

MEGHANA

Email: meghanaj0420@gmail.com

PH: 469-844-3617

Sr. Data Analyst

Professional Summary

- ❖ 10+ years of experience in data analysis, business intelligence, and Agile-based business analysis with expertise in SQL, Power BI, and cloud-based data movement.
- ❖ Proficient in Agile methodologies, leading requirement-gathering meetings, collaborating with stakeholders, and documenting processes using JIRA and Confluence.
- ❖ Strong SQL skills, performing data profiling, transformation, and validation to ensure data accuracy and business intelligence reporting.
- ❖ Expertise in cloud-based data management using AWS (S3, Redshift, Athena), GCP (BigQuery, DataProc, DataFlow), and Azure Data Factory.
- ❖ Experience supporting market data applications such as Bloomberg Terminal, LSEG, FactSet, and other real-time data display tools.
- ❖ Familiarity with low latency platforms and market data feeds; experience troubleshooting streaming data and connectivity issues.
- ❖ Strong scripting capabilities using Shell scripting or Perl, in addition to Python, to automate support tasks.
- ❖ Knowledge of exchange-driven changes (EDCs) and integration of updates from financial data vendors.
- ❖ Experience with market data APIs such as Thomson Reuters TREP, Bloomberg Open API, or similar.
- ❖ Adept at working in Agile environments, collaborating with business users, IT teams, and cross-functional stakeholders to drive successful procurement and analytics initiatives.
- ❖ Strong background in cross-functional collaboration with Technical, IT, and Offshore teams to gather requirements and ensure project success.
- ❖ Skilled in SQL for data analysis and validation within SAP-related databases.
- ❖ Experience working in Agile environments, participating in daily stand-ups, sprints, and iterative development cycles.
- ❖ Self-driven, independent problem solver, capable of managing and delivering SAP SD projects with minimal supervision.
- ❖ Hands on experience in machine learning, big data, data visualization, R and Python development
- ❖ Working with AWS/GCP cloud using in GCP Cloud storage, Data-Proc, Data Flow, Big- Query, EMR, S3, Glacier and EC2 Instance with EMR cluster.
- ❖ Proficient in SQL Server and T- SQL (DDL and DML) in constructing Tables, Normalization/De normalization Techniques on database Tables.
- ❖ Experienced in creating and using Stored Procedures, Triggers, Views, User Defined Functions, Sub - Queries and Joins for complex queries involving multiple tables and exception handlers.
- ❖ Expertise in OLTP/OLAP System Study, Analysis and E-R modelling, developing Database Schemas like Star schema and Snowflake schema used in relational, dimensional and multidimensional modelling.
- ❖ Excellent knowledge in Data Analysis, Data Validation, Data Cleansing, Data Verification and identifying data mismatch.
- ❖ Performed data analysis using complex SQL on various sources systems.
- ❖ Strong SQL Skills related to information retrieval and analysis. Exposure to Client Interaction, User requirement Analysis and Support.
- ❖ Good exposure to the JIRA - project tracking tool.
- ❖ Experience in designing and developing Relational Database Management systems.
- ❖ Good experience in creating SQL Server Analysis Projects using SQL Server.
- ❖ Expertise in developing Parameterized, Chart, Graph, Linked, Dashboard, Scorecards, Drill-down, Drill-through and Cascading reports using SSRS.
- ❖ Experience in Object Oriented Analysis concept implementation, design and technical programming skills.

Technical Skills:

