Professional Qualification:

- Bachelor of Engineering (Computer Science and Engineering)

Work Experience History

Gulfstream Aerospace Corp. Service Center Savannah, GA USA

Aug 2023 to Till Date

Role: Salesforce Developer.

The current phase of the **Salesforce implementation** focuses on the **Customer Owning Cycle** (Future Work and Future RFP), specifically addressing **Product Support Sales**. This phase includes **Entry into Service** processes, **parts and service sales** (including the **Planes Parts Program**, **Technical Publications**, and **Subscriptions**), and enhancements to business processes in **new aircraft sales**, **pre-owned sales**, and **government contract sales**. It also covers **marketing campaign processes**, **Outlook and SharePoint integration**, the **replacement of the Sales Dashboard and Toolkit**, as well as **data migration, cleansing, training, and governance activities**.

Salesforce will be configured to capture and report on data throughout the **Customer Buying Cycle**, which spans **Lead Development**, **Account Development**, **Opportunity Development**, and **Contract Negotiation** for aircraft sales. The cycle concludes with capturing the **purchase decision**—whether won, lost, or no purchase.

The **CMP materials** will be automatically created and updated from CMP through the **MRO-I-0042 interface**, following the naming convention: **CMP_<Model>_<CMP Code>_<AC Side Indicator>**. The interface will be enhanced to send the **model, CMP code, and AC side indicator** to individual characteristic fields in the material. Additionally, **mass updates through MM17 will trigger** the interface.

The heavy maintenance quoting solution is being migrated from **SAP to Salesforce**, while **service execution** will remain in SAP for **Westfield** and **Corridor** facilities. All other input facilities will transition to Salesforce upon interface completion. Once customer-approved quotes for a given visit are finalized, only the **approved items** will be combined into a Salesforce order. The order will then be set to an **“Activated” status**, triggering the **replication of the order details into SAP** with the creation of a **maintenance quotation**.

Responsibilities: -

- Worked closely with key stakeholders in multiple areas across business organizations, including sales, flight operations, and customer support to ensure successful delivery of Salesforce solutions bringing high value to operations, enhancing the user experience and driving growth.
- Conducted the requirement Discovery and Create Product Backlog, Configure/Create Required Salesforce Object Model & Create Permissions and Security Model to Separate New Aircraft Sales Data from AOS Data .
- Developed Required Workflow/Process Builder Automations, Designed Interim SharePoint & Enterprise Data Warehouse Solution for Operations, Developed and Implemented the Standard Reporting and Dashboards using PBI.
- Configured Salesforce Applications to change validation rules, workflows, custom labels, custom settings, custom rules, profiles and permission sets.
- Created user Roles and Profiles, security controls, Territory implementation, shared settings.
- Developed various Apex Classes, Apex Triggers, and Controller classes for various needs in the application.
- Developed various Custom Objects, Tabs, Master-Detail, Lookup relationships, Formula fields, validation rules.
- Designed and deployed Validation rules, Approval Processes, Custom tabs, and Auto-Response for automating business logic.
- Created various Roles, Profiles, and Page Layouts and Configured the permissions based on the hierarchy requirements of the organization.
- Created a data model using standard and custom objects to help construct a product hierarchy in salesforce.
- Worked on Product categorization and Price books creation based on regions and added products and quantities based various discount plans.
- Configured Products list views as per the customer queries and product groups and mapped them as per the user requirements.
- Created email templates based on departments and attached them customized product list view links and feedback forms.
- Worked on several user stories, designed and developed using out-of-the-box Salesforce configurations, Flows, Process Builder, Workflow Rules, as well as customizations using Lightning Web Components and Apex classes.
- I worked on over a dozen inter-dependent flows, completed 100+ user stories, and created new data models to accomplish business requirements

Gulfstream Aerospace Corp. Phase II service

May' 2022 to July' 2023

Role: Salesforce Developer.

In Phase II Salesforce enhancement in sales and Service cloud across the globe. I Worked as Developer for Salesforce and SAP ECC, developed custom code to facilitate reporting and enhanced security. Leveraged clients existing IT framework/CRM systems for better data visibility and participated in systems integration. Implemented three Salesforce interface/integration to other Gulfstream Systems

Salesforce to SharePoint – Update SharePoint with key Opportunity meta -data

- a. Aircraft Serial Number
- b. Team Members and Roles

Salesforce to Enterprise Datawarehouse (EDW) – Update EDW with Aircraft Ownership Service (AOS)Contract Information so that various reports and customer communication can be created to manage the AOS program.

Salesforce to Power BI – Transfer various data sets to Power BI to generate reports for New Aircraft Sales and Customer Support Sales management.

