## ○ Profile

---

**About me:** Electronics engineer with experience in research and quality assurance testing with a background in software development.

**Strengths:** Software development, manual testing and creating testing automation scripts.

**Skills:** Teamwork, leadership, fast learner, presenter, automated testing development, self starter.

Love to work on new projects and innovate. Experienced on developing prototypes and testing strategies. Very passionate about emerging technologies and fast paced environments.

## ○ Education

---

**Miami Dade College** - Miami, FL. USA

Major: Bachelor of Science in Electronics Engineering Technology (2010 - 2016)

## ○ Skills

---

### **Computer Skills**

*Operating Systems:* Windows OS, Mac OS, Linux.

*Programming Languages:* Visual Basic, C, C#, Java, Python, HTML, XML, PHP, SQL, MATLAB.

*Testing Software:* Selenium, TestNG, Protractor, JMeter, Postman.

*Other Software:* Git, Apache SVN, Terminal, Confluence documentation, Microsoft SQL Server, MySQL, JIRA, TeamCity, Jenkins.

*Hardware:* VHDL (Xilinx Nexus 3), Arduino development, Hardware Circuit Design and PCB creation.

### **Languages**

*Spanish:* Native.

*English:* Fluent.

## ○ Relevant Experience

---

### **QA Automation Engineer**

**Optavise (CNO).**

**2022 - Present**

*Responsibilities:*

- Develop new test cases for both manual and automation scripts.
- Port existing testing suite into new framework.
- Grow automation testing practices beyond UI testing (API and Load Testing).
- Execute manual testing on incoming bugs and new features.
- Quality Assurance Analyst in charge of production environment validation during release meetings.
- Maintain testing database up to date with all current schema changes.
- Create Documentation for current and new automation systems.

## **Quality Assurance Analyst**

**JDi Data.**

**2018 - 2022**

### *Responsibilities:*

- White Box, Grey Box and Blackbox testing for all company's products.
- Develop and maintain automated testing suites using Selenium and Protractor.
- Develop and maintain load testing scripts using JMeter.
- Document all work using JIRA tasks or Confluence articles.

## **Laboratory Technician**

**Miami Dade College, Engineering Department.**

**2017 - 2018**

### *Responsibilities:*

- Setup and maintain all Engineering laboratories with new equipment and instruments.
- Install and check all pieces of electronic equipment and laboratory supply.
- Assist with coordination and implementation of lab experiments.

## **Robotics Instructor**

**Bots for All.**

**2015 - 2017**

### *Responsibilities:*

- Mentor for Robotics program in affiliated schools with VEX.
- Nexus between organization and school's administration.
- Competition preparation for teams.

## **Research Assistant**

**Computing Research Lab (CRL) at Miami Dade College.**

**2011 - 2014**

### *Responsibilities:*

- Develop the Android application: Resistor Decoder (ResDec) research project.
- Develop and present PLTL (Peer Led Team Learning - <http://www.pltl.org>) modules for existing credit classes.
- Present research work at conferences on Computer Vision and Mobile development.

## ○ Conferences and Presentations

---

### *Conferences:*

TechWeek Emerge (Miami) - FlyInStyle.  
Take Stock in Children and Gear UP College and Career Field Day.  
SACNAS 2013 at San Antonio (CAHSI Member).  
SACNAS 2012 at Seattle (CAHSI Member).  
Summer Research Institute Symposium 2012 - 2014 (SRI at MDC).  
Merging of Minds 2014 (MDC Inter-american Campus).

## ○ Achievements & Activities

---

### *Achievements:*

IEEE Southeast Region 3 Hardware competition 2014 (Robotics - 8th place).  
Presentation for the Miami Dade College Board on my research conference experience.  
Miami Dade College Academic Excellence Award.  
Dean's List (Several Times).  
Recipient of the AECOM Design Scholarship.  
AACE International Scholarship Competition Finalist.
