/React.js, Tailwind CSS, and other client technologies.

TZTool:

A React based open-source time zone conversion tool. Still a work in progress being written with React, Bootstrap, and timezone related libraries.

Aquavida Swimsuits:

Developed and maintain a Shopify store offering Colombian-inspired swimwear, blending vibrant cultural designs with high-quality craftsmanship. Oversee website development, including custom coding and functionality enhancements. Received a 95% satisfaction rating from the client.

EDUCATION

High School Diploma, January 2020

Online Courses in Web Development

Self-Taught, Ongoing
