Jhansi Chattamoni

jhansichattamoni7@gmail.com

PROFESSIONAL SUMMARY

SQL Developer with 8+ years of experience in designing data warehouses, optimizing database performance, and building scalable ETL solutions using SQL Server, SSIS, and PL/SQL.

Strong expertise in **data integration, transformation, and cleansing** across multiple platforms including SQL Server and Oracle databases.

Developed and optimized complex **T-SQL and PL/SQL stored procedures, functions, and packages** to support business-critical applications.

Hands-on experience in **reporting and dashboard development** using SSRS and Tableau to deliver actionable insights and KPIs.

Proficient in **performance tuning, query optimization**, and applying **database normalization principles** to enhance system efficiency.

Collaborative team player with experience in **Agile environments**, version control using TFS, and performing **database upgrades and migrations** (2005 to 2017).

EDUCATION

University – Acharya Nagarjuna University, Andhra Pradesh

Bachelor Of Computer Science - 2011

TECHNOLOGIES

Category	Technologies
Programming Languages	SQL, T-SQL, PL/SQL, Python, C, C++, C#, .NET
Databases	SQL Server (2008–2019), Oracle (10g/11g), MySQL, Azure SQL Database
ETL Tools	SSIS (2008R2/2012/2014), Azure Data Factory (ADF)
Data Warehousing	OLTP, OLAP, Dimensional Modeling, Star & Snowflake Schema, Data Migration, Data Modeling
Reporting Tools	SSRS, Tableau (Desktop & Server)
Database Development	Stored Procedures, Triggers, Functions, Views, Indexes, Query Optimization, Data Cleansing, Normalization
Performance Tuning	Execution Plans, Indexing, SQL Profiler, Database Engine Tuning Advisor
Version Control / CI/CD	Git, TFS, CI/CD pipelines (Azure DevOps or similar)
Automation & Scheduling	BMC Control-M, SQL Server Agent, SSIS Scheduling
Cloud Platforms	Azure (Data Factory, SQL Database)
Methodologies	Agile (Scrum, Kanban), SDLC
Operating Systems	Windows Server (2008–2019), Windows 10/8/7

Other Tools	MS Office, Outlook, Erwin Data Modeler, Microsoft Access
-------------	--

PROFESSIONAL EXPERIENCE

Role: Oracle PL/SQL Developer/Data Analyst

Apr 2024 to Present

Client: Click Therapeutics – New York, NY

- Responsible for requirement analysis, database design, development and converting into efficient technical solutions.
- Created database objects like tables, views, stored procedures and functions.
- Created T-SQL scripts, which generated tables, relationships, based on the finalized ER-diagram.
- Extensively used joins to join the tables and merge the data to get the required result.
- Created views to restrict users by providing column level security on the database tables.
- Developed ETL pipelines using SSIS as an ETL tool to extract data from external applications and between databases.
- Regularly implemented SSIS integration processes and custom SQL / C# code to fully automate data loads and ETL procedures.
- Migrated SQL server database applications to oracle PL/SQL packages.
- Optimized existing PL/SQL package, resulting in 30% reduction in query execution time and enhancing overall system performance.
- Conducted comprehensive data analysis to identify trends, patterns and opportunities providing valuable insights for strategic decision-making.
- Designed and built dashboards for use in monitoring performance metrics while maintaining existing dashboards for accuracy and efficiency and incorporating changes using Tableau.
- Developed interactive reports and improved reports generated efficiency by 32%.
- Interacted with business partners to get feedback on the report or validate data from the database.
- Conducted in-depth analysis using reports to visualize quality and safety that help organization to make decisions.
- Collaborated with the team members to define business requirements and ensure data accuracy in the reports.

Environment: SQL Server 2016/2014/2012/2008, T-SQL, SQL server Integration Services (SSIS), Tableau.

Role: MS SQL Server/ SSIS Developer (Azure)

Feb 2023 to March2024

Client: Synchrony Bank – Atlanta, GA

- Interacted with the Business Users and Project Managers to know about the business requirements and Legacy requirements.
- Experience in database design using normalization and E/R diagrams.
- Documented ETL processes and prepared project status report updates/audit reports/ list of issue items that need to be reviewed.

