

KADE ABSAL

Senior Software Engineer - Full Stack

@ live.kadeabsal@gmail.com github.com/livekode [Fairfax, VA](#)

SKILLS

Python · Django · Flask · FastApi ·
Node.js · React.js · JavaScript ·
TypeScript · Next.js · Vue.js · SQL ·
MySQL · PostgreSQL · MongoDB ·
AWS · Azure · GCP · Jenkins · Docker ·
Kubernetes · Scrum · Git · Trello · Jira

EDUCATION

BS Computer Science

-

PROJECTS

Concentrix

Python (Django, Flask), React, PostgreSQL and AWS

Concentrix provides technology-driven services to enhance customer experiences & business performance.

<https://www.concentrix.com/>

Center for Open Science (COS)

Python (FastAPI), React/Vue.js, Elasticsearch, Jenkins and kubernetes.

Center for Open Science promotes transparency and accessibility in scientific research.

<https://www.cos.io/>

Capstone Integrated Solutions

Python (Django), React, GraphQL, MySQL, AWS, Docker

Capstone-IS develops advanced software and solves complex problems for various industries like healthcare and retail, etc.

<https://www.capstone-is.com/>

ABOUT ME

A creative problem solver, skilled in delivering efficient and scalable solutions across web applications and system development blending back-end (Python) and front-end (React.js/Next.js) expertise. With 7 years of experience as Full Stack Developer, I excel at solving complex challenges and optimizing performance. Driven by innovation & adaptability, thriving in fast-paced environments, and turning ideas into impactful technology.

EXPERIENCE

Senior Full Stack Engineer

02/2022 - Current

Innovate Solutions

- Developed and maintained scalable back-end systems, reducing maintenance efforts and ensuring long-term efficiency.
- Worked closely with UI/UX teams to implement conversion-focused designs, increasing user engagement by 25%.
- Optimized database queries indexing strategies that reduced response time by 17%, and improved data integrity.
- Ensured seamless integration between front-end and back-end components, enhancing system scalability and maintainability.
- Diagnosed and resolved complex bugs and performance issues, reducing critical errors by 30% and improving system stability.
- Implemented caching and optimization techniques, decreasing load times by 15% and enhancing responsiveness.
- Implemented best security practices through authentication, authorization, and data protection measures.

Full Stack Engineer

07/2020 - 02/2022

PL Inc.

- Built and maintained web applications, improving performance and user experience.
- Designed clean, responsive user interfaces using modern frameworks; React.js, Next.js, etc., making navigation smoother.
- Optimized backend processes and database queries, reducing load times by 30% and improving overall system efficiency by 25%.
- Troubleshoot and fixed bugs, ensuring a stable and reliable application for users.
- Developed and integrated RESTful APIs and GraphQL endpoints to improve data flow between services.
- Worked closely with designers and product teams to deliver features faster and more efficiently.

Software Engineer

03/2018 - 07/2020

Turing

- Contributed to backend logic, allowing seamless customization and feature expansion.
- Planned and built scalable APIs to support smooth communication between front-end and back-end systems.
- Created dynamic UI components with a focus on responsiveness and user-friendly interactions.
- Helped managing database architecture, optimized queries, and ensured data consistency across applications.
- Integrated third-party services and tools to enhance application functionality and performance.
- Collaborated with cross-functional teams to troubleshoot issues and improve system efficiency.
