

Koushik Kampa

Lead **SAP FI-CO** Consultant/Analyst

Ph:331-226-7867 || Mail: koushikkampa7@gmail.com || [LinkedIn](#)

Professional Summary

- SAP FICO Consultant with over 11 years of experience specializing in **SAP FICO** and **Vertex tax engine** integration. Proven ability to configure, test, and support **SAP Vertex** for accurate tax calculations, tax compliance, and financial reporting across multiple SAP modules, including **AR, AP, and GL**.
 - Three full life cycle ERP implementations including Accelerated SAP (ASAP), Business Process Re-engineering, Feasibility Analysis, System Design, Configuration, Reports, and Testing (**RICEFW**).
 - Extensively involved in studying, analyzing Business Processes, understanding the “**As-Is**” process and modeling the “**To-Be**” process.
 - Analyze the Customer's Business Requirements, needs and objectives and map them to the processes, solutions and products that are being implemented.
 - Experience in supporting SAP Supply Chain Management integrations, with exposure to SAP APO modules such as Service Parts Planning (SPP), Demand Planning (DP), and Supply Network Planning (SNP). Familiar with demand capture, forecasting, inventory planning, and ECC-APO integration. Hands-on experience collaborating with cross-functional modules like SD, MM, and EWM in planning lifecycle scenarios.
 - Excellent Financial Accounting expertise in Configuring & Testing **FI-GL, FI-AP, FI-AR, and FI-AA** in highly Complex Business Environment.
 - Thorough understanding SAP R/3 **FI/CO** module configuration, support & maintenance functions as well as the **integration** with **PP, MM (and SRM), IM, SAP Media** and **SD** modules. Good knowledge of Material Ledger.
 - Knowledge of **revenue recognition, account determination, Taxation** (multiple currencies) and **pricing procedures** in FI- SD integration.
 - Experience in configuration and other aspects of **Asset Accounting** and **PS** (project systems) module.
 - Worked with BW/BI teams for reporting and enhancing existing reports. Working knowledge of NetWeaver.
 - Working knowledge in configuring and implementing of **Lockbox, LSMW, CATTS, and Transaction recorder**.
 - Experienced with implementation of audit controls, defining user profiles and authorizations and addressing segregation of duties issues related to Sarbanes Oxley (**SOX**).
 - Good working knowledge in **ALV, ALE, EDI, and IDoc's**.
 - Expertise in development of reports/drill-down reports using **Report Painter** and **Report Writer**.
 - Proficient planning, **GAP** analysis, design implementation, troubleshooting, performance tuning support, **UAT** (user acceptance testing), **UIT** (user integration testing), and **user training** of SAP FI/CO.
 - Experience in using **TAO, Mercury Quality Center and HP quality center** for testing and **Solution Manager** for business process documentation.
 - Expertise in analyzing workflows, gathering requirements and writing **BPP's** (Business process procedure), **Use cases**, and **Test script** as per requirements.
 - Experience in using **SQL** and **SAP BODS** for migration of data from legacy system to SAP
 - Excellent Interpersonal, organizational, and Communication skills and highly motivated team player with creativity to work towards realizing the defined goal and targets.
 - Expertise in SAP S/4HANA implementation and migration, including integration with emerging SAP technologies like SAP Analytics Cloud and SAP BW/BI for enhanced reporting and analytics.
 - Proven ability to lead cross-functional teams, collaborate with stakeholders, and deliver projects on time while meeting business objectives.
 - Strong experience in multi-country implementations with configurations for multi-currency environments, tax procedures, and compliance with standards like SOX and FERC.
 - Proficiency in configuring advanced functionalities such as New GL (IFRS), product costing (CO-PC), lockbox processing, electronic bank statements (EBS), and automatic payment programs (APP)
-

Technical Skills

Category	Skills
SAP Modules	FI-GL, FI-AP, FI-AR, FI-AA, CO-PA, PS, MM, SD, PP, IM, QM, APO (DP, SNP) Vertex Tax Engine
SAP Technologies	SAP ECC 6.0, SAP S/4HANA, SAP Fiori, SAP UI5, Fiori Apps for Finance, SAP Media, SAP BW/BI, SAP NetWeaver, SAP PSM-FM
Integration	ARIBA, EDI, ALE, IDoc's
Methodologies	ASAP, BPR, RICEFW
Data Migration	LSMW, SQL, SAP BODS
Testing Tools	HP Quality Center, TAO, Solution Manager
Reporting	Report Painter, Report Writer, ALV
Compliance	SOX, FERC standards
Other SAP Tools	Lockbox, CATTS, Transaction Recorder, Vertex
Languages/Databases	SQL
Project Management	Business Process Analysis, Requirements Gathering, User Training

