Phone no- +1 (669) 249-0290

Over 12 years in IT, specializing in Software Quality Assurance. Skilled in automated testing (Playwright, Selenium, TestNG, Cucumber), API testing (Postman, RestAssured), performance testing (JMeter), and SQL-based data validation (SQL management studio, DBeaver). Experienced with AWS, Tableau, CI/CD (Jenkins), GitHub and Agile/Kanban methodologies. Proven ability to lead QA teams, define test strategy, and deliver high-quality releases.

EXPERIENCE

S&P Global — QA Lead

SEP 2017 - September 2025

- Lead QA strategy and test planning for **Financial Analytics Web Platform**. Defined scope for functional, non functional, integration, regression and performance testing.
- Mentored a team of 5+ QA engineers: reviewed test cases, conducted code reviews of automation scripts, and provided hands-on training on new tools (e.g., migrating from TestNG to a hybrid TestNG–JUnit5 setup).
- Built reusable automation frameworks in Java and Python using Selenium, TestNG, Playwright, and Cucumber BDD to support cross-browser testing and improve collaboration through Gherkin-based scenarios.
- Designed and maintained Selenium–TestNG automation framework with Page Object Model; integrated into Jenkins pipelines. Increased Automation coverage from 35% to 75% within six months.
- Designed and executed end-to-end API test suites using RestAssured; validated JSON/XML payloads, HTTP status codes, and schema compliance against Swagger and postman.
- Performed web-application performance and load testing with JMeter: created test plans, configured thread groups, monitored response times, and generated throughput/bottleneck reports that helped improve average page-load time from 5.5 seconds to 2.1 seconds.
- Validated system resilience through failover, failback, and auto-scaling testing across cloud environments to ensure high availability and seamless recovery under load
- Validated backend data using advanced SQL queries; performed schema debugging with DBeaver and Visual Studio.
- Managed test execution and reporting in Azure DevOps (ADO); tracked defects and linked them to user stories and requirements.
- Integrated GitHub Actions with Jenkins for automated build and test pipelines

SKILLS

Languages & Frameworks:

Java, Selenium WebDriver, TestNG, Cucumber (BDD), Playwright, Python, RestAssured,, Webservice API's

API & Performance Testing:

Postman, JMeter, Swagger, Failover and Failback, Autoscaling testing

Sql management, DBeaver, visual studio, ADO(Azure dev ops), Jenkins, GitHub

Cloud & Tools: AWS (EC2, S3), ServiceNow, Tableau

Test Methodologies: Manual Testing, Automation (POM, data-driven), BDD

AWARDS & CERTIFICATIONS

ISTQB Certified (Agile Tester & Foundation level)

CI India Tech & Data GSD Award Winner Q2-2023

Best team player Q3 - 2024

Best Culture Q2 - 2023

- Deployed test environments on AWS EC2; validated S3 bucket integrations for file storage workflows.
- Defined QA strategy covering functional, regression, integration, performance, and security testing(DVA, SVA, PEN test).
- Championed shift-left testing by embedding QA checkpoints in early development phases, reducing defect leakage by 40%.
- Coordinated daily defect triage meetings, liaising with developers and product owners to prioritize critical issues; ensured timely regression testing of fixes and deliver quality product on time during deadlines.
- Maintained ServiceNow tickets for production incidents, tracked deployment timelines, and communicated QA metrics (pass/fail rates, defect density) via dashboards.

ZenQ, Hyderabad — Senior Test Engineer

SEP 2016 - SEP 2017

- Owned quality for a web-based enterprise insurance-claims processing application: designed test strategy, wrote detailed test plans, and defined entry/exit criteria for each sprint.
- Set up the automation environment (Eclipse + Java + Selenium WebDriver + Cucumber): designed Page Object Model classes for core modules (policy management, claim submission, user administration).
- Performed backend data validation in SQL Server: verified referential integrity between Claims and Policy tables; wrote stored procedure-based queries to check edge-case data.
- Conducted JMeter-based performance tests and SQL Server data-validation queries

ComTec Information Systems, Hyderabad — Test Engineer

NOV 2013 - AUG 2016

- Designed and executed manual test cases (functional, compatibility, regression) for web and client/server apps
- Logged defects, verified fixes, and ensured cross-browser/platform compatibility
- Assisted in automation efforts with simple Selenium scripts; performed backend testing via SQL queries

SOFT SKILLS

Strong leadership, stakeholder communication, team mentorship, cross-functional collaboration to drive quality ownership and delivery.

EDUCATION

**Jawaharlal Nehru
Technological University,
Hyderabad — Bachelor of
Technology, Computer Science &
Engineering**

2009 - 2013
