

PROFESSIONAL SUMMARY:

- Certified ServiceNow Developer with Over **9 Years** of extensive experience in **ServiceNow development and administration** in all aspects of client engagement **lifecycles including Pre-sales**, Requirement gathering & effort scoping, product **implementation & development**, architecting, production support, and system upgrades on ITSM and monitoring. ServiceNow Certified System Admin (CSA).
- Expertise in **ITSM, ITOM, ITBM, HRSD, CSM, CMDB, SecOps, GRC, IRM, PPM, and CAM**, optimizing workflows and improving system efficiency.
- Strong knowledge of **Incident Management, Problem Management, Change Management, Knowledge Management, Service Catalog, HR Case Management, and Service Requests**.
- Hands-on experience in ServiceNow Upgrades across versions **Jakarta, Geneva, Istanbul, Kingston, London, New York, Tokyo, Vancouver**.
- Extensive knowledge in **UI Actions, UI Policies, Business Rules, Data Policies, Client Scripts, and Validation Scripts** using **JavaScript** and **Glide APIs**.
- Proficient in ServiceNow Integrations (**REST, SOAP, LDAP, SSO, Splunk, Maximo, Workday, DocuSign**) and Integration Hub to automate workflows.
- Experience in **HRSD**, including HR Service Portal design, **HR Knowledge Management**, HR-ITSM integration, and automation of HR requests.
- Designed and implemented HR Self-Service Portal for leave management, benefits inquiries, and policy-related queries.
- Developed and maintained HR Knowledge Articles, reducing repetitive queries and improving self-service capabilities.
- Integrated **HRSD** with **ITSM** to streamline cross-team workflows, especially for employee onboarding.
- Hands-on experience in **AIRWATCH Integration**, configuring REST Messages using API.
- Created Script Includes to call **REST APIs**, process responses, and update target tables.
- Used CI Identification Engine to prevent duplicate records in the **CMDB**.
- Implemented Communication Devices class as per CMDB Data Model.
- Configured Scheduled Jobs for weekly data loads.
- Expertise in **Automated Test Framework (ATF)**, implementing **UI tests, API tests, and workflow tests** for ITSM, HRSD, APM.
- Performed performance testing in ServiceNow to optimize system scalability and responsiveness.
- Developed and maintained ATF test scripts for **ITSM, HRSD**, and custom applications, ensuring business process validation.
- Strong expertise in **SOAP Web Services, REST APIs**, and authentication methods (Basic Auth, OAuth) for ServiceNow integrations.
- Designed, developed, and implemented automated processes for **CMDB** data population and relationship mapping.
- Hands-on experience in CMDB bulk data loading using Transform Maps and Transform Scripts.
- Experience with ServiceNow **plugins**, including **On-Call Scheduling, Discovery, Orchestration, and Performance Analytics**.

- Created and maintained **Access Control Rules (ACLs)** to ensure secure role-based application access.
- Configured **Service Catalog, Workflows, SLAs**, and Reporting to enhance ServiceNow automation.
- Experience in **Change Management** using **Update Sets and Import Sets**.
- Configured ServiceNow Integration Hub for automated workflow execution and streamlined third-party integrations.
- Integrated HRSD with external HR systems (Workday, SAP SuccessFactors) for real-time employee data synchronization.
- Managed Critical Incident Reports and User Administration in ServiceNow.
- Experience in **Email Integration, LDAP Integration**, and External Web Services (SOAP & REST).
- Worked on ServiceNow authentication mechanisms, including LDAP and **SSO integrations**.
- Strong knowledge of **SDLC**, Quality Management Systems, and **Agile & Waterfall methodologies**.
- Configured and maintained ServiceNow **GRC modules**, including **Policy & Compliance, Risk Management, and Audit Management**.
- Designed and deployed **IRM workflows** for risk identification, assessment, and mitigation.
- Hands-on experience in web development with **HTML5, JavaScript, Jelly, jQuery, and CSS3**.
- Experience in Helpdesk/Service Desk, **SLA Management**, and Service Request Workflows.
- Ability to adapt to fast-paced environments, with a strong dedication to continuous learning and team collaboration.
- Developed and deployed Spring Boot applications to enhance ServiceNow integrations.
- Implemented **UI/UX** best practices in ServiceNow Service Portal development, ensuring modern design consistency.
- Experience working in Traditional **SDLC and Agile environments**.
- Developed **Employee Self-Service (ESS)** Portal and Service Portals using **Jelly Script, UI Macros, Bootstrap, and AngularJS**.