Business Modeling: Microsoft Visio
Healthcare Data Standards: FHIR, HL7, ICD-10, HIPAA Compliance
Requirements Management: Requisite Pro, Microsoft Office (Word & Excel)
Testing & QA Tools: Selenium, HP Quality Center, Jira, ALM
Databases & SQL: SQL Server, Oracle, PostgreSQL (Strong SQL Query Writing)
ETL Testing: Informatica, SSIS, DataStage, Snowflake Validation
Healthcare Standards: HIPAA, HL7, ICD-10, FHIR, Claims Processing
Automation Testing: Selenium (Basic), API Testing with Postman
Data Validation & Reporting: Power BI, Tableau, Excel Pivot Reports
BI & Reporting Tools: Power BI, Tableau, SQL-based dashboards
Data Testing & Validation: Data reconciliation, automated test cases for ETL pipelines
Cloud Platforms & Data Processing: AWS (S3, Redshift, Athena), GCP (BigQuery, DataProc, DataFlow), Azure Data Factory
ETL & Data Management: SQL-based ETL, Data Governance, Data Profiling, Data Cleansing
Data Integration & ETL: Dataflows, Data Factory, Power Query
Data modeling: Microsoft SQL Server Analysis Services
Security & Compliance: Data Privacy, Regulatory Compliance, Data Governance Policies

Professional Experience

Sr. Data Analyst
Cardinal Health, Dublin, Ohio
April 2024 to Present

- Responsibilities:**
- ❖ Led requirement-gathering meetings in Agile methodology, working with stakeholders to define data movement and governance needs.
 - ❖ Developed and optimized SQL queries for data validation, transformation, and cleansing across multiple cloud environments.
 - ❖ Designed and implemented Power BI dashboards, providing actionable insights on business performance and cloud data movement.
 - ❖ Collaborated with cloud engineers and DevOps teams to integrate cloud-based ETL processes for large-scale data migration projects.
 - ❖ Ensured data security and compliance with industry standards, implementing data governance policies and privacy measures.
 - ❖ Worked with AWS, GCP, and Azure environments, supporting end-to-end data movement, processing, and analysis projects.
 - ❖ Managed Agile processes, coordinating daily stand-ups, sprint planning, and backlog grooming to ensure timely project execution.
 - ❖ Developed automated test cases using Postman for API validation and Selenium for web testing.
 - ❖ Coordinated with exchange vendors to manage real-time market data feed integrations and apply exchange-driven changes (EDCs).
 - ❖ Automated reporting, monitoring, and alerting scripts using Shell and Python to support market data integrity and reduce incident resolution times.
 - ❖ Collaborated with traders, application teams, and infrastructure to troubleshoot latency issues on Exegy and TREP-based market data systems.
 - ❖ Prepared and maintained clear, concise contract documents, ensuring legal and financial accuracy.
 - ❖ Addressed and reconciled vendor inquiries, discrepancies, and payment disputes, maintaining strong supplier relationships.
 - ❖ Utilized SAP Ariba and Oracle Procurement Cloud to manage procurement requests, track purchase orders, and generate reports.
 - ❖ Collaborated with data engineering teams to integrate Collibra with ETL pipelines and cloud data platforms.
 - ❖ Provided Collibra training and documentation to business users, ensuring seamless adoption.
 - ❖ Deployed Qlik Sense applications on Qlik Sense Server, ensuring data security and user access control.
 - ❖ Collaborated with business users to define key performance indicators (KPIs) and build meaningful visualizations
 - ❖ Ensured metadata management, data governance, and compliance with healthcare regulations.
 - ❖ Building AWS data-warehouse model to provide scalable solution

- ❖ Documenting business, functional and technical requirements related to data, ETL requirements, data lineage and quality
- ❖ Maintain documents related to data flows, source to target mapping, conversion logic, business definitions etc. and gain appropriate approvals.
- ❖ Lead full spectrum data analysis against the requirements
- ❖ Work with the Application Engineering team, DBA, Infrastructure and Project Management
- ❖ Analyze existing systems (including legacy) and data sets to help Business Analysts establish the functional and non-functional requirements.
- ❖ Worked with internal architects and assisted in the development of current and target state enterprise data architectures.
- ❖ Involve in data migrations and creation of data marts for reporting
- ❖ Performing data validations and test case documents.
- ❖ Meet with users, assist with data-related technical issues, and support their data infrastructure needs
- ❖ Generate design, development, test plans, detailed functional specifications documents, user interface design, and process flow charts for execution of programming.
- ❖ Develop data pipelines using Python, SQL, Py-Spark and AWS Methods.
- ❖ Use an analytical, data-driven approach to drive a deep understanding of fast-changing business.
- ❖ Cloud integration with AWS using Simple Storage Service (S3), EC2, AWS Athena.
- ❖ Involve in data integration, data wrangling and Data management.
- ❖ Thorough understanding of ETL logic used in Informatica and implement the same in AWS Environment.
- ❖ Develop test strategy based on Business rules
- ❖ Prepared Test Plan document to ensure QA and Development phases are in parallel.
- ❖ Design and development of quick-sight analytics dashboard for Business.

