

JAYACHANDRA NALADALA

Power BI | Tableau Developer Certified | Power BI Developer | Azure MS SQL BI Developer Certified
Atlanta GA | jayachandranaladala60@gmail.com | 470-852-5206 | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Skilled Business Intelligence Developer / Data Analyst with 4 years of experience delivering data-driven solutions across healthcare and financial services domains.
- Proven expertise in designing, developing, and deploying interactive dashboards and analytical reports using Power BI, Tableau, SQL Server, Azure, and Python.
- Hands-on experience working with enterprise-scale BI environments, including data modeling, ETL development, and real-time dashboard automation.
- Created and optimized ETL pipelines in Azure Data Factory (ADF) and SSIS to consolidate large datasets from multiple source systems into cloud-based data warehouses.
- Designed data models, stored procedures, and views in Azure SQL and SQL Server to support scalable reporting and self-service analytics.
- Applied Python (Pandas, NumPy, Matplotlib) for advanced analytics, data cleansing, and trend forecasting, enhancing the depth of insight in executive reporting.
- Built SSRS and Power BI reports for financial planning, operational metrics, and regulatory compliance reporting.
- Collaborated with data engineers, architects, and business users to define KPI frameworks, ensuring consistency in measurement and reporting across departments.
- Implemented role-based security (RLS), scheduled data refresh automation, and report optimization in Power BI Service.
- Participated in Agile/Scrum cycles, leading sprint planning, UAT testing, and documentation for BI releases.
- Recognized for bridging technical expertise with business understanding—translating complex datasets into actionable, visually engaging analytics that support strategic business goals.

TECHNICAL SKILLS

Business Intelligence & Visualization	Power BI (Desktop & Service), Tableau (Desktop & Server), SQL Server Reporting Services (SSRS), Power Query (M Language), DAX, KPI & Metric Design, Dashboard Performance Optimization
Data Integration & ETL	Azure Data Factory (ADF), SQL Server Integration Services (SSIS), Python ETL Scripts, Power Automate, Data Cleaning & Transformation Workflows
Databases & Data Warehousing	Microsoft SQL Server, Azure SQL Database, Azure Synapse Analytics, Snowflake, Data Lake Storage, Dimensional Modeling (Star/Snowflake Schema)
Programming & Analytics	Python (Pandas, NumPy, Matplotlib, Seaborn), T-SQL, DAX, M Query, Statistical Analysis, Forecasting Models
Cloud Platforms	Microsoft Azure (ADF, Synapse, Data Lake, Logic Apps), Power Platform, Azure DevOps, CI/CD Pipelines
Data Analytics & Reporting	Financial Analytics, Credit Risk Reporting, Healthcare Performance Analytics, Predictive Insights, Trend Forecasting, Compliance Reporting
Performance Optimization	Query Tuning, Indexing, Incremental Data Refresh, Data Compression, DAX Optimization, Report Load Time Improvement
Governance & Compliance	HIPAA Data Security, SOX Reporting, Data Lineage Documentation, Role-Based Access Control (RLS), Data Validation & Audit Readiness
Version Control & Collaboration	Git, Azure Repos, JIRA, Confluence, Agile (Scrum), Sprint Planning, UAT Coordination
Tools & Utilities	Excel (Pivot Tables, Power Pivot), Power Automate, Visio, SSMS, Azure Portal, PowerShell

WORK EXPERIENCE

Power BI Developer / Azure MS SQL BI Developer

Equifax – Atlanta, GA | 01/2023 - Current

Equifax launched a Business Intelligence Modernization Initiative to enhance financial transparency, operational efficiency, and risk analytics through a centralized Azure-based BI ecosystem. The program focuses on migrating legacy on-premises reporting systems to the cloud while standardizing global reporting dashboards across finance, credit risk, and compliance functions.

As a Power BI / Azure BI Developer, I design, develop, and maintain advanced data models, ETL pipelines, and analytical dashboards supporting executive reporting, data governance, and regulatory analytics. My work emphasizes data accuracy, scalability, and actionable insight delivery using Microsoft BI tools and Azure services.

