PROFESSIONAL SUMMARY

Microsoft SQL DBA with over 6 years of working experience in performance monitoring and production environments. Skilled in database backup and restore, maintenance plans, performance tuning, index optimization, high availability and disaster recovery, activity monitor and execution plan. Good knowledge of SQL server versions from 2012 to 2019, Users, Login creation and monitoring. Experienced with Hyper-V.

AREAS OF EXPERTISE

- Comprehensive knowledge of SQL Server deployment, migration, patching, troubleshooting, optimization, maintenance (modeling, High-Availability (HA) and Disaster Recovery (DR)).
- Skilled in building complex environments using functions such as Traditional failover clustering, Log Shipping, and AlwaysOn high availability and disaster recovery, migration, backup and restore.
- Excellent attention to detail, cross-functional communication, and teamwork skills.
- A good team player.

RECENT PROJECTS

- Migration of over 100 SQL Server Databases and Managed instances.
- Managed Projects such as Cloud infrastructure deployment from conception to completion of the project.
- SQL 2008/R2 Upgrades, SQL 2012 Upgrades, Application Migration and SQL Server Consolidation.
- Applying windows and SQL Server patches on Production/Non-Production Servers.
- Configured database backups and restoration, monitored and tuned database.

TECHNICAL PROFICIENCIES

Platforms: Windows, Microsoft SQL Server (2012 – 2019)

Tools & Functions: Database Administrator, Installation and Configuration, Backup and Restore, Recovery Strategies, Cloud Computing, Security and Access Control, Policy-based Management (PBM), Transparent Data Encryption (TDE), Column-based Encryption, Dynamic Data Masking (DDM), Database Audits, High Availability and Disaster Recovery, Data Migration, Performance Optimization or Tuning, Automation and Scripting, ETL Processes, Hyper-V, Structured Query Language (SQL). PowerShell, SQL Server Reporting Services (SSRS), SQL Server Integration Services (SSIS), SQL Server Analysis Services (SSAS), Transparent Data Encryption (TDE), Dynamic Data Masking (DDM), Database Mirroring, Log Shipping, Traditional Failover Clustering, AlwaysOn, Database Mail, SQL Operator, Snapshot, Transaction, Merge, Oracle,

PROFESSIONAL EXPERIENCE

SQL SERVER DATABASE ADMINISTRATOR Wells Fargo | Richmond, Virginia

Jan 2020 – Present

- Hands on experience with database installation, upgrades, and configured SQL server instances from 2012, 2014, 2016, 2017 and 2019 in a virtual environment.
- Monitors **database performance**. Performs routine checks and updates if necessary.
- Responsible for reliable **back-up/recovery** methodology.
- Perform Maintenance plan/ Ola Hallengreen for auto-backup.
- Performs troubleshooting of problems within databases using **Extended events, Profiler or Activity Monitor**.
- Perform in the successful completion of planning and advising on SQL server configuration for a new application and Keeps management aware of progress and issues.
- Experience in implementing and managing High Availability and Disaster Recovery solutions such Always-on, Replication and Log shipping.
- Ensure database backed up with **Full, Differential, Transactional Log** and can be recovered.
- Configure SQL Server monitoring utilities to reduce the number of false alarms.
- Monitoring and performance tuning and query tuning to include index optimizations.
- Setup high availability as part of the disaster recovery strategy for the database
- Manage maintenance plans **for index reorg, index rebuild, updating statistics**.
- Monitor backups to ensure they are being performed regularly.
- Communicate deployment status, risks, and mitigation plans.
- Proactively maintain database servers by monitoring and tuning.
- Review query plan and causes of **index scans/seek** using execution plans.
- Creating logins and granting permissions in **Security**.

JUNIOR SQL SERVER DATABASE ADMINISTRATOR Bright view Health care | Rockville, Maryland

June 2017 – November 2019

- Installation and configuration of new SQL Servers
- Monitoring and performance tuning and query tuning to include index optimizations.
- Perform high availability of the disaster recovery strategy for databases.
- Manage maintenance plans to monitor backup, Email Alert, and jobs.
- Proactively maintain database servers by monitoring and tuning.
- Ensure proper backups of Full, differential, and transactional Log are done in a timely manner to ensure that recovery operations can be done as quickly as possible in the event of a systems failure.
- Disaster Recovery Planning/Documenting/Implementing
- Hand on RMAN configuration using a recovery catalog and use of RAC to NON-RAC
- Exporting and Importing database backups using Exp & Imp and EXPDP/IMPDP
- Monitor locking, blocking using SP_who2 and SP_who is active.
- Review query plan and causes of index scans/seek using execution plans.
- Creating logins and granting permissions

GENERAL IT SOLUTION & SUPPORT INTERN
PC for People | Maryland, USA

April 2016 - May 2017

- Work as a Computer Technician. Experience in Windows operating system Installation, software/Hardware and Troubleshoot devices.
- Governmental organizations' electronic waste removal, backup files on a cloud platform (Google Drive, iCloud, and Amazon) and secure data destruction.
- Support the development of database governance procedures, create backup and disaster recovery protocols, and ensure data integrity and security.

TECHNICAL SUPPORT SPECIALIST
Chesapeake Optical Lab | Baltimore Maryland

June 2009 - March 2016

- Maintenance Tech. responds to requests for technical assistance in person.
- Identifies and escalates situations requiring immediate attention.
- Support Lab by providing complex machine repair requests and software backup.
- Research questions using available informational resources.
- Perform installation, preventative maintenance, and repairs online manufacturing equipment.
- Locate and diagnose technical hardware and software failures, replace defective components, and perform basic troubleshooting using standard.

EDUCATION

- **Associate D | Cyber Security and Assurance | BCCC** (Baltimore City Community College)
- **MS SQL Database Administrator Certification | Learnmate Technologies** (2017)
- **Bachelor in Telecommunication Technology/Technician | Light University in Burundi** (2002)
- Microsoft Azure Certification | KiawitechIT Academy