Environment: Oracle 11g, SQL Server 2005, Informatica Power Center 9/8.5.1 (Workflow Manager, Workflow Monitor), SSAS, SAS/Stat, SAS/Graph, SAS/ODS, SAS/SQL, SAS/Connect, SAS/Access, Cognos 8.0 Series, Netezza, XML, Test Cases, Assistant, Teradata V2R6, Teradata SQL Assistant, IBM DB2, Unix, Test Matrix, TOAD, HP Quality Center 10.

Sr. Data Analyst

CareFirst SBP, MD

September 2021 to March 2024

Responsibilities:

- ❖ Designed and developed Azure-integrated Power BI dashboards to track system and application vulnerabilities, ensuring real-time visibility into security risks.
- ❖ Led data validation efforts for Property & Casualty (P&C) insurance claims processing.
- ❖ Designed and executed SQL queries for data reconciliation, anomaly detection, and report validation.
- ❖ Conducted functional testing of BI dashboards in Power BI and Tableau, ensuring accurate data reporting.
- ❖ Collaborated with ETL developers to debug and resolve data discrepancies in Snowflake and SQL databases.
- ❖ Ensured end-to-end testing of policy administration systems, meeting data accuracy and compliance needs.
- ❖ Ensured data governance and accuracy, aligning reporting outputs with business and security requirements.
- ❖ Optimized query performance by implementing best practices in Power BI dataflows, indexing, and partitioning strategies.
- ❖ Worked closely with business users, IT teams, and cloud architects to define dashboard KPIs, metrics, and user access controls.
- ❖ Developed SQL queries for data validation, reconciliation, and quality checks to support business decision-making.
- ❖ Participated in Agile methodology, including Sprint Planning, Daily Stand-ups, and Retrospectives, ensuring continuous project delivery.
- ❖ Involved in documentation of Data Mapping & ETL specifications for development from source to target and implemented the change Data Capture (CDC) while integrating the enterprise data sources.
- ❖ Created Indexes and Partitions to optimize the performance. Assisting ETL Team, BI team and end users to understand the data model.
- ❖ Assisted to build analytic tools to manage data and streamline data analyses using Python and SQL.
- ❖ Complex incoming data cleaning and formatting using Python. Ensured data accuracy through the creation and implementation of data integrity queries.

- ❖ Provided technical assistance for development and execution of test plans and cases as per client requirements.
- ❖ Developed queries to build a new database in SQL using SSIS and migrated the data from the legacy. Created batch files that execute the ETL scripts which invokes SSIS packages.
- ❖ Created SSIS packages for data Importing, Cleansing, and Parsing etc. Extracted, cleaned and validated.
- ❖ Created SSIS Packages using Pivot Transformation, Fuzzy Lookup, Derived Columns, Condition Split, Term extraction, Aggregate, Execute SQL Task, Data Flow Task, and Execute Package Task etc. to generate underlying data for the reports and to export cleaned data from Excel Spreadsheets, Text file, MS Access and CSV files to data ware house by using BIDS.
- ❖ Design and implement comprehensive Backup Plan and Disaster Recovery strategies. Prepared documentation of Data Migration and Data Mapping with its specifications for development from source to target.
- ❖ Supported technical team members in development of automated processes for data extraction and analysis.
- ❖ Facilitated in developing tests and procedures and with UAT testing. Used TOAD and SQL navigator as a part of business requirement.
- ❖ Used Excel sheets, flat files, CSV files and some deployment files to prepare reports through SSRS. Data has been validated and verified manually and automatically.
- ❖ Prepared scripts to ensure proper data access, manipulation, and reporting functions with Python and SQL.
- ❖ Coordinate with the business users in providing appropriate, effective and efficient way to design the new reporting needs based on the user with the existing functionality.
- ❖ Developed List, cross tab, drill through, master-detail, chart and complex reports which involved Multiple Prompts in Cognos Report Studio.
- ❖ Involved in modifying the existing Reports based upon the change requested by the users. Involved in resolving Performance issues with various reports.
- ❖ Prepared plan and upgraded the Cognos 8.4 version models and reports to Cognos 10.2 and 11.4.
- ❖ Created reports in Business Insight Advanced and Report Studio.