CERTIFICATIONS:

- ServiceNow **Certified System Administrator**
- ServiceNow **Certified Application Developer**

TECHNICAL SKILLS:

- **ServiceNow:** ITSM, SAM, HAM, ITAM, ITOM, SOAP, REST, CMDB, HRSD, Discovery, Orchestration, Flow Designer, Service Catalog
- **Programming Languages:** JavaScript, HTML, CSS, Java, SQL, PL/SQL
- **Tools & Technologies:** ServiceNow, Eclipse, Net Beans, MySQL, Oracle, SQL Server
- **Methodologies:** Agile, Waterfall
- **Operating Systems:** Windows, Linux, Unix, Mac OS

PROFESSIONAL EXPERIENCE:

Client: JP Morgan Chase

June 2023 to Present

Role: ServiceNow Developer/Consultant (ITSM/ITOM/GRC/SecOps/ITBM)

- Developed ServiceNow solutions to support best practice processes to deliver clients business requirements independently.
- Executed ServiceNow Administration for Development, Test, and Production environments, ensuring business services and **CMDB** relationships remain accurate.

- Expertise on implementing end-to-end **Incident Management, Configuration & Asset Management, Change Management, Release Management, Service Catalog Management** Developed project plans, timelines, and budgets.
- Implemented and maintained **Data Sources, Scheduled Jobs, and Data Imports** to enhance data accuracy and system efficiency.
- Developed **Reports and Dashboards** to provide real-time insights into risk levels, audit findings, and compliance status.
- Managed **User Accounts, Groups, and Permissions** within LDAP directories, ensuring secure authentication.
- Configured **(ITOM) Event Management**, ensuring **accurate CMDB updates** for improved infrastructure monitoring.
- Developed **Business Rules, Client Scripts, UI Policies, UI Actions, Workflows, and Flow Designer Automation** for incident, change, service requests, and SLAs.
- Designed and implemented **HRSD workflows**, including **Case Management, Onboarding, and Policy Management** using **Flow Designer and Catalog Builder**.
- Implemented **SLAs** and Escalation Policies in **CSM** to ensure timely case resolution and adherence to organizational SLAs.
- Integrated **HRSD with Workday & SAP SuccessFactors**, ensuring **real-time data synchronization and streamlined HR operations**.
- Developed integrations between ServiceNow and Enterprise Systems (**Tesco, CRM, ERP**) using **REST, SOAP, Email, and MID Server**.
- Integrated ServiceNow with **LDAP directories (Active Directory, eDirectory, OpenLDAP)** for **user authentication and role-based access**.
- Configured **Single Sign-On (SSO) with SAML 1.1/2.0**, streamlining authentication and enhancing security.
- Developed and maintained custom integration connectors for external applications (e.g., **CRM, ERP**).
- Implemented **Service Mapping, Event Management, and Discovery** for improved **visibility into IT assets**.
- Performed ServiceNow **Troubleshooting, Bug Fixes, and Root Cause Analysis** to ensure **system stability**.
- Architected and Managed Implementation of **ITSM Suite, HRSD, ITOM, and Facilities Management**, integrating with enterprise platforms.
- Worked on **SecOps Modules** including **Security Incident Response (SIR), Vulnerability Management (VM), and Threat Intelligence**.
- Implemented and maintained **GRC & IRM** for **Risk Management, Policy Compliance, and Audit Management**.
- Configured Compliance Management for **SOX, HIPAA, GDPR**, ensuring **automated risk assessments and policy tracking**.
- Developed Real-time Dashboards and Continuous Monitoring in **GRC & IRM**, enhancing **risk visibility and compliance adherence**.
- Integrated **Continuous Authorization and Monitoring (CAM)** within **GRC/IRM** for automated risk detection and assessment.
- Designed Custom Workflows to monitor risk, compliance, and security interactions across **ITSM, SecOps, CMDB**.
- Created **GRC Dashboards & Performance Analytics**, enabling data-driven decision-making for risk mitigation.

