

Quality Assurance (QA) Engineering Lead/Project Manager

Highly analytical and goal-oriented software QA leader with extensive experience overseeing complex software quality improvement programs within large corporate environments. Capable of analyzing and interpreting data, drawing conclusions, defining recommended actions, and reporting testing results across multiple stakeholders. Proven capacity fort translating user experience research and insights into high-impact product decisions. Demonstrate exceptional eye for detail in going through a full product life cycle, integrating user feedback into product requirements, managing prioritization, driving pre/post-launch execution, and coordinating the process of developing metrics for more accurate measurement of product performance.

Areas of Expertise

- Software Quality Assurance
- Project Management
- Agile Methodologies
- Test Planning
- Technical Documentation
- Agile
- SDLC
- Cross-Functional Collaboration
- Organizational Development
- Software Development Life Cycle
- Web Application Development
- Test Case Design
- API Testing
- Usability/Accessibility
- Performance Testing
- User Acceptance Testing (UAT)
- Vendor Management
- Requirements Analysis
- Test Management
- UAT Management
- Project Management

Technical

Proficiencies

Platforms/OS:	Windows, macOS, Android, iPhone/iPad iOS, Unix/Linux – Red Hat (Gnome), Solaris, VMWare (Virtual OS), Apache Web Server, Apache Tomcat App Server, IBM AIX

Testing Environments:	Java applets/JavaScript, XML, HTML/ASP, Telephony, E-commerce, MPEG, AVI, and QuickTime streaming, Flash, SAP, C++, AJAX, Ruby on Rails C++, Sybase Database, J2EE, DevTrack, WebSphere 8.1, .NET, Salesforce

Career Experience

Career Break | San Jose, CA February 2024 - Present

Took time away from full-time employment due to a company-wide restructuring and layoff from Apple/Hogarth in January 2024. During this period, focused on:

- Updating technical skills in QA automation, Agile methodologies, and accessibility testing.
- Completing online training in AI, Introduction to Python.
- Actively pursuing new QA Specialist opportunities aligned with long-term career goals.

QA Specialist

Provide full quality assurance support through preparation and execution of testing plans, analysis of solution design, and resolution of critical issues. Manage all phases of development life cycle and quality testing for various Apple/Hogarth products in web environments across 33 countries.

- Enabled testing of more types of software and hardware configurations upon speeding up testing processes with the usage of Selenium through AppliTools to conduct smoke and regression testing on localized Apple Retail pages.
- Minimized risks to ensure full coverage of all UI, content, and functional requirements by shaping test plans and cases in accordance with business requirement documents, visual specifications, and walkthrough with SMEs.
- Streamlined bug reporting processes by using Radar to craft meticulous test cases and help achieve faultless testing outcomes through greater efficiency.
- Delivered substantial cost savings in the form of accelerated testing times and less head count requirements to get through each testing cycle by constantly providing proactive updates to the Localized Project Manager in order to ensure the timely identification and resolution of issues within predefined timeframes during the entire duration of the test cycle and UAT.

Google/ThinkOrb, Mountain View, CA

October 2019 – April 2021

QA Specialist

Orchestrated comprehensive quality assessment of the company's digital infrastructure encompassing e-learning modules, System and Mandatory Service Announcement (MSA) emails, and Intellum letter triggers. Tracked, measured, and documented successful intermediate and final deliverables.

- Improved turnaround times in the fulfillment of clients' needs, along with ability to release on or before the set release date by establishing regular communication channels with cross-functional partners, instructional designers, and stakeholders to help ensure timely modification and last-minute adjustments for the completion of project deliverables.
- Cultivated a cross-cultural and diversity-oriented work environment by fostering open communication with Indian shore teams, which resulted in enhanced overall collaboration and productivity through clearly defined deliverables, timely project completion, and presentation of status reports on a regular basis.
- Posted zero scope creep through meticulous design of a feasible Quality Assurance Plan, which defined and updated best practices and standard operating procedures, and subsequently proved valuable in facilitating the delivery of high-quality outcomes that fully adhere to project requirements.
- Streamlined the presentation of metadata content in Intellum through the API by optimizing Google CMS, Kintaro for the creation of test cases and periodic tests as part of a technical digitalization initiative.
- Elevated the productivity of software testing process by launching a comprehensive test tracker test case repository, which has become an invaluable resource for the QA team by improving the overall testing process for both existing and future projects.

Apple/Hogarth, Sunnyvale, CA

March 2019 – April 2019/February 2018 – April 2018

QA Lead Consultant (Contract)

Provided technical guidance and oversight to all aspects of development life cycle for Apple/Hogarth products in web environments with a pencil in a localized platform that catered to Australia, New Zealand, and Turkey.

Dolby Labs, San Francisco, CA

April 2018 – September 2018

QA Lead/Project Manager Consultant (Contract)

Coordinated the technical design and implementation of Dolby Content Management System (Ingeniux CMS), while managing the development of test cases used across multiple operating systems, such as Windows, macOS, iOS, and Android with functional, end to end, and regression phases as part of the testing cycle.

- Paved the way for timely and swift resolution of quality-related issues upon deployment of Jira for seamless issue and bug reporting, effectively leading to a significant reduction in operational interruptions.
- Played a pivotal role in empowering strategic decision making within the Dolby management team by consistently providing timely updates and comprehensive reports on UAT test status, as well as facilitating smooth implementation of test results across various Dolby products.
- Boosted deliverability and workflow efficiency with more effective time spent when testing use cases for internal

customers as a result of rigorous effort in expediting the adoption of Salesforce for CMS asset user creation, as well as promoting deeper understanding of how the new tool works and how to properly implement it to the customer base.

Additional Projects

- QA Manager/PM (Contract) | CrossFit Corp, Scotts Valley, CA
- QA Manager/PM (Contract) | Lunera, Santa Clara, CA
- QA/Technical Project Release Manager (Contract) | Wells Fargo Bank, San Francisco, CA
- IT Manager (Contract) | Chavez Institute (Non-Profit), San Jose, CA
- QA/Project Release Lead (Contract) | FPL.com – Accenture, Miami, FL
- BAT/Project Release Lead (Contract) | Cisco – Accenture, Milpitas, CA
- QA Project Release Coordinator (Contract – Windows Upgrade) | PG&E, San Francisco, CA

Education

Associate of Arts (AA), General Education
De Anza College – Cupertino, CA