Environment: SQL/Server, Oracle 9i, MS-Office, Teradata, Informatica, ER Studio, XML, Hive, HDFS, Flume, Sqoop, R connector, Python, R, Tableau 9.2.

Data Analyst

Centene Corporation St Louis, Missouri

May 2019 to August 2021

Responsibilities:

- ❖ Gathering the requirements from the Business users and understanding the functionality of the business.
- ❖ Preparing required functional design documents and technical designed documents
- ❖ Worked on the thorough Data analysis to make sure that all the sensitive data has been identified
- ❖ Involve in data integration, data wrangling and Data management.
- ❖ Working knowledge of data migration and creation of data marts for reporting
- ❖ Performing data validations and written test case documents.
- ❖ Performed data analysis and data profiling using complex SQL on various sources systems.
- ❖ Created SQL scripts to find data quality issues
- ❖ Work with developers in data transformation and data validation
- ❖ Prepared Test Plan to ensure QA and Development phases are in parallel
- ❖ Knowledge of working with Proof of Concepts (PoC's) and gap analysis and gathered necessary data for analysis from different sources.
- ❖ Experience in writing stored procedures and complex SQL queries using relational databases like Oracle, SQL Server, and MySQL.
- ❖ Experience in Extraction, Transformation and Loading (ETL) of data from multiple sources like Flat files, XML files, and Databases.
- ❖ Supported various reporting teams and experience with data visualization tool Tableau.
- ❖ Written and executed Test Cases and reviewed with Business & Development Teams.
- ❖ Implemented Defect Tracking process using JIRA tool by assigning bugs to Development Team
- ❖ Experienced in working with spark ecosystem using Spark SQL and Scala queries on different formats like text file, CSV file.
- ❖ Experienced in designing both time driven and data driven automated workflows.

- ❖ Proficiency in SQL across several dialects (MySQL, PostgreSQL, AWS Athena, SQL Server, and Oracle).
- ❖ Performed data analysis and data profiling using complex SQL on various sources systems.
- ❖ Created SQL scripts to find data quality issues
- ❖ Updated and managed existing products to increase the performance of the product
- ❖ Worked on the thorough Metadata and Data analysis to make sure that all the sensitive data has been identified
- ❖ Performed Data wrangling and integration using R Programming.
- ❖ Developed statistical reports using GGPlot in R (Density Chart, Scatter Plot etc.)

Environment: Informatica Power Center 8.6(Repository Manager, Designer, Server Manager), Oracle 10g, MS SQL, HP Quality Center 9.2, Netezza, Requirement traceability Matrix (RTM), XML, Assistant, Teradata V2R6, Teradata SQL Assistant, IBM DB2, SSAS, SAS/Stat, SAS/Graph, SAS/ODS, SAS/SQL, SAS/Connect, SAS/Access, IBM Rational ClearQuest 7.0, TOAD, Business Objects, MS Excel, MS Project.

