EDUCATION

Master of Nuclear Engineering

North Carolina State University

Spring 2021

Cumulative GPA: 3.6

BS – Nuclear Engineering

BS – German Studies w/ Science & Technology Concentration

North Carolina State University

Spring 2017

Cumulative GPA: 3.5

WORK EXPERIENCE

Criticality Safety Analysis Engineer

GE Hitachi Nuclear Energy - Wilmington, NC

Jul 2019 - Dec 2024

- Analyze scenarios critical to plant and transportation safety and facilitate customer's understanding of the analysis performed. Scenarios include:
 - Spent Fuel Pool Criticality, Criticality Safety Pertaining to Fuel Transportation, Control Blade Depletion, Decay Heat Management
- Clearly document engineering work in internal and external reports. Emphasis is placed on clear use of language so that engineers and regulators can understand the analysis
- Daily work includes rigorous attention to detail and an active questioning attitude to ensure each task is being performed without compromising safety

GE Power Edison Engineer

GE Hitachi Nuclear Energy - Wilmington, NC, GE Power – Houston, TX

Jul 2017 - Jul 2019

- Experience different facets of GE Power and understand different technological areas of the business by completing four 6-month assignments in the following areas:
 - Stability and Radiological Analysis, BWR Methods, Gas Power Analytics, BWR Fuel Manufacturing EHS

Intro to Computing Environments Administrator, Comp. Sci. Dept. - NCSU

Jan 2015 - May 2017

- Train new instructors on appropriate, effective, and engaging teaching strategies
- Convert a 'PowerPoint Only' teaching plan into a system where instructors show the proper uses of computing tools by having students follow along and 'learn by doing'
- Develop assignments that are more engaging to students and teach other important life and college skills

Lab Instructor, Computer Science Dept. - NC State University

Intro to Computing Environments

Aug 2014 - May 2017

- Instruct ~75 students weekly on the basics of computing and campus resource use and conduct one hour of one-on-one help sessions for students weekly

FORTRAN

Jan 2015 - May 2015

- Organize weekly class lectures to instruct students on the basics of FORTRAN and its applications and hold two hours of one-on-one help sessions for students weekly

COMPUTER CODES AND SKILLS

- Proficient in MCNP, SCALE/KENO, Python, C#, Knowledgeable in MATLAB, FORTRAN
- Languages: German – Intermediate Proficiency
- Skilled user of course management software, Microsoft Office
