EXECUTIVE SUMMARY

Certified Scrum Master with 14 years of experience in software development and 6 years dedicated to leading Agile teams as a Scrum Master. Proven track record in facilitating Scrum ceremonies, coaching teams and junior Scrum Masters, and driving continuous improvement. Strong expertise in removing impediments, stakeholder management, and fostering self-organization. Skilled in Agile frameworks, process optimization, and delivering high-quality products. Certified in PMP, PSM, and PSPO I, with hands-on experience in AI/ML projects, Linux kernel development, and cloud technologies.

EDUCATION

- **M.Eng. Information Technology** - Metropolia University of Applied Sciences, Espoo, Finland. (2020)
- **B.Tech. Electronic Instrumentation and Control Engineering** - Sri Venkateswara University, Tirupati, Andhra Pradesh, India (2006)

Project & Program Management

Agile, Scrum, PMO, Stakeholder Management, Risk Management, Release Management, Change Management, Requirements Management

CERTIFICATIONS

PMP: Project Management Professional ([3217888](#))

PSPO: Professional Scrum Product Owner ([994789](#))

PSM: Professional Scrum ([293436](#))

AWS: AWS Certified Cloud Practitioner

Process Optimization

Metrics/KPIs (OKRs), CI/CD, Defect & Quality Management, Process Improvement, continuous improvement, Risk Management, Change management

Technical skills

AI/ML, Python, SQL, Prompt Engineering, API Testing, OpenAI, Linux Kernel Debugging

Tools/Techniques & Platforms

Tools & Platforms: Jira, Confluence, GitHub/GitLab, Selenium, Advanced Excel, Google Sheets, MS Project, PDCA, DMAIC

WORK EXPERIENCE

Role: Scrum Master / AI Project Manager, **Location:** USA, **Duration:** Jul 2024 - Present

Company: MyLife (<https://humanremembranceproject.org/>)

Project Description:

As a Project Manager/Scrum Master, I led the development and implementation of a GenAI application, managing the roadmap and driving the end-to-end software release including scrum ceremonies.

Roles and Responsibilities:

- As a Project Manager and Scrum Master, I lead Scrum ceremonies and address impediments to ensure smooth team progress.
- Implementing product (OpenAI Chatbot) roadmap by defining key milestones based on the roadmap and PRD.
- Driving program milestone through regular stakeholder meetings and collaboration with development team.
- Led custom GPT model development and fine-tuning using OpenAI, optimizing AI performance through prompt engineering for MyLife.

Accomplishment: Converted ambiguity into actionable features, streamlined the development process, and optimized AI chatbot performance.

Role: Scrum Master/Delivery Lead, **Location:** Espoo, Finland

Company: u-blox, **Duration:** Apr 2023 – May 2024

Project Description:

As an Agile PM (SW Release Manager) of the system integration team, I collaborated with cross-functional teams to ensure smooth GNSS firmware releases. I managed the entire release process, from planning to the release letter.

Roles and Responsibilities:

- Served as scrum master, driving ceremonies and resolving impediments focusing on continuous improvement.
- Led GNSS firmware releases, optimized processes, and addressed technical debt

- involved in end to end Firmware Release from release planning, test plans and preparing release notes by collaborating with cross functional teams.

Accomplishments: Transitioned the team to Agile methodology, streamlined the release process, and reduced delays—ensuring software was released on schedule (6 weeks instead of 8).

Role: Project Manager/ Scrum Master, Location: Hillsboro, OR, USA

Company: Intel, **Duration:** Jul 2020 – Mar 2023

Project Description:

At Intel, our organization was developing, testing, and releasing the Linux kernel to support Intel processors. I led the sysdebug team and drove the quality of the Linux kernel driver (i915) across all platforms as Project/Scrum master.

Roles and Responsibilities:

- Defined and communicated the Linux Kernel driver i915 Sysdebug team's vision and objectives on top of scrum activities.
- Responsible for meeting program milestones on schedule with a focus on quality (pre-si and post-si).
- Developed comprehensive metrics to track and analyze driver performance, enabling data-driven decision-making and continuous improvement.

Accomplishment: Led from the front during CI expansion across multiple platforms, using a **data-driven approach**, and developed automated scripts (Python/API/Selenium), reducing workload by 15%.

Role: Defect/Quality Manager, **Location:** Espoo, Finland

Company: Intel, **Duration:** Aug 2018 – Jun 2020

Project Description:

As a Defect Manager, responsible for the quality of the driver and being the point of contact for all bugs including CI, community and customer bugs of Linux kernel driver (i915).

Roles and Responsibilities:

- Streamlined bug management processes by prioritizing and assigning issues effectively, ensuring timely resolution and effective reporting.
- Collaborated globally with engineering teams to identify root causes, implement solutions, and improve driver quality.
- Delivered on program milestones by coordinating with developers and engineering managers to ensure timely bug resolution.
- Automate JIRA defect management using Python, Selenium, and JIRA API.

Accomplishment: Became the single point of contact for all bugs across all platforms, including legacy systems, ensuring seamless defect resolution.

Role: Scrum Master, **Location:** Helsinki, Finland

Company: GE Healthcare, **Duration:** Aug 2016 – Jul 2018

Project Description:

Our team at GE healthcare was developing the software for Patient monitoring systems. I was responsible for driving scrum activities and led the verification team to release the software.

Roles and Responsibilities:

- Led scrum ceremonies and facilitated cross-functional collaboration to ensure timely delivery of high-quality patient monitoring solutions.
- Developed and executed test strategies to improve the safety and efficacy of patient monitoring systems.
- Supported clinical workflows by ensuring robust product performance in critical healthcare environments.

Role: Verification Engineer, **Location:** Tuusula, Finland

Company: KavoKerr Group, **Duration:** Sep 2010 – Jul 2016

Project Description:

KavoKerr group manufactures and develops software for dental x-ray scanning devices. I was responsible for all test activities in the organization along with peers.

Roles and Responsibilities:

- Developed and maintained comprehensive system test cases for Regulatory, Hardware, Mechanical, Software, GUI, and Firmware Requirements, ensuring the quality of Dental Imaging software through both automated and manual testing.
- Demonstrated expertise across various functional testing areas, including Client database, Device Firmware, GUI, Security, Nvidia Graphics card, iPad/Mobile App, Regression, Licensing Server, and Cloud data migration testing.