- Created SSIS packages to extract data from OLTP to OLAP systems and scheduled jobs to call the packages.
- Created traces using SQL Server Profiler to find the long running queries and modify those queries as a part of Performance Tuning.
- Created SQL Server Agent Jobs for Running SSIS Packages on scheduled basis.
- Simultaneously developed Azure Data Factory pipelines for Extract, Transform, Load (ETL) and Extract, load, transform (ELT) operations, bridging the gap between various source environments such as Flat files, Excel, SQL server, DB2, Oracle.
- Used copy activities to move data between SQL databases and other data stores.
- Worked on creating dependencies of activities in Azure Data factory.
- Monitored data pipeline, setting up the triggers for scheduling and managed data pipelines through azure portal.

Environment: SQL Server 2016/2014/2012/2008, T-SQL, SQL server Integration Services 2012/2008R2 (SSIS), ADF, GIT.

Role: SQL/SSIS Developer

June 2022 – Nov 2022

Client: HGV (Hilton Grand Vacations), Orlando FL.

- Developed ETL processes to load data into data warehouse from different sources.
- Extensively used **joins and sub-queries for complex queries**, which involved multiple tables from different databases.
- Experience in developing Transact-SQL statements using **DML and DDL language**.
- Worked on day-to-day requests to send the required file to reporting team.
- Experience in running SQL code as per the request for the campaigns and exported the file.
- Also worked on different campaigns to run the **SQL code every week as initial, second touch, third touch and fourth touch where the exported file is sent to SFTP for the marketing team reference**.
- Created new SSIS packages and worked on existing to migrate data.
- Have experience in modifying stored procedures depending on the marketing team request.
- Involved in creating jobs for some procedures to run on scheduled time and some are run manually where the SQL query must be updated every week.
- **Hands on experience in resolving job failures by monitoring every step** and running the **SQL Stored Procedure** on scheduled time.
- Worked with Business Team (End Users) and gathered all the BI Reports requirements.
- Created multiple kinds of reports like matrix, tabular, drill down, drill through, parameterized reports using **SSRS**.
- Developed a variety of reports like **Bar, Pie, Stacked Column Chart, and Donut chart** and pinned them to dashboard.

Environment: SQL Server 2016/2014/2012/2008, T-SQL, SQL server Integration Services (SSIS), SQL Server Reporting Service (SSRS).

Role: SQL Developer

Sep 2021 – May 2022

Client: HCSC (Blue cross blue shield), Texas.

- Involved in designing, Modeling, Development, Implementation and Support of **SQL Server 2016/2014/2012/2008** and Business Intelligence (BI) tools to support transactions and business decision-making.
- Participated in all the **agile planning, daily standup meetings and give the updates.**
- Worked on database design process and data modelling process.
- Analyzed the Data quality, Data validating, Data Mapping to **migrate data to SQL Server database.**
- SQL Server Upgradation – Extensively worked on validating SQL stored procedure based on the **DMA report** and documented the changes.
- Involved in Migrating job scheduler from **ZENA to BMC Control – M** and upgrading SQL server from 2008 to 2017 server.
- Monitor Job Scheduling activities and **create Implementation** and back out plan documents for the **deployment.**
- Hands-on experience in validating job flows and scheduling jobs through **BMC Control – M.**
- Worked as a developer to **support the DBA team** depending on their inputs.
- Communicating with the control -M team to validate the job process which successfully ran in previous environment.
- Involved in executing SSIS packages for different applications **to generate the export file** to deliver the notes/data required for the project.
- Resolving the Incidents which have been raised from project teams to generate the file and deliver.
- Worked on **missing SQM files for the scheduled delivery** date and generated the file manually.
- Proficient in leading and managing development **resources.**

Environment: SQL Server 2016/2014/2012/2008, T-SQL, SQL server Integration Services (SSIS), BMC – Control M, Excel.

Role: SQL/SSISDeveloper

Mar 2020 – Aug 2021

Client: MUFG Union Bank, Monterey Park, California.

