Professional Experience

Full Sail University | Business Analyst → Senior Business Solutions Analyst | 2019 – 2025

- Designed and supported Salesforce Service Cloud features including Email-to-Case, Live Chat, and Omni-Channel routing, enabling faster case resolution for multiple departments.
- Collaborated with developers and admins to scope and validate over 200 Salesforce enhancements, including automation, routing, and approval workflows that reduced ticket volume 25%.
- Led impact assessments for automation and configuration changes, identifying cross-system dependencies and preventing release delays.
- Authored BRDs, user stories, and acceptance criteria; coordinated UAT testing with business users, cutting post-deployment rework by 75%.
- Partnered with IT and business units to document and refine service intake, escalation, and SLA tracking processes, improving case response time by 30%.

ADP | Sales Operations Analyst | 2017 – 2019

- Supported Service Cloud automations for 5,000+ users including Email-to-Case and Omni-Channel routing, improving issue triage and response efficiency.
- Created requirements documentation and test scripts for Salesforce and telephony workflow updates.
- Partnered with developers and QA to ensure alignment between business needs and technical delivery.
- Designed KPI dashboards to track response time and case resolution metrics for leadership.
- Provided cross-department training and support during Service Cloud feature rollouts.

Earlier Roles

Recruitment & Internship Manager – Improved placement tracking and analytics for student programs.

Insurance Processor – Increased accuracy and compliance within policy processing workflows.

Library Specialist – Maintained data quality and consistency across catalog management systems.

Education & Certifications
