

Krushika Gujarati

Sunnyvale, CA | krushika.gujarati@gmail.com | 4086036357 | <https://www.linkedin.com/in/krushikagujarati/>

Full Stack Software Engineer with 5 years of experience designing and delivering scalable web applications across fintech, IoT, and AI domains. Proven track record of improving system performance, reducing operational costs, and accelerating feature delivery. Skilled in **TypeScript (React, Angular, Next.js)**, **Python, Node.js**, and **cloud platforms (AWS, Azure, GCP)**. Adept at building production-grade AI integrations, optimizing workflows, and driving measurable business impact.

Experience:

Bay Labs, San Jose, CA | *Next.js, TypeScript, Tailwind CSS, Convex*

April 2025 – Present

- Delivered a secure document management platform serving enterprise users, reducing document retrieval time by **40%** and lowering support tickets by **25%**.
- Built a reusable UI component library that cut new feature development time by **30%**.
- Optimized front-end performance, improving page load speed by **45%** across desktop and mobile.

Flatirons AI, San Jose, CA | *Python, Django, Azure OpenAI, Semantic Kernel, RAG*

May 2024 – Sep 2024

- Built an AI-powered internal chat application tailored for compliance and financial use cases, leveraging Azure OpenAI for secure, enterprise-ready **LLM integration**.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline to enable context-aware, domain-specific question answering.
- Utilized Semantic Kernel to orchestrate custom function calling and modular AI workflows, enhancing chatbot flexibility and extensibility. Designed backend services in Django, integrating them with vector stores and secure APIs to ensure reliable, low-latency data access.

Arastu Systems, India | *Angular, Node.js, Express.js, D3.js, .NET Core, Google Cloud*

Jan 2020 – Aug 2023

- Designed and deployed a **Connected Kitchen IoT platform** with real-time smart device monitoring, scaling to **10k+ devices** and cutting device downtime by **20%**.
- Built “Just Trackers,” a logistics portal enabling real-time pickup tracking, reducing missed deliveries by **30%** and saving **100+ staff hours/month**.
- Created automated AEM cable-testing desktop app, generating multi-format outputs (PDF, CSV, plots), reducing QA cycle time by **50%**.
- Developed a custom warehouse RAMS interface in .NET Core, improving operational efficiency by **60%** and reducing manual input errors by **40%**.
- Deployed scalable solutions on Firebase and Heroku, supporting **24/7 availability** for enterprise clients.

Projects:

Twitter Clone | *React, Redux, Node.js, Express.js, Tailwind CSS, Material UI, Supabase*

- Built a Twitter-like platform with **2FA authentication**, Redis caching, and Supabase backend, supporting **5k+ simulated users** in load testing.
- Optimized state management to improve API response handling by **35%**.

ChatWithDoc | *Python, LangChain, OpenAI, Pinecone, Streamlit*

- Created an AI-powered PDF Q&A app with RAG pipeline, enabling **85% accuracy** on document-based queries.
- Integrated semantic search with Pinecone for sub-second vector retrieval.

Agriculture AI Chatbot | *Python, OpenAI API, MongoDB*

- Built chatbot answering real-time agriculture queries, reducing duplicate queries by **25%** via MongoDB caching.
- Designed architecture to support **1k concurrent sessions** without performance degradation.

Education:

Master of Science in Computer Software Engineering, San Jose State University

| San Jose, CA (2023-2025)

Bachelor of Engineering in Information Technology, Gujarat Technological University

| Gujarat, India (2016-2020)

Technical Skills:

- Languages & Frameworks: JavaScript, TypeScript, Angular, React, Node.js, Express.js, HTML5, CSS3, Python, Java, C++, C#
- Databases: SQL (MySQL, PostgreSQL, MS SQL Server), MongoDB, Vector DB
- Tools: Git, CI/CD, Visual Studio, Cursor, Postman, JIRA, PowerBI, Firebase, Confluence, Docker
- Cloud: AWS (EC2, S3, Load Balancers), Azure, GCP, Pinecone
