Johns Creek, Georgia

Project Management, Scrum Master, Team Lead

Continuous Improvement and Kaizen Events

Change Management, Process and Productivity Improvements

Client Interactions, Technical Trainings

Consulting, Business Analytics

Executive Summary

- **15+ years of experience** in Requirements Gathering and Analyzing, Client Communication, Project Management, Project Tracking, Process Improvement, Risk Management, Change Management, Collaborating with Cross Functional Teams, Quality Control/Quality Assurance, People Management and Delivery. Project Manager with experience in JIRA Requests Management, Confluence, conducting daily scrum standups, sprint demand board meetings, sprint review and reporting metrics for variety of applications.
- Certified **Project Management Professional** PMI-PMP®, AZ900 Microsoft Azure fundamentals. Certified **ACE Associate** (ACE – Achieving Competitive Excellence) and Continuous Improvement **Lean Practitioner** from UTC aerospace systems. Have also been certified on Simplified Technical English.
- Strong **communication skills** and have been in **client facing role**, handling multiple **global locations**. Effective in **People management** with experience in managing team.
- Effective in **process improvement and standardization** tools like continuous improvement and kaizen. Reducing the **lead times** for deliverables by **20%** and improving the delivery count to 15. Led an **Optimization Workshop** to streamline the **Change Request Process**, focusing on understanding requirements, exploring alternatives, and closing non-feasible or unnecessary change requests. This initiative resulted in the closure of **30%** of change requests, significantly improving process efficiency.
- Emphasis on **productivity and process improvement** activities/events aimed at creating **standard work**, eliminating waste and reusability. Have **led/participated in 15 events** (Continuous Improvement/Kaizen). Supported in creation of **standard work** for Engineering Change Order (Change request and Change Order) process and also standard work for writing Service Bulletins.

Skills

Delivery Lead in gathering requirements, regular interactions with clients, creating products, seeking feedback and continually improving products and processes. | **Project Manager/Team Leader** with project proposals, estimations, risk assessments, negotiations with clients, work/resource allocations and process compliance | **Effective Communicator** with **clear and concise communication** through proper channels | Technical support by means of addressing Queries, Conducting **Technical Reviews, Peer Reviews** and providing suggestions/solutions | **Management** support with metrics and process compliance, quality management and knowledge management. Skilled in utilizing tools like **Continuous Improvement, Kaizen, and Lean methodologies** to reduce lead times, create standard work, and eliminate waste.

Tools/Technologies/Domain

Project Management, Change Management, People Management, Risk Management, Client Facing Role, Process Improvement, Financial Management.

Agile Methodology, Waterfall, PLM Tools SAP, Team Center, MS Project, JIRA, Confluence, Eclipse, , Adobe Frame Maker, Adobe Publishing, Tech Illustrator, Epic Editor, ISODRAW, SGML, XML, AutoCAD, MS office (Excel, Access, PowerPoint, Visio).

Rewards and Recognition

Academic excellence founders award in Master's Degree

Spot Award for taking lead in delivery of Temperature Sensor Manuals; Spot Award for leading High Priority Project with high quality and on-time delivery; Partner Award for taking lead to see Project to completion for A350 Sensors; Project of the Quarter Award for A350 Sensor Project; Employee of the month - April 2016

Kaizen Event of the Quarter Award - Sep 2016

Professional Experience

IT Consultant (Scrum Master/Project Management) | Mercedes Benz | June 2023 – Feb 2025

Support IT Service Delivery and Operations Team for Sales (SAP-SWT) in managing development and maintenance projects.

Responsibilities

- **Project Management Support**
 - Facilitate regular scrum meetings to address Sprint-related matters, including change requests and bug fixes.
 - Lead and coordinate Sprint Demand Board meetings between the IT team and business stakeholders.
 - Review and approve change requests by assessing requirements and scope.
 - Prepare Sprint Boards for upcoming sprints.
 - Track the progress of change requests and ensure they are updated in JIRA.
 - Clean up outdated JIRA requests (those in "Monitoring" status for over 2 years).
 - Generate and report metrics using JIRA.
 - Communicate with business owners for approval and closure of JIRA requests.
 - Facilitate migration meetings for the CMO to FMO project.
- **New Software Development Project**
 - Assisted in onboarding the project into the GLAD (Governance Lifecycle Automated Database) system.
 - Supported compliance efforts for data protection, information security, and data sharing requirements.
 - Led the process to secure approvals across different project phases in GLAD, from initiation through planning, execution, and deployment.
- **Optimization Workshop (Improvement/Standardization)**
 - Conducted process optimization sessions for handling change requests.
 - Facilitated discussions between the IT team and business owners to clarify requirements.
 - Managed backlog change requests by grouping them into specific components.
- **Internal Audit Support**
 - Contributed to the development of a Standard Procedures Manual for JIRA requests.
 - Assisted in standardizing change management procedures.
 - Helped standardize rollback (re-deployment) procedures.
 - Created an SDLC document for the Operations team.
 - Supported compliance with ICS audits by gathering evidence for process adherence.
- **Management Communication**
 - Maintained communication with business owners regarding the status of pending requests.
 - Collaborated with the business owners to develop a dashboard for better monitoring of requests.
 - Designed dashboards to track request volumes and process efficiency.
 - Generated daily end-of-day (EOD) reports on wholesale requests.