Professional Experience

Optum, Addison, TX

Jul '23 – till date

SAP FICO Lead

Environment: SAP ECC 6.0, SAP S/4HANA, SAP BW, SAP Analytics Cloud (SAC)

Responsibilities:

- Configured and optimized **SAP Fiori applications for Finance (FI-AP, FI-AR, FI-GL, Asset Accounting, and Treasury)** to improve user experience and workflow automation.
- Worked with SAP Fiori Launchpad to enhance **user navigation, role-based access, and real-time reporting** in S/4HANA
- Collaborated with technical teams to customize **Fiori apps for Accounts Payable (Vendor Invoice Management) and Order-to-Cash processes.**
- Worked on FI configuration for vendor payments (AP) and integration with MM
- Integrated SAP Fiori with **FICO dashboards for financial closing, cash flow management, and reporting automation.**
- Integrated **SAP Vertex tax engine** within the **SAP FICO** system for **Accounts Receivable (AR), Accounts Payable (AP), and General Ledger (GL),** automating tax calculations for sales tax, VAT, and use tax across the business.
- Configured **tax code settings** in **Vertex** to handle various tax scenarios, ensuring accurate tax determination in **SAP FICO.**
- Collaborated with developers and cross-functional teams to resolve discrepancies in **tax calculations** and **tax reporting.**
- Conducted **training** and **knowledge transfer** to key users on how to use **Vertex** for accurate tax reporting and compliance.
- Led **Fiori-based workflow optimizations for journal approvals, purchase requisitions, and payment approvals** to streamline finance operations.
- Implemented SAP Fiori applications for **real-time finance tracking, KPI reporting, and period-end closing automation.**
- Worked with PI team for cash management processes involving EBS, ACH and wire transfers
- Configuration of COPA module for both accounts based, and cost based, and flow of values from FI, SD and MM modules

- Involved in FI-MM and FI-SD integration for PTP and OTC cycles respectively
- Involved in FUT (functional unit testing), UAT (user acceptance testing) and FIT (functional integration) testing
- Designed and implemented **SAP BW** reporting solutions for financial data, facilitating timely and accurate reporting for budgeting and forecasting cycles.
- Developed **SAP Analytics Cloud (SAC)** reports for consolidated financial views, allowing finance teams to make strategic decisions based on real-time data analysis.
- Day-to-day meetings with business personal in understanding the current business processes to achieve the same in SAP
- Conducting interviews with regulatory accounting and general accounting business personal to capture SOX and FERC standard reporting requirements
- Preparation of integration documents across multiple modules (PM, SD and MM) with which FICO and PS integrate

Wells Fargo, NYC, NY

May '20 – Jun '23

FICO/AA consultant

Environment: SAP ECC 6.0, SAP S/4HANA, SAP Media, SAP Analytics Cloud (SAC)

Responsibilities:

- Implementation of SAP in different regions (Latin America, Europe and America) involving FICO integration with PS, SAP Media, MM and SD.
- Supported the integration of **Vertex tax engine** with **SAP FICO**, ensuring timely and accurate reporting of taxes on sales and purchases for regulatory compliance.
- Configured **tax jurisdictions** and managed **tax rate tables** in **Vertex** to comply with state and federal tax regulations.
- Led testing efforts for **tax calculation validation** using **Vertex**, ensuring accurate tax filings and reports.
- Worked closely with APO team on cost-related planning components, ensuring accurate integration of SAP FICO with Demand Planning (DP) and Supply Network Planning (SNP).
- Participated in the configuration review of CIF integration for master data and transactional data consistency between ECC and APO.
- Involved in validating settlement rules and planning cost elements that impacted the product cost simulation and profitability analysis across multiple scenarios.
- Supported integration touchpoints between SAP FICO and APO modules (SPP and DP), contributing to configuration support for forecasting, planning, and procurement execution. Assisted in validation of ECC master data synchronization with APO Core Interface (CIF) and collaborated on deployment strategies involving DRP and GATP logic.
- Configuration of Asset accounting for more than 20 countries with different books of depreciation
- Configuration of period control and multi-level methods for the calculation of Tax depreciation
- Configuring functional changes to G/L accounts, company codes (country specifications), intercompany transactions and other code block elements
- Leveraged **SAP BW** for financial data reporting, helping stakeholders with automated and accurate reporting solutions across global regions.
- Created real-time dashboards and performance reports in **SAP Analytics Cloud (SAC)** for key decision-making, supporting business leaders in finance and operations.
- Integrated **SAC** with **SAP FICO** to provide profitability and cost analysis, enabling faster insights into operational efficiency and cost management.
- Involved in business requirement change request to accommodate the different depreciation and tax procedures for Asset Management in different countries
- Worked on accounts payable (**AP**) and accounts receivable (**AR**) payments. Payments include PTP and OTC processes through automatic payment methods.
- Worked on revenue recognition and pricing procedures for customer billing documents
- Worked on ARIBA procurement process software integration with SAP PTP processes
- Creation of Invoice/Credit memo through scanned documents
- Consultation with users to determine business processes and application development /enhancement requirements and serving as their contact by ensuring requirements are communicated accurately to key stakeholders with the progress.
- Configuration of multiple currencies and tax procedures for customer accounts and interface development for taxes from