Sr Data Modeler/ Data Analyst

Wipro Info Tech, Hyderabad, India

November 2016 to February 2019

Responsibilities:

- ❖ Analyze database requirements in detail with the project stakeholders by conducting Joint Requirements Development sessions.
- ❖ Facilitated development, testing and maintenance of quality guidelines and procedures along with necessary documentation.
- ❖ Generated ad-hoc SQL queries using joins, database connections and transformation rules to fetch data from legacy Sybase systems.
- ❖ Developed standard and re-usable mappings and maplets using various transformations like expression, aggregator, joiner, source qualifier, router, lookup Connected/Unconnected, and filter.
- ❖ Implemented the standard naming conventions for the fact and dimension entities and attributes of logical and physical model.
- ❖ Used Informatica Designer, Workflow Manager and Repository Manager to create source and target definition, design mappings, create repositories and establish users, groups and their privileges.
- ❖ Used Model Mart of Erwin for effective model management of sharing, dividing and reusing model information and design for productivity improvement.
- ❖ Developed the required data warehouse model using Star schema for the generalized model.
- ❖ Extracted data from the databases (Sybase and SQL Server, FLAT FILES) using Informatica to load it into a single data warehouse repository.
- ❖ Developed ETL files to get data from staging tables and batch files, transform that data and load into the fact tables and data marts to populate parallel and attribute changes reports.
- ❖ Define and document ETL process and data flow and scheduling capabilities.
- ❖ Facilitated in developing testing procedures, test cases and User Acceptance Testing (UAT).
- ❖ Created Triggers to capture the Data manipulation transactions on the Fact tables and Fact history tables.
- ❖ Utilized SQL to develop new and debug existing Ad-Hoc reports.
- ❖ Established and maintained comprehensive data model documentation including detailed descriptions of business entities, attributes, and data relationships.
- ❖ Evaluated and developed reports with Oracle Reporting Tools
- ❖ Integrated the work tasks with relevant teams for smooth transition from testing to implementation.

Environment: SQL Developer, Oracle HealthCare Foundation, ERwin 9.6, Microsoft SQL Server 2012, Informatics 9.1, Service Now.

Data Modeler

Nokia India Private Limited Hyderabad, Telangana

June 2014 to October 2016

Responsibilities:

- ❖ Understanding the specification and analyzing data according to the client requirement.
- ❖ Conducting requirement gathering sessions with Mortgage Banking Report Owners/SMEs to understand the current process flow of report generation and identifying the Risk Data elements.
- ❖ Back-tracking Risk Data elements to its source system and capturing all the calculation/derivation logic involved in underlying SQL codes.

- ❖ Mapping the Risk Data elements to the Authoritative Data Source and documenting the Schema, Database, Table details for data modeling purpose.
- ❖ Performed Risk Data aggregation i.e., defining, gathering and processing risk data to enable SIFIs (Significantly Important Financial Institutions) to measure performance against internal tolerance criteria. This includes ability to sort, align, merge and analyze multiple sets of data across the enterprise.
- ❖ Participated in DRB Sessions with the reviewer by presenting the designed data models and explained how we followed the standards while designing the models.
- ❖ Prepared Conceptual Model Use Cases for representing the various dimensions and measures involved in recreation of Mortgage Banking reports.
- ❖ Interact with the customer and the SME(s) to identify the relationship between the data element and the business rule to document the data
- ❖ Capturing data elements - definitions and characteristics for information requirements
- ❖ Mapping data to the authoritative source field and table name as part of the data migration analysis activity
- ❖ Worked as a part of the Migration Testing Project where the duties were to writing SQL queries and executive the queries to match with the data in the target. Analysis the logic written by the developer and testing it with our own developed queries to check the migration of data accuracy.
- ❖ Working on Application lifecycle management tool for uploading the test cases, raising the defects and managing the defects.
- ❖ Prepared Testing Strategies document and documentation of Test Plans and Test Cases.
- ❖ Understanding how the different attributes are categorized in different Servicing system and analyzed how data undergo changes in specific period.
- ❖ Analyzed how specific category of loans impacted on all the attribute and worked on finding the strategy to resolve this issue by using some filter conditions on the execution query.
- ❖ Working especially on case statements and join condition to monitor the performance of the system from an end user perspective.

Environment: ORACLE, Teradata, UNIX, CA Erwin 9.1, Ab Initio ETL, Toad for Oracle Teradata 12.1.6.
