SUMMARY

Senior Software Engineer with 10 years of experience, currently at Smartsheet, previously at Impact Healthcare and Walmart, building scalable web applications. Experienced in React, TypeScript and Node.js with a strong background in frontend development, full-stack solutions and AWS. Focused on improving UI performance, accessibility and backend integration. Proven ability to align technical efforts with business goals, lead engineering teams and drive meaningful improvements in fast-paced environments.

SKILLS

React, React Native, JavaScript, TypeScript, HTML, CSS, Material-UI, Next.js, Vue, Angular, jQuery, Node.js, Express.js, Python, Java, PostgreSQL, MongoDB, MySQL, GraphQL, RESTful API, Jest, Cypress, Mocha, JUnit, AWS, Azure, Github, CI/CD, Jenkins, Docker, Kubernetes

PROFESSIONAL EXPERIENCE

Smartsheet, *Senior software engineer*

03/2020 – present

- Spearheaded the creation of Smartsheet's WorkApps, designing and optimizing complex frontend architectures to support large-scale, data-driven applications using React, Next.js, TypeScript, Node.js and AWS.
- Improved frontend performance, reducing page speed by 23% through React optimizations, lazy loading and caching strategies.
- Transitioned to a micro frontend architecture, cutting deployment time by 28% and improving maintainability.
- Developed a scalable UI library using Material-UI, standardizing components, improving design consistency and accelerating development across teams by 35%.
- Built backend microservices in Python and Node.js, leveraging MongoDB for high-performance, document-based data storage.
- Refined API integration, reducing data load times by about 25% and improving system responsiveness.
- Implemented GraphQL caching strategies, enhancing API response speed and optimizing data fetching.
- Redesigned the authentication flow using OAuth and JWT, strengthening security and authentication by 23%.
- Automated CI/CD pipelines using GitHub Actions and AWS Lambda, increasing deployment reliability.
- Integrated real-time collaboration features using WebSockets, improving team efficiency.
- Managed and guided a team of 6 engineers in developing new features for enterprise customers, ensuring a seamless user experience.

Impact Healthcare, Full stack engineer

12/2016 – 02/2020

- Developed TeleCare+, a secure telemedicine platform powered by React, TypeScript, Django and AWS, improving patient-doctor interactions with real-time video, messaging and scheduling.
- Migrated legacy systems from jQuery to React and TypeScript, reducing frontend defects by 40% and improving maintainability.
- Constructed a real-time messaging system using WebSockets and Firebase, improving doctor-patient communication efficiency by 33%.
- Refactored Java-based backend services for improved scalability and reduced response times in the Electronic Health Records (EHR) system.
- Optimized AWS Lambda functions, improving healthcare data processing speed by 58%.
- Enhanced database query performance, reducing query execution time by 42% through PostgreSQL indexing.
- Collaborated with cross-functional teams, including designers and backend engineers to enhance system efficiency and user experience.

Walmart, Front-End engineer

09/2015 – 11/2016

- Revamped a high-traffic e-commerce UI, improving site performance and accessibility for millions of daily users.
- Streamlined React rendering and asset bundling, enhancing homepage performance by 35% and increasing customer engagement.
- Refactored UI components, improving reusability across multiple product categories and reducing development time by 25%.
- Crafted a highly accessible and responsive UI, increasing mobile conversions by 19%.
- Structured a scalable CSS framework, reducing stylesheet size by 30% and improving maintainability.

** EDUCATION**

Bachelor of Science in Computer Science

2011 – 2015

California State University

** CERTIFICATES**

- React Developer Professional
- Certified JavaScript Developer
- AWS Certified Solutions Architect