- Implemented **Orchestration & Service Mapping** to automate infrastructure and security operations.
- Configured **Data Models, Business Rules, and UI Components** in **App Engine Studio**.
- Performed Unit Testing and Supported User Acceptance Testing (UAT) to validate system functionalities.
- Managed ServiceNow Platform **Updates and Patches** to ensure system stability and feature enhancements.
- Utilized **Azure Kubernetes Service (AKS)** for managing containerized applications and ServiceNow integrations.
- Configured **Project Portfolio Management (PPM)** for project tracking, approvals, and progress monitoring.
- Implemented **Software Asset Management (SAM) & Hardware Asset Management (HAM)** for license tracking, compliance, and asset monitoring.
- Developed **Enterprise Asset Management (EAM) Solutions** including Asset Tracking, Lifecycle Management, and Reporting.
- Developed Custom FSM Applications for Field Service Operations, Work Order Management, and Scheduling.
- Implemented and maintained the **Common Service Data Model (CSDM)**, aligning with industry best practices and organizational needs.

Environment: ServiceNow, HAM, SAM, CMDB, CSDM, CSS, JavaScript, HTML, Discovery, JSON, jQuery, AngularJS, SOAP, AJAX, SCRUM, ITIL, Windows 10.

Client: CVS Health

June 2022 to April 2023

Role: ServiceNow Admin/Developer

Responsibilities:

- Updated and customized the **Incident, Problem, and Change Management** modules based on client feedback to enhance usability and efficiency.
- Developed and implemented **ITSM Processes, workflows, and Flow Designer** automation within the ServiceNow framework to optimize service delivery.
- Configured and managed the ServiceNow **HRSD** suite, including HR roles, **COE** structure, service configurations, and record producers for seamless HR operations.
- Automated **HRSD** processes using **catalogs, workflows**, and low-code automation to improve efficiency.
- Designed and customized the ServiceNow Content Management System (CMS), including **UI Pages, Layouts, CSS**, and Service Catalog enhancements for various systems.
- Developed the End User Self-Service Portal, creating custom layouts, **CSS**, and dynamic content for an enhanced user experience.
- Created **Business Rules, Script Includes, Glide AJAX, UI Actions, Client Scripts, and UI Policies** to automate and optimize business processes.
- Developed and configured workflow administration using **Flow Designer** to support business process automation.
- Configured **(ITOM) Event Management**, including connector instances and connector definitions, ensuring proactive monitoring and automated event handling.
- Administered and provided production support for **ServiceNow** instances, ensuring stable lower lifecycle environments.