SABRIX

- Customization of T-Codes and tables including enhancements and user defined fields with the help of technical teams
- Worked on deployment of configuration changes into production environment after testing
- As an RTR team member involved with PTP and OTC teams to get the integrated functionality go through smoothly in a timely manner
- Month end and Year processes documentation and testing for different countries (Latin America, Europe, and USA) which involve asset depreciation, balance carry forward and reporting
- Production support for Latin America post go-live
- Development of test scripts and user training material for integration and UAT environments using HP ALM.

State of Wisconsin, Madison, WI

Feb '17 – Apr '20

FICO/PS Functional Consultant

Environment: SAP ECC 6.0, SAP BODS, HP Quality Center

Responsibilities:

- Worked as SAP Functional/Data consultant in ECC 6.0 implementing SAP, which involved the migration of data from the legacy system (Powerplant)
- Developed functional and technical specification for development of **RICEFW** objects according to the business requirement for **ABAP** development and for interfaces to Legacy applications
- Supported fund-based accounting and compliance reporting aligned with public sector frameworks such as **GASB and GAAP**
- Collaborated with public sector finance teams to structure **funds and grants**, and assisted in **budget control processes**.
- Provided inputs for **Funds Management (FM)** design and worked alongside the GM team for **grants budgeting and disbursement tracking**.
- Facilitated workshops and requirement-gathering sessions with **state government finance stakeholders** to align SAP FICO solutions with statutory and compliance needs.
- Configured and managed **Asset Accounting** in alignment with fund assignments and capital projects, ensuring transparency for audit and compliance reporting.
- Worked hands in with offshore team by giving requirements for source to target mapping and analyzing data according to functional specifications
- Worked with P&D teams of different modules in integration of **FICO** with **PS, PM, SD** and **MM**
- Configured and worked on designing number range and order type logic for both internal orders and plant maintenance orders
- Configuration of IO, PCA and CCA to settle costs from different modules
- ET (extraction and transformation) analysis of objects according to FS
- Documentation of reports using standard SAP reports for PM module
- Worked in migrating data using **LSMW, SQL** and **SAP BODS** (Business objects data services) software
- Worked with **HP quality center** to raise and close defects based on their area of concentration and automation testing using **TAO**
- Conducted meetings with different business unit members for understanding implementation/integration of different modules and mentored members of the team on best practices of SAP configuration and customization

Verizon, New York, NY

Dec '15 – Jan '17

FICO Functional Consultant/ Analyst

Environment: SAP ECC 6.0, SAP BPC, SAP Analytics Cloud, SAP BW

Responsibilities:

- Conducted interviews with users to gather requirements and to understand the workflow of the as-is system and to design the To-be solution.
- Conducted GAP analysis, documented the findings, assessed scope of studies & suggested solutions through SAP for implementation and customizations.
- Involved in configuration and coordinating data flow within AA, GL, AP, AR including Tax and multiple currencies.

