

KEVIN SUCHETAN TUPILO CLEMENT

☎ +1 (945)-274-8194 | ✉ kevinsuchetan037@gmail.com | 🏠 Kansas City, MO, 64111

Professional Summary

- Enthusiastic web developer with hands-on experience in modern JavaScript frameworks (React.js, Angular.js, Express.js) for building dynamic and responsive web applications.
- Skilled in HTML, CSS, Bootstrap and JavaScript, with a strong understanding of web accessibility principles and UI/UX optimization.
- Experience integrating RESTful APIs with frontend applications, ensuring seamless data flow and interactivity.
- Familiarity with headless CMS platforms and a strong interest in exploring headless web development concepts.
- Proficient in Git and version control systems, with experience working in collaborative development environments.
- Exposure to CI/CD pipelines using GitHub Actions and Jenkins, streamlining development and deployment workflows.
- Strong problem-solving skills and attention to detail, ensuring high-quality web solutions.
- Effective communicator and team player, experienced in project management using Basecamp for client communication and collaboration.

Experience

University of Missouri - Kansas City, MO

Student Teaching Assistant

Aug 2024 – Dec 2024

- Guided students in developing and deploying RESTful APIs using Node.js for efficient communication between web applications and backend services.
- Assisted students in designing and implementing full-stack applications using React.js for frontend development and Node.js for scalable backend solutions, focusing on component-based architecture and state management.
- Taught students best practices in frontend optimization, web accessibility, and responsive design to enhance user experience.
- Supported students in integrating React.js applications with APIs, including headless CMS platforms and GraphQL, to build dynamic, data-driven interfaces.
- Helped students implement CI/CD pipelines with Jenkins and GitHub Actions, streamlining development, testing, and deployment workflows.
- Provided guidance on Git-based version control and collaborative development using GitHub, ensuring efficient code management.

Technook - Remote

Data Science Intern

Mar 2022 - Apr 2022

- Scraped and processed **over thousands of web records**, increasing data availability for business intelligence use cases.
- Optimized data cleaning and transformation pipelines, **reducing processing time by 35%** and improving data accuracy.
- Improved data structuring methods, **leading to a 20% boost** in model performance for predictive analytics projects.
- Developed data ingestion workflows that integrated seamlessly into the company's existing infrastructure, **reducing manual intervention by 50%**.

VNR Vignana Jyothi Institute of Engineering and Technology - Hyderabad

Web Development Intern

July 2021 - Feb 2022

- Developed and maintained the Campus COVID Tracker Website, a web-based platform for tracking COVID-19 cases and safety measures within the institution.
- Built RESTful APIs using Express.js and Node.js to handle real-time data exchange between the frontend and backend systems. Designed and implemented responsive UI components using React.js.

- Integrated the application with MongoDB for efficient data storage and retrieval, optimizing query performance.
- Deployed and managed the website using CI/CD pipelines with Git, Jenkins, and Docker, streamlining the development workflow.
- Ensured web accessibility compliance by following best practices in HTML, CSS, and JavaScript.
- Gained hands-on experience with Basecamp for project management and client communication.

Academic Projects

- [Applicant Credentials Tracker for Employment using Blockchain Technology](#) | *React.js, Node.js, Web3, Solidity*
 - The developed system stores the employment status of a job-seeking candidate, the employee's performance appraisals, references of the previous employers thereby avoiding third-party interference in candidate credential verification.
 - Role: Implemented the frontend by using ReactJS and backend by writing smart contracts.
- [GamerGenix using AngularJS](#) | *HTML, CSS, Angular JS, Node JS*
 - A web application that contains various games and users can choose games based on a particular genre.
 - Role: Implemented games component, Home Page, routing module and Backend on the site.
- [Smart Charity Decentralized Application](#) | *React JS, Node JS, Solidity, Ethereum & Ganache*
 - A transparent charity system run using smart contracts on Ethereum and ReactJS, allowing users to donate to charities using cryptocurrency and also making international transactions easy.
 - Role: Have handled the frontend and backend by writing smart contracts and UI using ReactJS

Certifications

- **MEAN Stack Development:** Certified in MEAN and MERN stack development offered by industry trainer (Cognizant) at VNR VJIT.
- **Python:** Certification in **Py Basics & Py Data structures** offered through Coursera by the University of Michigan.
- **Google Data Analytics:** Certification in **Specialization: Data Analytics by Google (8 courses)** offered through Coursera.
- **Big Data Computing:** Certification in **Big Data Computing** offered through NPTEL.
- **Data Science:** Certification in **Data Science** offered through Teachnook.

Technical Knowledge

- **Web Development:** Proficient in **HTML, CSS, and JavaScript**, with experience in **Bootstrap** for user-centered design. Experienced in **ReactJS and AngularJS** for building responsive and interactive web applications.
- **Information Security:** Proficient in security protocols like encryption and vulnerability assessments. Working Knowledge in implementing security solutions to protect sensitive data and counter cyber threats.
- **Data Structures and Algorithms:** Good knowledge of data structures and algorithms, and the ability to implement them in various programming languages.
- **Database Management Systems:** Familiarity with database concepts and terminology, and basic experience with SQL and NoSQL technologies for database design, implementation, and maintenance.
- **Data Science:** Working knowledge on Parsing HTML and XML documents using the BeautifulSoup library.
- **Machine Learning:** Familiar with Scipy, Scikit-learn, Pandas, Seaborn, Matplotlib, and Numpy.

Education

Master of Science: Computer Science	2025
University of Missouri - Kansas City, MO	CGPA: 3.96/4
Bachelor of Technology: Computer Science and Engineering	2023
VNR Vignana Jyothi Institute of Engineering and Technology - Hyderabad, IN	CGPA: 8.54/10