Engineer Associate | Kansas Department of Transportation | Feb 2023 – May 2023

Support construction projects for District 1 Area 2. Manage highway construction/maintenance Projects. Study Requirements of the project. Discuss with contractors on requirements, timelines. Interact with contractors, be part of pre-construction conferences, prepare documentation for field work and for payments. Inspect/certify work done by contractors.

Senior Lead Engineer (Delivery Lead) | UTC Bengaluru | Sep 2009 – Oct 2019

Support Technical Publications team with **creation and revision of technical manuals**. Manage team priorities and commitments. Conduct Technical reviews and peer reviews. Conduct training sessions and knowledge sharing sessions for process improvements. Manage **project presentations**, dash boards and communicate project **metrics** with management. Accountable for team to meet the planned deliverables with requisite quality. Support team in process compliance and audit preparations.

Responsibilities

- **Client Requirement Gathering and Support Creation of Technical Manuals:**

Gather and analyze requirements from both internal and external clients, ensuring alignment with expectations.

- Ensure industry specifications such as ATA iSpec2200 and S1000D are met.
- Define the level of technical manuals to be created (Level 1, Level 2, and Level 3).
- Address IP protection requirements for proprietary products and designs.
- Manage IPL build requirements (modular or part level).
- Collect necessary source documents, including Specification Drawings, Assembly Drawings, Part Drawings, Testing Documents, and Manufacturing Documents from Team Center and SAP.
- Handle change management processes, including Change Requests and Change Orders.
- Specify types of deliverables (IETM, XML, SGML, PDF).

- **Project Proposal & Risk Management:**

- Prepare comprehensive project proposals based on the Statement of Work (SOW) and client discussions on timelines.
- Identify and assess potential risks related to requirements, source documents, timelines, and special client needs.
- Present project proposals to clients, including risk assessments and clear timelines for deliverables.
- Facilitate client reviews and ensure formal acceptance of project deliverables.
- Regularly interact with SMEs to address any additional requirements.
- Develop and share the project schedule with clients, based on available resources.
- Evaluate identified risks with the team and propose mitigation or transfer plans.
- Set up ongoing client meetings to report on progress, request clarifications, and ensure continuous alignment.
- Coordinate with the team to discuss project schedules, assignments, and risks.
- Oversee the quality control and assurance methods to ensure product excellence.
- Recommend the use of checklists (Input, Self-Review, Peer Review, Deliverable) for structured and consistent project execution.
- Ensure timely and quality product delivery aligned with client requirements and industry standards.
- Gathering requirements from the client/customer (internal/external).

- **Process Improvement and Standardization**

Evaluation & Improvement:

- Conduct thorough evaluations of current processes and identify opportunities for improvement.
- Differentiate between value-added and non-value-added activities to enhance productivity.

Continuous Improvement (CI) & Kaizen Events:

- Lead Continuous Improvement (CI) and Kaizen events to streamline processes and improve productivity.
- Use data-driven insights to support decision-making and implement best practices.

Standard Work & Project Dashboards:

- Develop Standard Work documentation for repetitive activities to ensure consistency across teams, storing them in a central repository for easy access.
- Create and maintain Project Dashboards to visualize metrics, track project health, and monitor progress through visual controls (e.g., KANBAN).

- **People Management**

Team Evaluation & Development:

- Identify and assess the strengths and weaknesses of team members to align resources effectively.
- Collaborate with team members to develop professional and self-development training plans tailored to individual goals.
- Align individual development goals with organizational objectives to drive performance and growth.

Competency Matrix & Interview Support:

- Develop and establish a Competency Matrix for the team to ensure skill alignment and facilitate career development.
- Participate in technical interviews for new hires, providing valuable insights to assess skills and suitability.
- Organize technical and process-oriented training for new team members.

Analyst Technical Writer | Syselog India | Nov 2007 – Sep 2009

Worked as Independent Contributor handling all areas of requirement gathering, project proposals, execution, quality control and delivery. Supported the French team at Toulouse for Airbus Work. Regular day to day interaction with client. Was onsite with **Eurodoc** (Toulouse, France) for six weeks for induction training.

Senior Engineer | QuEST India | Dec 2004 – Nov 2007

Worked with **Rolls Royce** Technical Publications Group for supporting **Technical Manuals** and **Illustrations**.

Worked extensively on Legacy Conversion of Engine Overhaul Manuals using SGML (Standardized General Markup Language). Used **S1000D Spec** and **Simplified Technical English** for creation of Data Modules based on Data Module Requirement List. Also Worked with Illustration team using **Tech Illustrator** to create a database of illustrations for Rolls Royce Engine Manuals.

Worked with Repair Team for generating Repair schemes for Trent 1000 Engine, using ATA iSpec 2200.

Have worked at **Rolls Royce Bristol** for 4 months on Technical Manual Revisions for Rolls Royce Engines and had attended training on Module Level Disassembly of Rolls Royce-Turbo Mecca engine for a week, also attended trainings on familiarization for other Rolls Royce Engines.

Responsibilities

- Requirement gathering for creating/revising electronic technical manuals
- Develop Data module requirement list for technical manuals
- Import data from legacy manuals to SGML data modules
- Parsing data modules to central repository.

Education

Bachelor's Degree in Industrial Engineering and Management | DSCE | Bangalore University |

Master's Degree in Manufacturing Science and Engineering | MSRIT | VTU Karnataka |

Certification

Project Management Professional PMI-PMP®

AZ900 Azure Fundamentals

Lean Manufacturing
