

PROFESSIONAL SUMMARY

Full-Stack Developer with 3.5+ years of experience designing and deploying scalable, user-focused web applications using **JavaScript, TypeScript, React, Next.js, Node.js, and Express.js**. Skilled in creating **RESTful and GraphQL APIs**, implementing secure authentication with **JWT and OAuth2**, and building robust systems optimized for performance. Proficient in **PostgreSQL, MongoDB**, and **AWS services** such as EC2, Lambda, API Gateway, and S3. Hands-on experience with **Docker, Kubernetes**, and **CI/CD pipelines** using **GitHub Actions, Jenkins, and GitLab CI/CD**. Passionate about building efficient, maintainable code and collaborating across teams to deliver high-impact code.

EXPERIENCE:

Oatmeal AI Inc – Full Stack developer, San Jose, CA

Aug 2025 – Present

- Led the migration of legacy ASP-based systems to a modern stack using **React.js, TypeScript, Tailwind CSS, Node.js, and Next.js**, improving maintainability and reducing page-load times by 45%.
- Architected and deployed **RESTful APIs** integrated with **Azure SQL Database**, enabling secure, real-time data exchange for **AI analytics** and model inference pipelines.
- Orchestrated and implemented **CI/CD** pipelines with **GitHub Actions, Docker, and Vercel**, achieving zero-downtime deployments and faster release cycles.
- Created an **AI-powered chatbot** agent leveraging **Large Language Models (LLMs)** and **Hugging Face transformers**, enhancing user interaction and automating customer support workflows.
- Developed a cross-platform mobile app using **Flutter**, extending the web experience to **Android and iOS** while maintaining a unified backend.
- Built a component driven UI system using **Tailwind CSS** and **Storybook**, improving design consistency and cutting front-end development effort by 30 %.
- Collaborated with **AI engineers** and stakeholders to deliver scalable, production-ready solutions with a focus on security, performance, and user experience.

Cyber Infrastructure Inc – San Jose, CA, Software Developer

Feb 2025 – Aug 2025

- Designed, developed, and deployed production-grade microservices using **Node.js, Express.js, and MongoDB**, improving platform scalability by **30%** and enabling the company's fastest feature rollout.
- Architected high-performance APIs for real-time workflow coordination, integrating **AWS services** such as **EC2, API Gateway, Lambda, S3, and DynamoDB** to enhance reliability and fault tolerance.
- Automated **subscription and payment workflows** using **Stripe webhooks** and **AWS Lambda**, reducing manual effort by **40%** and improving payment success rates by **5%**.
- Integrated **secure inter-service communication** with **JWT authentication** and **AWS KMS encryption**, ensuring compliance with industry-grade security standards.
- Oversaw the **full SDLC**, from architecture and development to automated testing and deployment via **GitLab CI/CD**, achieving consistent **zero-downtime releases**.

Dispatch Track – Full Stack Developer, Hyderabad, India

Dec 2021 – Dec 2022

- Developed and maintained enterprise logistics applications using **JavaScript, React.js, Next.js, Node.js, and Express.js** improving delivery scheduling efficiency and user experience.
- Optimized **RESTful and GraphQL APIs** to handle real-time logistics data, reducing latency and improving API response reliability by **25%**.
- Integrated **AWS services** including **EC2, Lambda, API Gateway, and S3** for scalable deployments and secure data handling.
- Modeled and implemented data models with **PostgreSQL**, ensuring high data integrity and query performance across multi-region environments.
- Partnered with product and **QA teams** in an **Agile** setup to ensure seamless feature delivery, maintaining 99% uptime and efficient release cycles.

- Engineered and maintained **finance-grade web applications** using **HTML, CSS, JavaScript, React.js, Node.js, and PostgreSQL**, improving data accuracy and platform reliability.
- Developed secure **RESTful APIs** for loan and transaction data with robust input validation and authentication, processing **5K+ daily requests** with consistent uptime and reliability.
- Optimized **PostgreSQL** queries and backend logic, reducing average response time and improving overall application performance.
- Constructed responsive **React dashboards** used daily by **20+ financial analysts**, streamlining loan processing and credit evaluation workflows.
- Collaborated with cross-functional teams to implement new financial workflows, ensuring **data integrity, security compliance**, and timely product delivery.

TECHNICAL SKILLS:

Frontend Development: JavaScript, TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux, UI/UX

Backend Development: Node.js, Express.js, RESTful APIs, GraphQL, JWT Authentication, OAuth2

Databases: PostgreSQL, MongoDB, Query Optimization, Data Modeling, Performance Tuning

DevOps & Cloud: Docker, Git, GitLab CI/CD, GitHub Actions, Vercel, Netlify.

Testing: Jest, Cypress, Super test, Mocha, Chai, Postman, Newman CLI

Tools & Workflow: Cursor, VS Code, Jira, Agile Methodologies, SDLC Best Practices

AI & Automation: LLMs, Hugging Face, OpenAI API, Chatbot Development, Prompt Engineering, VAPI.

EDUCATION AND CERTIFICATES:

Masters in computer science

San Francisco Bay University | Fremont, CA

May 2023–Dec 2024

AWS AI practitioner (Certificate Course)

ACHIEVEMENTS:

- Awarded a **Presidential Scholarship** covering 100% of Master's tuition.
- **2× Hackathon Winner** with participation in 20+ events
- Invited by **VAPI** to demo an AI project as a winning team.