- Designed, developed, and deployed enterprise-grade Power BI dashboards visualizing revenue streams, credit portfolio metrics, and regulatory compliance KPIs.
- Built and maintained ETL workflows in Azure Data Factory (ADF) to extract and transform data from multiple systems including SQL Server, Oracle, and internal data warehouses.
- Created data models and stored procedures in Azure SQL Database and optimized query performance for high-volume financial data.
- Collaborated with data architects to implement star schema and dimensional modeling for financial and risk reporting layers.
- Integrated Python scripts (Pandas, NumPy) for advanced data transformations, outlier detection, and statistical analysis.
- Developed SSRS reports and automated their delivery to finance and risk leadership teams for daily monitoring.
- Applied role-based security (RLS), incremental data refresh, and governance standards to secure and optimize Power BI Service deployments.
- Partnered with cross-functional teams to define KPIs, align business rules, and validate dashboard metrics across global business units.
- Conducted UAT testing, performance tuning, and data validation, ensuring reliability and consistency across reports and analytics models.
- Authored technical documentation, process flows, and data dictionaries, supporting data governance and audit compliance initiatives.

Environment: *Power BI (Desktop, Service), Azure SQL Database, Azure Data Factory (ADF), Azure Synapse Analytics, SQL Server, SSRS, DAX, Power Query (M), Python (Pandas, NumPy), Git, Excel, Agile (Scrum)*

BI Developer / Data Analyst

HCA Healthcare – Hyderabad, India | 04/2019 – 07/2021

HCA Healthcare's global analytics division in Hyderabad supports U.S. hospital operations by developing and maintaining enterprise BI dashboards, clinical analytics, and performance reports. The project's focus was on improving hospital efficiency, patient outcomes, and financial visibility through automated data pipelines, predictive analytics, and interactive visualization using Power BI, Tableau, SQL Server, and Python.

- Developed and deployed Power BI and Tableau dashboards visualizing hospital occupancy rates, patient readmissions, clinical outcomes, and financial KPIs.
- Built SQL-based data models and stored procedures to integrate data from EMR systems, patient billing, and finance databases.
- Created and maintained ETL processes to clean, transform, and load large healthcare datasets into SQL Server and Azure data environments.
- Utilized Python (Pandas, NumPy, Matplotlib) for statistical analysis, data wrangling, and generating predictive insights on patient readmission trends.
- Partnered with U.S.-based healthcare analysts and executives to define KPIs for hospital performance dashboards.
- Performed data validation and reconciliation to ensure integrity across clinical and financial datasets.
- Designed and optimized star schema and dimensional models supporting scalable healthcare analytics reporting.
- Conducted UAT and performance testing, ensuring data accuracy and dashboard responsiveness across multiple hospital networks.
- Developed automation scripts in Python for routine data refresh and reporting tasks, reducing manual effort.
- Created SQL views, joins, and indexing strategies to improve data query performance for ad-hoc analysis.
- Collaborated with compliance teams to ensure HIPAA data privacy and PHI protection standards were upheld in all analytics processes.
- Provided knowledge transfer sessions and end-user training to clinical and finance departments for dashboard utilization.

Environment: *Power BI, Tableau, SQL Server, Azure SQL Database, Python (Pandas, NumPy, Matplotlib), SSIS, Power Query, DAX, Excel (Pivot Tables, Power Pivot), Agile (Scrum), JIRA, HIPAA Compliance Framework*

EDUCATION

- Master of Science in Computer Science - University of Missouri | Kansas, MO – 12/2022
- Bachelor of Technology in Electronics and Communication Engineering | Gitam University

CERTIFICATION

- Microsoft Certified Azure Developer
- AWS Certified Cloud Practitioner
- Tableau Desktop Specialist
- Certified Professional in Python Programming (PCPP)
- Cisco Certified Network Associate (CCNA)
