Experienced developer and leader with strong problem-solving skills and a proven ability to adapt quickly to new environments and technologies. Successfully delivered high-impact projects across diverse industries, including finance, sports betting, and telecommunications. Eager to leverage technical expertise to solve problems and drive innovation.

TECHNICAL SKILLS:

- C#, Java, Pascal, Python
- Unix Shell Scripts, .NET Core, WebForms
- Microsoft Azure, AWS, PCF
- JIRA, GitHub, Azure DevOps
- MongoDB, CosmosDB, Oracle, SQL Server, Snowflake, Postgres, Datadog
- Kafka, Rabbit MQ, Service Bus, Postman
- Agile(Certified Scrum Master, Certified Product Owner), Waterfall, RUP
- Microsoft Dynamics 365
- Strong IT, science and management blend
- Strong written and oral communication skills
- Ace troubleshooter

WORK EXPERIENCE:

Pointsbet/Fanatics, Sports Betting

October 2020- December 2024

Sr Software Engineer

- Designed and implemented highly transactional and performant cloud applications for sports betting platform leveraging industry-standard cloud design patterns, utilizing **C# on Azure and Java on AWS**.
- Deployed code to cloud platforms using **Docker, Kubernetes** and **Terraform** scripts
- Employed **Agile** methodologies, using tools such as **Azure DevOps, Jira, and GitHub** for streamlined project management and collaborative development.
- Worked extensively with diverse database technologies, including **CosmosDB, MongoDB, SQL Server, Postgres, and Snowflake** to support data persistence and queries.
- Developed robust **event-driven microservices** using **Kafka** and **Service Bus** to enhance responsiveness across applications.
- Led complex payment processing integration, facilitating secure deposits and withdrawals across multiple major providers.
- Created simulators for external systems, significantly improving speed of quality control and testing processes.
- Supported apps with unit tests and documentation including architecture and design diagrams in Confluence.
- Built and deployed **Azure Durable Functions** and orchestrations for efficient, scalable workflows in cloud environments.
- Implemented code to enforce compliance rules, ensuring stringent adherence to regulatory standards in a highly regulated industry.
- Used advanced **Datadog** features including dynamic Instrumentation for troubleshooting and monitoring state of Applications. Used Azure App Insights for debugging and log monitoring.
- Software Tools Used: C#, .NET Core 8, Azure, AWS, Snowflake, Datadog, Kafka, Mongo, Kubernetes

Professional Development

- Learning **React native** and **Mobile App Development** to expand full-stack expertise.
- Learning to integrate **OpenAI API** and **Azure AI Services** for building intelligent applications

Toastmasters International

October 2019 - September 2020

Applications Developer Lead

- Architected, designed, and built microservices in .Net Core and deployed on Azure Cloud platform.
- Built REST services that interacted with MS Dynamics 365 Common Data Service using ODATA and Azure B2C.

- Provided hands-on leadership and mentoring to team members.
- Led Agile team as Scrum master for API implementation.
- Software Tools Used: .NET Core, Azure Cloud Services, Dynamics 365

Charles Schwab, Financial Services

September 2006 - September 2019

Technical Lead, Applications Architect

Hands-on technical lead for several high-profile projects, leading onshore and offshore teams using Agile methodology and deploying microservices onto PCF Cloud platform.

- **Digitization of Account Open and Maintenance Actions: (Application Architect)**
 - Architected, designed & led onshore and offshore team in building .NET Core application using Agile methodology and Atlassian tools such as Jira, BitBucket and Bamboo.
 - Following Micro Services and Event Driven architecture, components were deployed to PCF Cloud Foundry and events were managed by Rabbit MQ. REST API provided interface between Angular front-end, and MongoDB/Oracle/SQLServer backend.
 - Software Tools Used: C#, Oracle, MongoDB, Angular, REST, RabbitMQ, TDD, Jira, BitBucket, Bamboo, PCF, Postman, Swagger, Splunk
- **Web Trading (Technical Lead)**
 - Led development efforts for this 4-year project that modernized existing stock trading platform.
 - Architected system using MongoDB and ASP.NET MVC to deliver solid performance gains.
 - Led a team of developers including onshore and offshore team members.
 - Delivered project under tremendous pressure of constraints of time and the release process.
 - Helped Client Services identify trading errors by Advisors, thus saving Schwab money that would otherwise be needed to compensate for platform errors.

EDUCATION:

University of Colorado, Denver

Masters in Business Administration (Finance)

University of Mumbai

Masters in Computer Applications

University of Mumbai

Bachelor of Science, Physics
