

KRUPA PATEL CSM®

Certified Business Analyst/ Scrum Master

Krupapatel.ba@gmail.com | (706) 623-3192 | Macon, GA | [LinkedIn](#)

PROFILE

Versatile Business Analyst & Certified Scrum Master with **12+ years** of experience **spanning business analysis, Agile delivery, full-stack development, and enterprise digital transformation. Adept at bridging the gap between business and technical teams, driving cross-functional collaboration, and leveraging modern BI and AI tools to streamline operations, reduce costs, and improve delivery velocity.**

- **12+ years of experience** across Business Analysis, Scrum Mastery, and Full-Stack Development roles in fintech, SaaS, and e-commerce industries.
- Proven ability to **lead Agile teams**, facilitate Scrum ceremonies, and manage end-to-end SDLC in both Agile and hybrid environments.
- Strong command of **business requirement gathering**, stakeholder engagement, process modeling, and backlog grooming using JIRA & Confluence.
- Developed and maintained **BRDs, FSDs, UAT plans**, and KPI tracking tools for high-visibility business initiatives.
- Hands-on expertise in integrating **AI productivity tools (ChatGPT, Notion AI, Copilot)** for documentation, sprint planning, and process optimization.
- Former full-stack developer with solid technical acumen in **PHP, JavaScript, REST APIs, SQL, and cloud/DevOps tools**, enhancing BA-tech collaboration.

EDUCATION & CERTIFICATIONS

Master degree in Computer Science

DOEACC, India

Bachelor degree in Computer Science

South Gujarat University, India

- **Certified ScrumMaster® (CSM®)**
- **Scrum Fundamentals Certified (SFC)**
- **Generative AI for Business Analyst**
- **Boosting Time Management with AI Tools**
- **Agile® Project Management Certification**
- **Business analysis foundation**
- **Introduction to AWS for Non-Engineers: 1 Cloud concept**
- **Introduction to AWS for Non-Engineers: 2 Security**

WORK EXPERIENCE

Sr. Business Analyst / Scrum Master | CFA Institute | Virginia , USA

June 2023 – Current

- Lead dynamic daily stand-ups and sprint ceremonies to foster open collaboration, resolve blockers quickly, and ensure teams remain aligned with project milestones and product goals.
- Oversee all core **Scrum ceremonies**—including Sprint Planning, Daily Stand-ups, Reviews, and Retrospectives—ensuring iterative delivery and continuous team improvement.
- Collaborate with Product Managers and Delivery Managers to gather business and functional requirements and translate them into **refined user stories and acceptance criteria** in JIRA.
- Manage and prioritize the product backlog by facilitating grooming/refinement sessions and maintaining **traceability using JIRA and Confluence**.
- Coordinate cross-functional stakeholder alignment through **process mapping**, current vs. future state analysis, and impact assessment to support scalable solution delivery.
- Lead discovery workshops and **product jam sessions** with 100+ stakeholders, facilitating consensus on scope, KPIs, and MVP definitions.
- Utilize **SharePoint and Confluence** for centralized project documentation, requirements storage, and team-wide knowledge sharing.

- Owned the **RAID** log and Change Control Board; quantified risk impact/probability, set mitigation and contingency strategies, and maintained scope baselines for executive reporting.
- Built and maintained an integrated program schedule (**MS Project, Smartsheet, ADO**), mapped cross-team dependencies, tracked critical path/slippages, and drove recovery plans to ensure delivery.
- Supported **PI Planning** by facilitating program board creation, dependency mapping, and risk **ROAMing**; coordinated deliverables across **3–5 Agile teams**.
- Create and maintain visual process flows using **Lucidchart and Microsoft Visio** to support business process reengineering efforts.
- Integrate **AI tools (e.g., ChatGPT, Notion AI)** to improve documentation speed, meeting summarization, and backlog refinement, boosting productivity across remote teams.
- Generated Agile performance reports using **Jira dashboards and advanced filters**, tracking key metrics such as **velocity, burndown, and sprint throughput**, to deliver real-time insights for executive stakeholders.
- Lead **UAT coordination**, test case review, and sprint demos with end users to validate stories, identify gaps, and ensure functional requirements are met before release.
- Collaborated with Data Analysts and Engineering teams to define reporting requirements and streamline data sources, enabling the development of interactive Power BI dashboards for real-time KPI tracking and reducing manual reporting efforts by 30%.
- Defined and maintained **BRDs, FSDs**, and assisted developers for creating data **dictionaries** using **SQL**, aligning business objectives with technical implementation across multiple modules.