- Configured PCA, CCA and IO including distribution and assessment cycles
- Worked with PS team to integrate other modules with project systems and gained knowledge of cost objects used in PS (i.e. WBS elements, Production orders, and cost centers).
- Worked with SD, PP, IM, and MM teams for integration with FI and implementation of Quality Management (QM) of the project.
- Collaborated with SAP APO consultants during planning cycles to align controlling (CO) and profitability structures with demand forecasts and planned orders.
- Supported finance integration in SNP and PP/DS planning areas by ensuring master data accuracy for planning run and performance evaluations.
- Assisted in reviewing APO costing flows that impacted downstream settlement, profitability analysis, and material ledger valuation.
- Configured both costing-based CO-PA and account-based CO-PA, created characteristics and value fields, used various derivation techniques and rules, configured valuation using product costing and costing sheet. Defined various reports.
- New GL configuration (IFRS) and the current ledger being set as leading ledgers and updated rules for the multiple ledgers for parallel accounting purposes and intercompany transactions and reconciliation
- Gained working knowledge of ARIBA network to incorporate the supplier information and process through SAP NetWeaver platform using different formats (cXML and EDI)
- Worked on deployment of transport once the tickets are resolved where necessary
- Configured and customized product cost planning (CO-PC) (material costing with quantity structure) and cost object controlling. These configurations and customizations involved costing variants, cost component structures, costing sheets, work-in-process, variances, scrap, result analysis versions, allocation structure for settlement, and PA transfer structure for settlement of variances to PA segments.
- Knowledge of BW/BI and working with reporting team for reports and enhancement of existing reports.
- Designed and developed contribution margin reports in CO-PA based on a combination of characteristics using Report Painter and Report Writer.
- Involved in testing, user training and post go-live support
- Configuration of Asset accounting (FI-AA) module, AP and AR in a multiple currency environment
- Involved in Integration of FICO-PS, FI-MM, FI-PP and FI-SD and implementation of QM (quality management).
- Involved in Revenue recognition, Account determination and pricing procedures while integrating SD and MM modules with FI
- Worked on New G/L, Special Purpose ledger for generating some reports as per the Client's requirement to fulfill intercompany transactions.
- Worked on master and transaction data of procurement processes for ARIBA interface
- Responsible for settings for automatic payment program and for interest calculation on account balances and line items.
- Worked on user exits and implementation of SAP notes
- Configuration of WBS and Network elements in PS and application of settlement rules
- Configured cost and profit centers, CCA/PCA allocations, primary and secondary cost elements, activities, statistical key figures and substitutions.
- Defined Distribution and Assessment cycles in Cost center accounting (CCA) and profit center accounting (PCA) for allocation of fixed cost to production cost center.
- Configured the Product costing (CO-PC) process order type and assigning settlement profile and Result analysis key and variances keys are assigned to process order for period end closing in product costing.
- In CO-PA Created operating concern attributes, characteristics and value fields, and activated. Valuation followed of condition tables, access sequence, condition types and condition techniques relating to pricing policies, in co-ordination with Sales and Distribution module.
- Involved in Transferring the CO-PA Planning Values to Profit Centers and Created and displayed the Profit Center Reports from the management perspective.
- Testing using HP quality center and automations testing using TAO, documented the processes, changes and trained the end-users.

SAP Functional Consultant

Environment: SAP ECC 6.0

Responsibilities:

- Facilitated numerous learning programs on new reporting systems.
- Provided technical assistance in identifying, evaluating, and developing systems and procedures that are cost effective and meet business requirements.
- Converted to new payroll and accounting systems that reduced and improved tax reporting.
- Directly involved in forecasting, planning, budgeting and coordinating the group of 7 people.
- Reported defects in the application through Defect Tracking System (DTS).
- Preparing Vouchers for all Cash Based Transactions, entering these transactions in Cashbook, and even Pass Journal Entries for all these Transactions.
- Responsible for cash management, cost accounting, budgeting, ADP payroll, period closing and financial statements for the association
- Tested the Generation of Reports in respect of Account Statements, Special Reports to Reflect Due-Date-Forecast Analysis, Purchasing/Sales lists, Open Item Analysis, Balance Sheet and Profit and Loss Account Statements.
- Configured settings in the GL, House Bank, Interest Calculation, Foreign Currency Exchange Rate and Valuation, GR/IR Clearing Account and Automatic Clearing to Suit Client Organization Parameters.
- Prepared configuration setting for Cross Company Code Transactions, Line-Item Display, and Open Item Processing for G/L, AR and AP.
- Configured settings in the GL, House Bank, Interest Calculation, Foreign Currency Exchange Rate and Valuation, GR/IR Clearing Account and Automatic Clearing to Suit Client Organization Parameters.
- Configured and customized SAP Asset Accounting (FI-AA) module for efficient fixed asset management and depreciation calculations.
- Developed and maintained user manuals and conducted end-user training sessions to ensure smooth adoption of new SAP functionalities.
- Collaborated with cross-functional teams to integrate FI/CO modules with other SAP modules such as MM, SD, and PP for streamlined business processes.
- Tested the Generation of Reports in respect of Account Statements, Special Reports to Reflect Due-Date-Forecast Analysis, Purchasing/Sales lists, Open Item Analysis, Balance Sheet and Profit and Loss Account Statements.
- Converted to new payroll and accounting systems that reduced and improved tax reporting.
- Directly involved in forecasting, planning, budgeting and coordinating the group of 7 people.
- Implemented and configured cost center accounting (CCA) and profit center accounting (PCA) for improved cost allocation and profitability analysis

Education

- Bachelor of Technology (CSE), Osmania University, India 2013