Responsibilities: -

- Certified in Power BI and create the Aircraft sales report and Dash boards using Salesforce data.
- Worked on Data modeling, Data structuring, UI design and Declarative development tools.
- Implemented Workflow rules, Approval Processes, Process builder and Flows to meet requirements in Banking, E-Commerce and retail Industries.
- Developed various Custom Objects, Tabs, Components and Visual Force Pages and Controllers
- Administered, configured, maintained Salesforce.com application user profiles, roles, assigning Permissions, generating security tokens, validation Rule, upgrade installation. Created and deployed Several Reports using salesforce.com platform.
- Developed APEX Classes, Controller Classes and APEX Triggers for various functional needs and implemented the business logic as per the requirements.
- Developed and deployed workflows and approval processes for opportunities and products/ assets management.
- Involved in building of the Customer Portal in the organization.
- Used Data Loader for insert, update, and bulk import or export of data from Salesforce.com subjects. Used it to read, extract and load data from comma separated values (CSV) files.
- Created and used Email templates in HTML and Visualforce
- Developed Apex Classes & Triggers to implement the business logic as per the requirements.
- Developed Unit test class for Apex class and worked for improving code coverage.
- Used SOQL & SOSL with consideration to Governor Limits for data manipulation needs of the application using platform database objects.

Gulfstream Aerospace Corp. Phase I

Feb' 2020 to Apr' 2022

Role: Salesforce Developer

Develop an enterprise-wide CRM solution in Salesforce.com that enables the management of customer information, through real-time, relevant and reliable data that is easily accessible by Gulfstream, from anywhere, anytime, that will increase customer acquisition and retention. New Implementation in salesforce for the sales, Marketing and service for across the globe in GAC. Worked as Developer for Salesforce & SAP ECC, the material master details for CMP materials, parts, labor, internal and external service materials will be created and maintained in SAP and replicated to Salesforce.

The heavy maintenance quoting solution is being moved from SAP to Salesforce. While the quoting product bundles (sales boms) will be maintained exclusively in Salesforce, the components (parts, labor, services and CMP codes) will continue to be created and maintained in ECC and sent to Salesforce.

In this Phase I scope and project main capabilities about 3600 views of Customer, Account and Contact, Management, Lead Qualification, Opportunity Management (NAS &POAC), Security Model (Profiles, Roles, OWD), Approvals and Workflows, Reports and Dashboards, Demo Scheduling.

Main Data models for this phase are Contacts, Accounts, Activity History, Lead, Opportunity, Asset (Aircraft Ownership), Product2(Aircraft), Quote, Activity and Custom Objects. This implementation for user around 125 people around US Geography & International.

Responsibilities: -

- Worked on Data modeling, Data structuring, UI design and Declarative development tools.
- Implemented Workflow rules, Approval Processes, Process builder and Flows to meet requirements.
- Developed various Custom Objects, Tabs, Components and Visual Force Pages and Controllers
- Administered, configured, maintained application user profiles, roles, assigning Permissions, generating security tokens, validation Rule, upgrade installation.

<https://www.salesforce.com/trailblazer/johnsonSF97>

- Used Data Loader for insert, update, and bulk import or export of data from Salesforce.com subjects. Used it to read, extract and load data from comma separated values (CSV) files.
- Integrated Salesforce with Informatica on Demand for the proper mappings and extraction and transformation of data.
- Used SOQL & SOSL with consideration to Governor Limits for data manipulation needs of the application using platform database objects.
- Worked on creating Objects, Page Layouts, Record Types, Relationships, Validation Rules, Workflows, and Approval Process.
- Created Public Groups, Queues, Permission Sets, Profiles, Users, and Security Settings based on role hierarchy.
- Created the functional areas of Data management, Sales forecasting, Contacts, Leads, Campaigns, Opportunities, Quotes, Price book, Dashboards, and Reports.

Gulfstream Aerospace Corp. ERP BT Center, Savannah, GA USA Nov' 2014 to Dec' 2019 **Role: SAP BW Sr. Developer.**

- Working as SAP Analytics Architect for S4/HANA Conversion
- Responsible for identifying all the BW extractors that are currently used in BW
- Identifying deprecated extractors for all functional area
- Designing CDS views for deprecated extractors to bring data into BW
- Testing all BW extraction to make sure reports are working
- Working with BW on HANA Development objects like ADSO's, Composite Providers, SDA, Open ODS Views. Conducting discovery session for embedded analytics
- Redesigning the existing native HANA solution to adopt to S4/HANA data structures
- Worked on HANA AMDP SQL scripts, SQL Procedures. Worked on BW on HANA 7.5 Migration
- Created and Configure Data Stores in SAP BODS

Sanofi-Aventis, Bridgewater, NJ USA

Sep 2013 to Sep 2014

Role: SAP Sr. BW Consultant

- Extensively involved in Requirements gathering, data MODELING, testing and end user training.
- Adopted the SAP agile development methodology
- Translating Functional Specifications into Technical Specifications
- Created Executive Dashboards and Reports using the latest SAP Design Studio.
- Created Design Studio, Analysis office for Excel reports
- Created Jobs do the periodic extractions using BODS.
- Hands on SAP HANA Data provisioning technology including SAP LT Replication Server
- Generated HANA Views using the BW MODELS

Nine West & JAG, NY, USA

Sep 2006 to Aug 2013

Role: SAP Sr. BW Consultant

Responsibilities:

- Involved in analysis, design and development of Sales and Billing extract for external systems.
- Involved in design and development of reports in cost center analysis.
- Involved in development of new Universes, maintaining existing universes. Developed Standard, Ad-hoc Webi reports, Crystal reports.
- Apply Data modeling best practice to existing BW environment to get better query performance