Technical Business Analyst / Sr. Software Engineer | FPT Software | Atlanta GA, USA

Sep 2020 – Oct 2022

- Worked as a dedicated **Technical Business Analyst / Sr. Software Engineer** for **Cox Automotive**, supporting platforms related to **vehicle listings, inventory management, and dealer operations**.
- Led **backlog grooming, sprint planning, and user story refinement**, ensuring that Cox Automotive's business requirements were well-documented, prioritized, and technically feasible.
- Facilitated key **Agile ceremonies** including **Sprint Planning, Sprint Reviews, Retrospectives, and Release Planning** to align team efforts with the client's digital transformation goals.
- Collaborated with **Product Owners** and **stakeholders** at Cox Automotive to convert high-level business needs into detailed **Epics, User Stories, and Acceptance Criteria** using **JIRA** and **Confluence**.
- Managed **production deployments** of features and bug fixes, executed **post-deployment validations**, and communicated cross-team impacts to ensure smooth delivery and minimal downtime.
- Acted as the primary liaison between **Customer Support Representatives (CSRs), product managers, and developers** to triage and resolve **support tickets**, improving turnaround times and customer satisfaction.
- Maintained clear and structured **technical and functional documentation** in **Confluence**, following Cox Automotive's standards for knowledge sharing and auditability.
- Supported **User Acceptance Testing (UAT)** by coordinating test efforts, reviewing results with stakeholders, and ensuring all releases met client expectations before production cutovers.

Business Analyst | Tiege Hanley | Chicago IL, USA

June 2019 – Feb 2020

- Served as a Business Analyst for a direct-to-consumer e-commerce platform, gathering and analyzing requirements to support the company's digital transformation and subscription-based growth strategy.
- Gather and document business requirements by preparing detailed **Business Requirements Documents (BRDs)** and **Functional Specification Documents (FSDs)** to guide development teams and stakeholders.
- Developed **business rules** for core modules including **referrals, prior authorization, eligibility, claims processing, and billing workflows**, implemented via a **business rules engine** to ensure process automation and consistency.
- Participated in **Agile Scrum ceremonies**, including **Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives**, while ensuring delivery of prioritized stories and tracking progress through **burn-up and burn-down charts**.
- Wrote and prioritized **user stories** and acceptance criteria, contributing to the **Product Backlog Grooming** process and aligning business needs with development tasks.
- Trained and mentored development teams in effective **JIRA** usage for **planning, task tracking, and Agile analytics**, improving team efficiency and accountability.

- Delivered ongoing **project presentations** and demos to management and end-users during key SDLC milestones, ensuring visibility and stakeholder alignment.

Business Analyst | iManage | Chicago IL, USA

Nov 2017 – May 2019

- **Gathered and analyzed business requirements** from cross-functional teams and transformed them into detailed functional specifications to support enterprise content management system enhancements.
- **Collaborated with product owners, QA, and development teams** to define **user stories**, acceptance criteria, and workflows in Agile/Scrum environments, ensuring timely and quality deliverables.
- **Led requirements workshops and stakeholder interviews** to identify pain points and system gaps, resulting in optimized document and email management processes.
- Developed **process flow diagrams**, **use case documents**, and **data mapping sheets** to facilitate communication between business and technical stakeholders.
- Utilized **JIRA**, **Confluence**, and **SharePoint** for issue tracking, project documentation, and collaboration, streamlining documentation and communication across project phases.

Software Engineer | Synoverge Technology Private Limited | India

July 2016 – Jul 2017

- **Developed and maintained dynamic WordPress and Magento e-commerce platforms**, including custom plugin/theme development and back-end enhancements using PHP, MySQL, HTML, and CSS.
- **Built MVC-based web applications** using the **CodeIgniter framework**, ensuring modular architecture and optimized performance across multiple client projects.

Web Developer | Indianic Infotech Limited, India

Apr 2012 – Mar 2016

- **Developed end-to-end web applications** for U.S.-based clients, from initial concept and architecture through deployment and maintenance.
- **Conducted detailed system analysis and technical documentation**, translating client requirements into functional design specifications.
- **Designed and implemented front-end interfaces** using **HTML, CSS, JavaScript, and PHP**, ensuring responsive and accessible layouts.
- **Led database and application architecture design**, optimizing performance and scalability for client-specific solutions.
- **Collaborated with cross-functional teams** to deliver projects within deadlines while adhering to coding and validation standards.

TECHNICAL SKILLS

Methodologies & Environments: Agile (Scrum, Kanban, SAgE), Waterfall, SDLC, DevOps Practices, Windows, macOS, Linux

Business Analysis & Documentation: BRD, FRD, SRS, User Stories, Use Cases, Wireframes, RTM, Process Flows, SWOT, Value Stream Mapping, BPMN, JAD Sessions

Project & Product Management Tools: JIRA (Advanced Roadmaps), Confluence, Asana, Rally, Trello, MS Project, MS SharePoint, Miro, Slack, Microsoft Excel (Power Query, Pivot Tables)

Programming Languages & Web Technologies: PHP, JavaScript, JQuery, AJAX, HTML5, CSS3, SQL, C, C++, REST APIs

Frameworks & CMS: CodeIgniter, Laravel, WordPress, Acquia (Drupal)

Database Technologies: MySQL, SQL Server, PostgreSQL, SQLite, Oracle DB, MongoDB (Basics)

DevOps & Development Tools: GitHub, Jenkins, Docker, Veracode, New Relic, Postman, Splunk

Visualization & Reporting Tools: Power BI, Excel Dashboards, Google Looker Studio, Google Maps

AI & Productivity Tools: ChatGPT, GitHub Copilot, Google Gemini, Gen AI, Grammarly

UI/UX & Modeling Tools: Microsoft Visio, Lucidchart, Figma, Adobe XD

Soft Skills: Leadership, Stakeholder Management, Communication, Critical Thinking, Time Management, Problem-Solving, Conflict Resolution, Team Collaboration
