

LUCAS MILLER

Senior Software Engineer | .NET, ASP.NET, React, Angular, Azure, AWS

+1 217 636 4173 • lucasmillerxten@gmail.com • <https://www.linkedin.com/in/lucas-miller-67541b329> • Garland, TX

Summary

Senior Full Stack Engineer with over 12 years of professional experience in software development mainly using **ASP.NET**, **C#**, **React** and **Angular** stack, with a strong foundation in cloud technologies like **Azure** and **AWS**.

Skills

Languages: C#, Javascript, Typescript, Node.js, HTML, CSS, jQuery

Backend: .NET Core, ASP.NET MVC, ASP.NET Web API, Node.js

Frontend: Angular, React, Next.js, RxJS

Database: SQL Server, MySQL, PostgreSQL, MongoDB, DynamoDB, CosmosDB

Data Access Tech: Entity Framework Core, ADO.NET, LINQ, T-SQL

Cloud Platforms: Azure, AWS

Azure: Functions, Maps, SQL Database, Data Factory, Service Bus, DevOps, Active Directory, AKS, API Management

AWS: EC2, S3, API Gateway, Lambda, CloudWatch, CloudFormation

DevOps: Docker, Kubernetes

CI/CD Tools: Git, Jenkins, AWS CloudFormation

Testing: NUnit, XUnit, MSTest, Mocha, Jest, Cypress

Experience

Zocdoc

Remote

Senior Software Engineer

07/2021 - 10/2024

C#, .NET Core, Node.js, React, Angular, TypeScript, SQL, AWS

- Revamped microservices using **.NET Core** and **Node.js**, improving application reliability by 20% and maintainability.
- Constructed user-friendly frontend utilizing both **React** and **Apollo** client technologies alongside rigorous testing methods with **Cypress**, leading to a boosted performance rating of 4.8 stars on major review platforms.
- Engineered a robust set of full-stack tools for managing provider profiles utilizing **React**, **C#**, and **.NET Core** that facilitated onboarding time reduction from weeks to just three days for new healthcare providers.
- Redesigned an analytical dashboard and admin panel using **Angular**, and promoted user experience with pagination and caching.
- Created responsive web applications using **HTML**, **CSS**, and **JavaScript**, improving overall user engagement.
- Employed **jQuery** techniques for advanced UI functionality within the analytical dashboard; streamlined workflows resulted in more intuitive navigation that decreased user error rates by approximately one-third over three months.
- Fetched data from middle layer directory service **API** with **GraphQL**. Composed **MVC** Backend with **C#**, hitting **Elasticsearch** with **NEST**.
- Migrated Zocdoc's Monolith patient appointment transactional emails to a new messaging micro-service with **AWS Lambda**, **Dynamo DB**, **SNS**, **CDK** and **Braze**.
- Followed a full-stack workflow involving 3 micro-services in **CI** environment on **AWS**.
- Elevated database operations with **Entity Framework Core 6**, reducing query response time by 30%, and initiated caching techniques in **Node.js**, cutting response time by 25%.
- Deployed microservices using **Docker** and **Kubernetes**, achieving a remarkable 50% reduction in deployment times while enhancing overall system reliability with **Azure Functions** for operational efficiency.
- Refined **Azure Functions**, **RESTful** and **GraphQL** using **C#**, **TypeScript** and debugged production issues using Azure Application Insights.
- Leveraged **Kong**, **Auth0**, and **AWS** to protect, scale, and miniaturize Zocdoc's marketplace features.
- Directed building unit testing using **NUnit**, **xUnit**, introducing **SonarQube** to improve the code quality to 90%.
- Accelerated deployment speed by 20% through **Git** and **Jenkins** integration, and mentored junior developers, boosting code quality by 90%.
- Facilitated knowledge transfer sessions that accelerated the ramp-up time of 3 new engineering hires on critical solutions; effected overall onboarding efficiency by reducing integration timelines from weeks to days.

Experience

Healthmine

Dallas, TX

Full Stack Software Engineer

05/2017 - 07/2021

React, ASP.NET Core, Node.js, React, AWS Lambda

- Designed and implemented a **GraphQL API** to improve performance and reduce data transfer. Worked on backend development with **ASP.NET Core** and **Node.js**. Optimized a legacy web application's database queries to enhance performance by 50%.
- Redesigned large-scale healthcare applications using **React** and **TypeScript**, creating interactive user interfaces based on design mockup with **JavaScript**, **HTML**, and **CSS**; improved patient engagement by 30% through enhanced usability.
- Improved application interactivity and responsiveness through the integration of **jQuery**; optimized page interactions resulting in faster response times that increased overall user satisfaction scores by over 15%.
- Engineered efficient database communication within healthcare applications by implementing **LINQ** and **ADO.NET**, resulting in a 30% acceleration of data retrieval times for critical patient information.
- Migrated healthcare application infrastructure to a serverless architecture using **AWS Lambda**, achieving over a 20% reduction in costs.
- Collaborated with cross-functional teams, including healthcare designers and product managers, to ensure alignment with healthcare standards and requirements.

EverCommerce

Dallas, TX

Software Engineer Backend

02/2012 - 05/2017

ASP.NET Core, ASP.NET Web API, .NET Core, Agile methodologies

- Directed the full lifecycle of backend architecture for two large-scale initiatives; rebuilt eight existing systems with **ASP.NET** enhancing modularity and reducing server response times by an average of 40%.
- Developed a robust backend for a large-scale project utilizing **.NET Core**, ensuring seamless functionality across Windows, Mac, and Linux, resulting in over \$300k in benefits for the company.
- Collaborated with cross-functional teams to integrate backend and frontend systems, creating **RESTful APIs** with **ASP.NET Web API**, which enhanced system expandability by over 15%.
- Directed bi-weekly agile sprint planning sessions, contributing to a 15% increase in team velocity and overall project efficiency.

Education

Southern Methodist University

Dallas, United States

Bachelor of Science in Computer Engineering

01/2008 - 12/2011