- Configured **SLAs** based on business requirements and monitored **SLA workflows** to ensure compliance with service level agreements.
- Managed the migration process across ServiceNow instances using **Update Sets**, ensuring smooth deployments.
- Performed Data Loading and Transformations using **Import Sets & Transform Maps (CSV, XML, Excel)** to streamline data migration.
- Automated software license tracking and compliance using ServiceNow SAM Pro, reducing over-licensing costs and mitigating risks.
- Established automated **schedules** and performance monitoring to track **ServiceNow metrics** and generate detailed reports.
- Developed **dashboards, indicators, and breakdowns in Performance Analytics**, providing real-time visibility into key business metrics.
- Engineered **Kafka-based integration** solutions for real-time data streaming and processing, optimizing incident management and reporting.
- Implemented and maintained **CMDB** and IT Asset Management solutions, ensuring accurate tracking and reporting of IT infrastructure.
- Led automation of continuous risk assessments and CAM-driven compliance monitoring in ServiceNow **GRC/IRM**, ensuring adherence to industry standards.
- Integrated ServiceNow GRC with third-party security tools, enabling real-time monitoring, automated alerts, and risk remediation actions.
- Worked on ServiceNow Discovery, ensuring regular updates and inserts of asset information into **CMDB**.
- Provided end-user training and support on **Enterprise Asset Management (EAM)**, ensuring efficient adoption and utilization.
- Customized and developed the **Service Portal**, creating and **managing widgets**, pages, and **UI enhancements**.
- Troubleshoot and resolved ServiceNow integration issues, including data mismatches and connectivity challenges to maintain ecosystem integrity.
- Performed **REST API** integrations and **CMDB** data loading, ensuring accurate asset and configuration data updates.
- Implemented API Management best practices in **APIGEE**, including version control, security policies, and performance monitoring for optimized integrations.
- Coordinated with IT support teams for hardware repairs and replacements, ensuring minimal disruption to business operations.
- Managed and resolved tickets assigned to ServiceNow queues, ensuring efficient resolution of issues and service requests.

Environment: ServiceNow, Incident Management, Problem Management, HTML, JavaScript, CMS, CMDB, Jelly, Glide, XML, Agile Development, MySQL.

Client: Macy's

Dec 2019 to Dec 2021

Role: ServiceNow Admin/Developer

Responsibilities:

- Gathered and analyzed stakeholder requirements, driving the product vision across planning, development, and testing phases.
- Designed and developed ServiceNow scripts, including **Client Scripts, Business Rules, and ACLs**, ensuring secure and efficient platform functionality.
- Developed and optimized the **Service Catalog**, creating new catalog items, **workflows**, and execution plans to improve service automation.
- Implemented **Catalog Client Scripts** and **UI Policies** to enhance user experience and enforce business logic on the client-side.
- Configured and customized **UI Forms, Notifications, SLA Workflows, and JavaScript (server/client)** for seamless ServiceNow operations.
- Authored functional and technical specification documents for multiple **ServiceNow modules**, ensuring clear development guidelines.
- Managed data operations within ServiceNow, utilizing Tables, **CMDB, Import Sets, and Update Sets** for seamless data integration.
- Utilized ServiceNow Discovery to identify IP-enabled **configuration items (CIs)**, map their dependencies, and populate **CMDB** for accurate asset tracking.
- Designed and developed automation workflows using **Flow Designer**, streamlining business processes across various **ITSM** modules.
- Configured and enforced **SLAs** across **ITIL processes**, ensuring adherence to business-defined service level requirements.
- Developed reusable **workflows** and custom events, optimizing process automation and efficiency across modules.
- Administered ServiceNow platform, **managing user roles, IT services, applications, business services, and rules** to maintain a structured environment.
- Implemented and customized ITSM modules, including **Change Request, ESS, Service Desk, and Service Catalog**, aligning with business needs.
- Developed **custom applications, modules, and views**, ensuring scalable and configurable solutions tailored to client requirements.
- Provided ServiceNow support, troubleshooting issues, implementing **bug fixes**, and conducting root cause analysis for performance improvement.
- Configured and customized **workflows, reports, data imports, and scripting**, supporting third-party software integration within ServiceNow.
- Integrated third-party applications with **ServiceNow CSM** using web services and **APIs**, improving data synchronization and cross-platform functionality.
- Worked with cross-functional teams to define **Strategic Portfolio Management (SPM)** processes, ensuring alignment with **ITIL** best practices.
- Collaborated with **DevOps** teams to integrate Ansible into **CI/CD** pipelines, enabling automated testing and deployment for ServiceNow enhancements.

- Developed custom **Power BI reports**, tracking **KPIs and SLA performance**, enhancing visibility into IT service performance and delivery metrics.

