## **SUMMARY:**

- Expertise in core Java concepts like multithreading and concurrency.
- Hands-on experience with web development using JSP, HTML, and JavaScript.
- Strong knowledge of Agile methodologies and CI/CD automation.
- Skilled in MuleSoft connectors and DataWeave for data integration.
- Leadership experience with mentoring junior developers.
- Familiar with version control tools like Git and GitHub.
- Proficient in MuleSoft API testing with MUnit and error handling.
- Knowledgeable in integrating REST and SOAP services with MuleSoft.
- Experience in API security protocols like OAuth2 and API Gateway.
- Expertise in optimizing API performance and troubleshooting.
- Familiar with project management tools like JIRA and Confluence.
- Hands-on experience with Jenkins and Maven for continuous integration.
- Skilled in building and documenting APIs for internal and external stakeholders.

## **SKILLS:**

|                                  |                                                                                                                 |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>Programming Languages:</b>    | Dataweave, Java, JavaScript, Python                                                                             |
| <b>Middleware Technology:</b>    | Mulesoft ESB, CloudHub, AnyPoint Platform                                                                       |
| <b>Web/Application Servers:</b>  | Apache Tomcat, IBM WebSphere, WebLogic, Cloud-hub.                                                              |
| <b>Version Control Tools:</b>    | Git, Github, SVN, TFS.                                                                                          |
| <b>Other Tools and Services:</b> | Crystal Reports, Toad, Edit Plus, Text Pad++, Putty, FileZilla,<br>MS Visio, MS Project, Open Office, MS Office |
| <b>System Environments:</b>      | Windows, Unix/Linux                                                                                             |

## **EDUCATION:**

- BSc.

## **CERTIFICATION:**

- MuleSoft Certified Developer
- Oracle Certified Java Developer v 6.0

## **EXPERIENCE**

**Mah Bes**  
**mbes30126@gmail.com**  
**202-733-9650**

**PNC Bank - Pittsburgh, PA Aug 2022 to present**

**MuleSoft Developer**

- Developed MuleSoft APIs for financial transactions and services.
- Used DataWeave for data transformation across systems.
- Integrated APIs with Oracle databases and external payment systems.
- Implemented error handling to ensure API stability and performance.
- Used AnyPoint Monitoring to track API performance and optimize workflows.
- Automated deployment of APIs using Jenkins and Maven.
- Ensured secure API development with OAuth2 and API Gateway.
- Collaborated with cross-functional teams to ensure API solutions meet business needs.
- Documented API design, workflows, and deployment processes.
- Provided troubleshooting and technical support for production issues.

**Pfizer Inc. - New York, NY Feb 2020 to Jul 2022**

**MuleSoft Developer**

- Developed APIs to support e-commerce platforms and retail systems.
- Integrated MuleSoft APIs with backend systems for order and inventory management.
- Used DataWeave to manipulate and transform data between services.
- Implemented security protocols for API authentication using OAuth2.
- Collaborated with frontend developers to integrate APIs into customer-facing platforms.
- Automated API deployments using Jenkins and AnyPoint Studio.
- Monitored API performance and optimized workflows using AnyPoint Monitoring.
- Documented API designs, workflows, and error handling strategies.
- Provided technical support for API integration issues.
- Conducted unit testing to validate API functionality and performance.

**Staples - Framingham, MA Oct 2018 to Jan 2020**

**Java Developer**

- Developed backend services using Java and Spring Boot for automotive e-commerce platforms.
- Built RESTful APIs for inventory and order management systems.
- Integrated third-party payment gateways with backend services.
- Optimized SQL queries to improve database performance.
- Used Hibernate for ORM to manage data access and transactions.
- Created unit tests to ensure code reliability and maintainability.
- Managed version control using GitHub for collaboration across teams.
- Participated in Agile Scrum ceremonies to ensure timely project delivery.
- Collaborated with frontend teams to ensure smooth API integration.
- Documented application architecture and workflows.

**3M Company - St. Paul, MN Dec 2018 to Sep 2019**

**Java Developer**

**Mah Bes**  
**mbes30126@gmail.com**  
**202-733-9650**

- Developed Java applications for industrial automation systems.
- Implemented multithreaded solutions to improve application performance.
- Built RESTful APIs for data integration across industrial systems.
- Worked with Hibernate and Spring frameworks for backend development.
- Collaborated with teams to develop and optimize SQL queries.
- Participated in daily Scrum meetings to track project progress.
- Created unit tests to ensure application stability and functionality.
- Documented system architecture and design using UML diagrams.
- Used Git for version control and collaboration across development teams.
- Provided technical support and troubleshooting during testing and production phases.