- Collaborated with database administrators **to translate business requirements into data models using Erwin**, ensuring alignment with organizational goals and standards.
- Designed and developed SSIS Packages for loading data from **Flat Files, Excel Files, XML Files** to SQL Server databases using SSIS.
- Involved in usage of various SSIS components like Slowly Changing Dimension, Conditional Split, Merge, Merge Join, Union All, Sort, Derived column, SQL execution task, Variables, and Error Handling before loading data into the Data warehouse.
- Working Cross-functionally as needed to provide solutions that best meet the analytics and reporting needs of the business.
- Performed optimization of **TSQL stored procedures** by analyzing execution plans, creating proper indexes, and employing SQL profiler and Database engine tuning advisor in OLTP environment.
- Generated **T-SQL scripts** for application development.
- Worked on enhancing and deploying the **SSIS Packages** from development server to production server.
- Strong ability to develop complex **SQL queries, scripts, user-defined functions, and views** for business logic implementation.
- Designed and implemented **low-latency, high-availability, and performant data modelling solutions.**
- Worked with Business Team (End Users) and gathered all the BI Reports requirements.
- Created multiple kinds of reports like matrix, tabular, drill down, drill through, parameterized reports using **SSRS.**

- Developed a variety of reports like **Bar, Pie, Stacked Column Chart, and Donut chart** and pinned them to dashboard.
- Experience in **Agile Methodology Projects**.

Environment: SQL Server 2016/2014/2012/2008, T- SQL, Microsoft Access, Microsoft SQL Server Integration Services (SSIS), SQL Server Reporting Service (SSRS).

Role: MSBI Developer (SSIS)

Mar 2019 to Feb 2020

Client: Flex steel Industries Inc., Lancaster, PA

- Involved in Technical discussions and decisions for Business requirements, Interaction with Business Analysts, Client team and Development team.
- Created database objects like **Tables, Views, Stored Procedures, Triggers, Functions, and Indexes** for the new application.
- Created source to target mappings and ETL design for integration of new/modified data streams into the data warehouse.
- Designed and implemented the SSIS Process to load data from FLAT FILES, EXCEL, XML Files, and other Databases.
- Extensively used SSIS Transformations such as **script component, pivot/unpivot, Derived Column, Data Conversion and send mail task** etc.
- Created Dimensional Model (Star/Snowflake Schema) according to the requirements specifications.
- Design and document the error-handling strategy in the ETL load process using **Event handlers**.
- Implemented processes and systems to monitor data quality, ensuring production data is always accurate and available for **key stakeholders and business processes** that depend on it.

Environment: SQL Server 2016/2014/2012/2008, T-SQL, SQL server Integration Services (SSIS), SSRS, Excel.

Role: MS SQL/BI Developer

Sep 2017 to Feb 2019

Client: Lowe's, Mooresville, NC.

- Developed SSIS packages to load data from multiple sources to data warehouse.
- Implemented incremental loads with **timestamp techniques**.
- Generated high-quality **database solutions and optimized stored procedures**, functions using **T-SQL**.
- Created Key-Value pair columns using pivot functionality according to the business requirements.
- Used Sequence Container, Script task, Expressions, Execute SQL task, Variables, Send Mail Task, Package Execution task to achieve business needs.
- Developed C#.NET scripts for SSIS packages.
- Scheduled jobs to execute **SSIS packages**, which were developed to update database. objects during nightly loads of data into the SQL Server Database.
- Created and modified reports using global variables and expressions in **SSRS**.
- Generated Matrix reports, drill down, drill through, sub reports, chart reports, parameterized reports using SSRS.

Environment: SQL Server 2014/2012/2008R2, T- SQL, Microsoft Access, Microsoft SQL Server Integration Services (SSIS) 2012/ 2008R2, SSRS, C#.

Role: SSIS Developer

Sep 2016 to Aug 2017

Client: Extreme Reach, TX.

- Worked as a Developer on databases like **MS SQL Server 2014**, MS Access.
- Analyzed data models, data relationships and dependencies for greatest optimization.
- Planned, defined, and designed data flow processes for data migration to the Data Warehouse using DTS.
- Developed **ETL jobs** like Microsoft Integration Services.
- Created SSIS packages, staged data from different data sources into a SQL Server Database using SQL Server Integration Services.
- Designed and developed SSIS packages for initial and incremental load approach. Worked on **SCD, Lookup and other complex Transformations.**
- Created SQL Server configurations for SSIS packages and **XML & Windows event logs.**
- Design and document the error-handling strategy in the ETL load process using **Event handlers.**
- Used **package configurations** to make use of same SSIS package in Dev/Testing/Prod Environments.

Environment: SQL Server 2014/2012/2008R2, Microsoft Access, Microsoft SQL Server Integration Services (SSIS).
