👤 PROFILE

Diligent Oracle Database Administrator (DBA) with over 5 years of experience seeking to support and contribute with skills as an Oracle Database Administrator with a strong background in database design, implementation and optimization. Skilled in analyzing system requirements and translating them into technical specifications. Proven track record of enhancing database performance and reliability while ensuring data integrity and security. Adept at troubleshooting and resolving complex database issues, providing solutions that meet business needs. Excellent communication and collaboration skills, enabling effective interaction with cross-functional teams and stakeholders. Committed to staying updated on the latest database technologies and best practices to deliver high-quality results.

🏢 EMPLOYMENT HISTORY

Oracle Database Consultant at Charles Technology, Dallas, Texas

January 2024 to present

Engaged in comprehensive database management tasks, focusing on performance monitoring and troubleshooting using Oracle Enterprise Management (OEM) and Automatic Workload Repository (AWR). Played a key role in cloning databases and establishing procedures to migrate and refresh databases between different environments. Resettled high-watermark by deallocating unused data blocks.

Oracle Database Administrator at Albany County Hall of Records and Archives, Albany, NY

December 2019 to January 2024

Monitored and optimized database performance while performing regular maintenance task. Developed technical procedures and administrative policies for database management, ensuring security and reliability. Performed de-segmentation to improve database performance.

Oracle Database Consultant at Consulting Firm, Albany, NY

August 2015 to December 2019

Provided expert guidance and support for the design, implementation, and management of Oracle Databases. Collaborated with clients to understand their specific requirements and tailored solutions to meet their needs. Conducted performance tuning and optimization to enhance database efficiency and reduce downtime.

Oracle DBA Junior at National Independent Electoral Commission, Kinshasa, DR Congo

February 2012 to June 2014

Installed and configured oracle database software while managing upgrades and applying critical patches. Designed and secured databases that met user requirements for transaction processing.

EDUCATION

Masters of International Affairs, State University of New York, Albany, NY

August 2018 – May 2021
