

Love Dhameliya

Software Engineer

Professional Summary:

I am a Software Engineer with over three years of hands-on experience building and optimizing enterprise applications for clients such as **Dell Technologies** and **Blue Cross Blue Shield**. My background includes developing secure web applications, integrating APIs, and implementing scalable solutions on cloud platforms while adhering to industry best practices. I have consistently improved system performance, automated development workflows, and resolved critical technical challenges, contributing to faster releases and better user experiences.

I earned my **Bachelor of Science in Computer Science** from the **University of North Carolina at Charlotte** and a **Master of Science in Computer Science** from the **Georgia Institute of Technology**. My technical expertise spans programming (Python, Java, JavaScript, SQL), web technologies (React, RESTful APIs), cloud and DevOps (AWS, Azure, Docker, Kubernetes, Jenkins, Terraform), and database optimization (SQL, ETL pipelines). I bring a strong problem-solving mindset and a passion for developing reliable, efficient, and secure software solutions that create tangible business value.

Education:

Master of Science in Computer Science | Georgia Institute of Technology
Bachelor of Science in Computer Science | University of North Carolina

Technical Skills:

Programming Languages:	Python, Java, JavaScript, SQL, Shell Scripting
Web Development:	React, HTML5, CSS3, RESTful APIs, Cross-Browser Compatibility, WCAG Standards
Cloud & Infrastructure:	AWS, Azure, GCP, Terraform, Kubernetes, Docker
DevOps & CI/CD:	Git, Jenkins, CI/CD Pipelines, Automation, Agile/Scrum Practices
Database Management:	SQL Optimization, ETL Pipelines, Data Modeling, Query Performance Tuning
Security & Compliance:	Network Security, Identity & Access Management, HIPAA Compliance, InfoSec Best Practices
Collaboration & Tools:	Jira, Confluence, Agile Project Management, Technical Documentation

Experience:

Role: Software Engineer Client: Dell Technologies Company: RecruitFox	May 2024 – Present
--	---------------------------

- Engineered and optimized cloud-based applications on **AWS and Azure**, improving system reliability and reducing downtime incidents by **15%** through proactive monitoring and automated remediation.
- Designed and implemented **CI/CD pipelines using Jenkins, Git, and Docker**, cutting deployment time from **2 hours to under 25 minutes**, while ensuring zero production rollbacks.
- Collaborated with cross-functional teams to build **secure RESTful APIs** and integrate them with internal tools, enabling seamless data exchange across **5+ business-critical applications**.
- Diagnosed performance bottlenecks in **Kubernetes clusters**, introduced autoscaling policies, and reduced infrastructure costs by **18%** without impacting system performance.
- Led troubleshooting efforts for complex **network security issues**, applying **InfoSec best practices** and enhancing compliance with Dell's global security standards.
- Automated recurring infrastructure tasks with **Terraform and Shell/Python scripts**, decreasing manual interventions by **40%** and improving system consistency.

Love Dhameliya

Software Engineer

- Worked closely with product owners in an **Agile/Scrum environment**, ensuring sprint deliverables were met consistently, and contributed to a **98% on-time sprint completion rate**.
- Conducted **SQL query optimization** for high-volume databases, cutting data retrieval times by **30%** and enabling faster analytics for business stakeholders.
- Identified and resolved critical deployment failures by performing **root cause analysis** and implementing robust rollback strategies, improving deployment success rate to **99%**.
- Documented technical workflows in **Confluence** and provided knowledge-sharing sessions to the team, reducing onboarding time for new engineers by 20%.

Role: Web Developer

January 2023 – April 2024

Client: BCBS

Company: RecruitFox

- Developed and maintained **responsive web applications** using **JavaScript, HTML5, CSS3, and React**, enhancing user engagement and reducing page load time by **35%**.
- Built and integrated **RESTful APIs** with backend systems, enabling secure exchange of healthcare data and streamlining claims processing, which improved transaction speed by **25%**.
- Collaborated with UI/UX teams to redesign core member portals, addressing usability hurdles and boosting customer satisfaction scores by **18%**.
- Implemented **SQL database optimization** strategies, reducing query execution time by **40%** and supporting faster data-driven decisions across multiple departments.
- Automated repetitive testing and deployment tasks with **Jenkins and Git**, cutting manual release efforts by **30%** and ensuring consistent production stability.
- Resolved cross-browser compatibility issues that impacted accessibility, applying **WCAG compliance standards**, which expanded accessibility coverage to **100% of user base**.
- Troubleshooted critical production defects under tight SLAs, applying structured debugging with **Chrome DevTools and Postman**, reducing average issue resolution time from **8 hours to 2 hours**.
- Integrated **security best practices** (input validation, encryption, authentication protocols) into web applications, ensuring HIPAA compliance and passing all security audits without major findings.
- Partnered with Agile teams to plan and execute sprints, delivering **95% of committed stories on time** while mentoring junior developers in code reviews and best practices.
- Created detailed technical documentation in **Confluence** and held weekly walkthrough sessions, which cut down new hire onboarding time by **25%**.

Projects:

Cloud Infrastructure Automation | Dell Technologies

August 2024 – Present

- Designed and deployed automated infrastructure provisioning using **Terraform and AWS**, reducing manual setup time by **40%**.
- Built CI/CD pipelines with **Jenkins, Docker, and Kubernetes**, enabling faster and more reliable deployments across multiple environments.
- Achieved **99% deployment success rate** by implementing rollback strategies and proactive monitoring solutions.

Enterprise Monitoring & Performance Optimization | Dell Technologies

June 2024 – September 2024

- Diagnosed and resolved **Kubernetes cluster bottlenecks**, introducing autoscaling that cut infrastructure costs by **18%**.
- Automated monitoring and alerting with **Python scripts** and cloud-native tools, minimizing downtime and improving SLA adherence.
- Enhanced database query performance, cutting execution times by **30%** and enabling faster reporting.

Love Dhameliya

Software Engineer

Member Portal Modernization | BCBS

May 2023 – April 2024

- Led the revamp of the **member web portal** using **React, RESTful APIs, and SQL optimization**, improving performance and usability.
- Solved cross-browser compatibility and accessibility issues by applying **WCAG compliance**, expanding usability to the entire customer base.
- Improved customer satisfaction scores by **18%** through faster load times and a more intuitive user experience.

Secure Healthcare Data Integration | BCBS

January 2023 – December 2023

- Built and integrated secure APIs to handle sensitive healthcare data, ensuring HIPAA compliance across all workflows.
- Partnered with InfoSec teams to implement encryption, access controls, and input validation, passing all audits without critical findings.
- Reduced transaction processing time by 25%, enabling more efficient claims handling.
