Warren, MI | +1-947-277-2888 | marufdevop@gmail.com | LinkedIn | Work Permit: USC

SUMMARY

DevOps Engineer with 5+ years of experience designing, automating, and managing **cloud-native infrastructure** across **AWS and Azure** environments. Skilled in **Terraform, Jenkins, Kubernetes (EKS/AKS), and CI/CD automation**, driving reliable deployments and infrastructure scalability for enterprise and financial systems. Proven success in **infrastructure as code (IaC), observability, FinOps, and DevSecOps**, ensuring compliance with **SOX and PCI DSS** standards. Adept at collaborating across development, data, and security teams to streamline delivery pipelines, reduce manual operations, and improve system reliability in production environments.

PROFESSIONAL EXPERIENCE

JPMC | USA

DevOps Engineer | Sep 2023 – Present

- **Maintained** AWS infrastructure using **Terraform, CloudFormation, and Git-based IaC repositories**, automating provisioning of **120+ compute instances** and **60 S3 buckets** to support **1,000+ financial users** across secure environments.
- **Engineered and automated code deployment workflows** using **Jenkins, AWS CodePipeline, and Git**, pushing **weekly application releases** across **8 product teams**, enforcing branch policies, code reviews, and rollback governance.
- **Implemented** comprehensive **observability** with **CloudWatch, ELK Stack, OpenTelemetry, and Grafana dashboard**, tracking **200+ metrics and traces**, improving root-cause detection and release validation for distributed systems.
- **Developed** and deployed secure, event-driven **data pipelines** via **AWS Glue, Lambda, and Redshift**, enabling analytics teams to query **10M+ transactions** in real time post-deployment.
- **Integrated** compliance automation and **DevSecOps controls** (KMS, Secrets Manager, IAM least privilege, OPA/Terraform), embedding pre-deployment scans and approval gates to align with **SOX and PCI DSS** mandates.

Paychex | USA

DevOps Engineer | Dec 2020 – Sep 2023

- **Automated AWS infrastructure** using **Terraform and CloudFormation**, creating **150 EC2 instances, 10 VPCs**, and multi-environment configurations to support payroll and HR analytics systems across **5 business divisions**.
- **Developed and maintained CI/CD pipelines** in **Jenkins, GitHub Actions, and AWS CodePipeline**, orchestrating **70+ monthly code pushes** with automated testing, staging validation, and zero-downtime deployments.
- **Deployed and managed Kubernetes (EKS) clusters and Dockerized microservices**, coordinating build automation and version control across **10 repositories**, improving deployment consistency across environments.
- **Supported** data engineering teams by deploying **AWS Glue, Lambda, and Athena** jobs through automated release pipelines, handling **1.2B+ data records** to power real-time analytics dashboards.
- **Implemented FinOps automation** across **200+ AWS resources**, integrating cost scanning and scheduling scripts in pipelines for continuous cost visibility and compliance tracking.
- **Integrated DevSecOps** into release workflows using **AWS KMS, Secrets Manager, and Snyk**, scanning **10K+ artifacts** per deployment and maintaining vulnerability-free production builds.

Epsilon | USA

DevOps Engineer | Feb 2019 – Dec 2020

- **Deployed and managed** hybrid infrastructure using **Azure, Terraform, and ARM templates**, configuring **20+ VMs** and **5 AKS clusters** for marketing and identity platforms serving **50+ enterprise users**.
- **Built and maintained CI/CD pipelines** using **Azure DevOps (Pipelines, Repos, Artifacts)** and **Jenkins**, automating **40+ monthly code pushes** with environment-specific approvals and gated build validations.
- **Containerized and migrated** legacy .NET and Java workloads with **Docker**, deploying onto **Azure Kubernetes Service (AKS)** using YAML manifests and Helm charts for consistent delivery.
- **Implemented observability frameworks** with **Azure Monitor, Log Analytics, and ELK Stack**, tracking telemetry for **25 applications**, ensuring post-deployment health checks and fast rollback decisions.
- **Collaborated** with data and BI teams to schedule **Azure Data Factory** and **SSIS** jobs via **pipeline triggers**, reducing manual intervention by **12 developer-hours per release cycle**.
- **Enforced** access controls and **security scanning pipelines** using **Azure Key Vault, RBAC**, and static code analysis tools, protecting **40+ releases** from policy violations and secret exposure.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, CodeBuild, CodeDeploy, CloudWatch), Azure (AKS, Azure DevOps, ADF, Key Vault, Log Analytics)

Containerization & Orchestration: Docker, Kubernetes (EKS, AKS), Helm, GitOps (Argo CD, Flux), Log Analytics

Infrastructure as Code (IaC): Terraform, AWS CloudFormation, Azure ARM Templates, Infrastructure Automation

CI/CD & Automation: Jenkins, GitHub Actions, AWS CodePipeline, Azure DevOps Pipelines, Groovy Pipelines, Code Push Automation

Programming & Scripting: Python, Bash, PowerShell, YAML, JSON, SQL

Monitoring & Observability: AWS X-Ray, OpenTelemetry, (Elasticsearch, Logstash, Kibana), Grafana, Prometheus, Azure Monitor

DevSecOps & Compliance: Snyk, HashiCorp Vault, AWS KMS, Azure Key Vault, IAM (RBAC, Roles, Policies), Secrets Manager, Security Hardening, Vulnerability Remediation, SOX & PCI DSS Alignment

FinOps & Cloud Cost Management: AWS Budgets, Cost Explorer, Reserved Instance Management, Resource Tagging Automation

Data & Integration: AWS Glue, Athena, Redshift, Azure Data Factory (ADF), SSIS, ETL Pipeline Automation, Data Lake Integration

Operating Systems & Platforms: Linux (Ubuntu, RHEL), Windows Server (PowerShell), Hybrid Environments, On-Prem Cloud

EDUCATION

National University of Bangladesh

2006

Masters of Social Science

National University of Bangladesh

2004

Bachelor of Social Science
