VALIDATION ENGINEER

Extensive experience ensuring that systems and quality procedures adhere to system requirements and perform properly and consistently. Proficient at developing and executing validation protocols for equipment and processes and analyzing test data to determine whether systems or processes have met validation criteria. Competencies include:

Test Management | Defect Tracking | Data and Document Validation
Application Security | Regression Testing | Root Cause Analysis | Defect Tracking

SELECTED ACCOMPLISHMENTS

- Spearheaded QA and validation for multiple high-stakes software rollouts, achieving 100% on-time delivery.
- Played a key role in transitioning legacy systems to next-generation platforms. - Successfully performed over 38 User Acceptance Tests (UATs) as the UAT Team Lead for more than 22 Sponsors, ensuring smooth project delivery and client satisfaction.

PROFESSIONAL EXPERIENCE

IQVIA, Durham, NC

December 2018 - January 2025

Senior Validation Engineer

Developed and executed comprehensive test plans to ensure system performance and compliance with regulatory requirements. Developed and maintained comprehensive validation documentation, including traceability matrices, issue logs, validation reports, validation plans, and validation strategy reports, ensuring compliance with SDLC standards.

- Collaborated with cross-functional teams to deliver over 80 client projects (including: Johnson & Johnson, Novartis, and AstraZeneca), meeting stringent deadlines with a 100% success release rate.
- Developed and implemented testing procedures utilizing advanced tools to enhance efficiency and reliability while ensuring compliance with Corporate SDLC standards.
- Mentored 6 junior engineers, fostering skill development and team growth.
- Utilized programming expertise (C++/C#, SQL) for custom system upgrades and performance optimization

ERT | iCardiac | nSpire Health, Longmont, CO

June 2016 - October 2018

Validation Associate

Conducted simulation and debugging of custom software for respiratory and ECG medical devices. Automated test scenarios using tools like TestComplete and Visual Studio.

- Identified performance bottlenecks and optimized validation strategies to improve system throughput.
- Automated testing processes using advanced tools, achieving high efficiency and reliability.
- Coordinated system integrations and validated custom upgrades in collaboration with global teams.

MILITARY EXPERIENCE

US Navy, Lemoore, CA

September 2006 - September 2011

Aviation Electrician (E-5 Rank)

Led maintenance and quality assurance for 12 multimillion-dollar aircraft electrical hardware and software systems. Performed diagnostics, troubleshooting, and repairs on advanced avionics and electrical components in accordance with DO-178C standards.

- Supervised and trained personnel in systems inspections and compliance.
- Ensured 12 F/A18F aircraft's readiness and reliability for critical missions and deployments for VFA-41.

Commendations:

- Letters of Accommodations for deployment and air show participation.
- Good Conduct Award.

EDUCATION

Bachelor's Degree – Computer Information Systems

DeVry University, Westminster, CO

TECHNICAL SKILLS

- Debugging and Performance Testing
- C/C++/C#, Python, Perl
- Tools: TestComplete, Visual Studio, VCS, SpiraTeam, JIRA
- Scripting and Automation: Python, PERL, Selenium
- Performance Analysis and Optimization
