

MATTHEW MORI

San Francisco, Ca

mattkmori@gmail.com

Core Strengths: QA Strategy • Team Leadership • SDLC Integration • Agile / Scrum • CI/CD • Stakeholder Management • Root Cause Analysis • Performance Optimization

TECHNICAL KNOWLEDGE AND SKILLS

QA & Testing Tools: TestRail, JIRA, Jenkins, Xcode, Charles Proxy, Android Studio, Selenium, Postman, GitHub, Bugzilla, Device Anywhere, Android Emulator

Development & Design: SQL, UX/UI, Figma, Notion, Asana, Confluence

Project Management: Agile, Scrum, Waterfall, CI/CD, Team Leadership, Stakeholder Communication

Testing Expertise: Manual Testing, Exploratory Testing, Automation Frameworks, Functional Testing, Load & Performance Testing, Regression Testing, API Testing

PROFESSIONAL EXPERIENCE

Savage X Fenty, El Segundo (Remote)

JUL 2022 - SEPT 2023

Lead QA

- Designed and implemented a comprehensive QA strategy integrated into the SDLC, improving testing efficiency and defect detection rate.
- Managed and mentored a global QA team, aligning offshore testers to industry QA standards and company objectives.
- Created test automation framework architecture for automation engineers to accelerate regression testing cycles.
- Led manual and exploratory testing for complex features, ensuring seamless product launches and high-quality user experiences.
- Reduced backlog bug tickets by 90% through prioritization, regression, and cross-team collaboration.
- Delivered actionable insights by triaging 400+ test cases weekly, identifying root causes of critical issues, and improving crash rates across key areas.
- Authored and maintained detailed test plans and documentation using JIRA and Confluence across multiple projects.
- Partnered with Product Managers, Designers, and Developers to define product requirements, build test coverage, and streamline release readiness.
- Drove the successful QA launch of Fit Xperience, resulting in outstanding product stability metrics.

Glu Mobile, San Francisco

JAN 2013 - DEC 2019

QA Manager

- Directed a team of 8 QA specialists and an automation tester; led hiring, onboarding, and performance management.
- Managed offshore QA team of 10+, improving testing throughput and reducing regression cycle time by 60%.
- Oversaw test case design, execution, and post-release validation for iOS, Android, Windows, and Amazon platforms.
- Improved performance and load testing per release, reducing load times by 5%.
- Conducted daily stand-ups, bug triages, scrums, retrospectives, and cross-functional QA planning sessions.
- Established grey-box testing practices using web proxy tools to strengthen API-level verification.
- Collaborated with engineering, product, content, and analytics teams to ensure quality at every release stage.
- Maintained mobile device inventory and optimized device allocation for testing coverage.

Glu Mobile, San Francisco

JAN 2011 - DEC 2013

QA Lead

- Led QA testing and signoff for five major products, coordinating daily QA operations and reporting to management.
- Developed comprehensive test plans, executed full end-to-end testing, and conducted regression testing for releases.
- Ensured test coverage alignment with product requirements and stakeholder expectations.

Funmobility, Pleasanton

JAN 2010 - DEC 2011

QA Project Manager

- Oversaw QA testing for Android and iOS applications in a fast-paced, multi-project environment.
- Managed offshore teams, regression cycles, and bug verification to ensure consistent release quality.
- Developed test documentation standards, streamlining project handoffs and test reporting.

KEY ACHIEVEMENTS

- Awarded “Outstanding Performers” at Savage X Fenty for developing and launching Fit Xperience
- Built and scaled multiple QA teams, spanning multiple time zones and frameworks from the ground up, delivering quality processes across diverse organizations.
- Designed QA dashboards for tracking metrics, tooling access, and vendor efficiency, aligning directly with leadership KPIs.
- Planned and organized many company events and social events as part of the Culture Team!