Environment: Client Scripting, REST Services, REST Integrations, JavaScript, CMS, import sets, Transform Maps, Workflows, CMDB, Business Rules, Email Notifications, Service Catalog.

Client: Airtel

April 2018 to Dec 2019

Role: ServiceNow Admin/Developer

Responsibilities:

- Configured and customized ServiceNow applications, including **Service Catalog, Incident Management, and Change Management** to align with business needs.
- Implemented Telecom Service Operations Management (**TSOM**) solutions to streamline incident, problem, and change management processes within the **telecommunications infrastructure**.
- Designed and engineered **ITSM** solutions leveraging ServiceNow's full suite of components to address business workflows, ticketing, and automation requirements.
- Implemented **SLAs** and **KPIs** for telecom services, ensuring performance metrics aligned with Airtel's operational goals.
- Designed and developed service request workflows within the **Service Catalog** to enhance service delivery and efficiency.
- Created **UI Pages** and **UI Scripts** for Catalog Items, ensuring an intuitive and responsive user experience.
- Developed custom stylesheets for **UI Pages, dynamic content**, and CMS pages, enhancing the Service Portal and Self-Service Experience.
- Worked extensively on workflow administration, reporting, **UI configurations, notifications, and data imports**, ensuring seamless system functionality.
- Designed and developed real-time dashboards and reports using Performance Analytics, providing actionable IT performance metrics and trend analysis.
- Developed JavaScript-based solutions in **Business Rules, Client Scripts, UI Policies, and UI Actions**, ensuring customized automation of business processes.
- Managed user access and roles, resolving Active Directory and user table issues to ensure proper authentication and authorization.
- Worked with Scheduled Jobs, **Events and Triggers** to automate background tasks and support business processes.
- Provided integration guidance for **IT Asset Management (ITAM) and CMDB projects**, ensuring smooth **system integrations**.
- Configured ACLs and role-based access controls, granting appropriate read, write, and execute permissions to tables and views.
- Managed Update Sets and facilitated **instance migrations** across different environments, ensuring seamless **feature rollouts and upgrades**.

Environment: ServiceNow, JavaScript, CMDB, HTML, CSS, XML, Asset Management, Incident Management, Fire eye, Problem Management.

Client: Sonata Software (Bangalore)

May2016 to April 2018

Role: ServiceNow Admin/Developer

Responsibilities:

- Managed and resolved **Service Requests, Incidents, and Change Requests** within the ServiceNow ITSM framework, ensuring streamlined service delivery.
- Designed and architected **ITAM** solutions, integrating **financial, HR, and IT systems** while aligning with ITIL best practices.
- Developed and optimized the **Service Catalog**, creating custom **catalog items, workflows**, and execution plans to enhance user experience.
- Worked closely with Business Analysts to design and modify **Service Catalogs, Request Management**, and Workflow Automation based on evolving business needs.
- Integrated third-party applications using **REST API** web services, improving cross-platform data synchronization and automation.
- Configured and managed Data Sources, utilizing Transformation Maps to seamlessly import and process external data into ServiceNow.
- Enhanced customer support by maintaining a Knowledge Base and implementing self-service features in the **CSM** module, reducing case volume.
- Developed interactive **UI elements**, such as buttons and context menus, to improve usability and navigation across ServiceNow modules.
- Configured and monitored **SLA workflows**, creating real-time reporting dashboards for improved service tracking and performance analytics.
- Administered **ServiceNow Service Mapping**, ensuring accurate discovery and visualization of business services and dependencies.
- Integrated **ESGA (Enterprise Service Governance Automation)** within ServiceNow, enforcing compliance, governance, and standardized service processes.
- Authored technical documentation, user stories, and test cases, supporting seamless development, testing, and deployment of ServiceNow solutions.

Environment: ServiceNow, JavaScript, Agile Scrum, Glide Script, Workflows, CSS, Windows, Networking, AJAX.

EDUCATION:

- Master of Science in Computer and Information Science
- Bachelor of Technology (B.Tech.) in Computer Science
