EXPERIENCE

Accenture

2024 – Present

Quality Engineering Senior Analyst

Manual Testing various applications, emails, banners and websites throughout SDLC and STLC.

- Supported QA campaigns for Pharmaceutical brands.
- Wrote Bug Reports that are clear, precise, and correct.
- Performed Cross Browser Testing, Smoke Testing, and Regression Testing.
- Attend QA Stand Up meetings in order to discuss Test Planning, Progress, and Bug Reports.
- Conducted Salesforce Marketing Cloud. Verifies that tokens are present in emails and work as expected.

Havas CX

2022 - 2024

Quality Assurance Analyst

Tested Dynamic and Static Content in Salesforce for Email Campaigns. Created Test Plans, Test Reports, RTM, and Test Strategy documentation to support Testing efforts.

- Conducted testing for Email Campaigns in Salesforce Marketing Cloud.
- Ensured all phases of Software Development Life Cycle (SDLC)
- Created Manual Test Cases for End-to-End, Smoke Testing, Functional Testing, Regression Testing, User Acceptance Testing.

FCB Health Network, New York NY

2021 - 2022

Jr Quality Assurance Analyst

Supported Manual and Mobile Testing various applications, and websites throughout SDLC and STLC.

Reviewed Wireframes, Functional Specification documents, Use Cases, User Stories to design Test Plans, and Test Cases.

- Performed Functional Testing to fill out form, navigate links and URL, play videos, submit form, confirmation page, search information.
- Partnered Pharmaceutical brands such as Gilead, Epclusa, Novartis, Cologuard, Kesimpta, Mayzent, Sanofi, Enhertu, Pfizer, Sierra, and BioXcel.
- Tested the brands emails using several tools such as Email on Acid, Mailosaur, and Alt Text Tester. I assure that the banners meet the Functional Requirements using Google DoubleClick Studio, and HTML5 Validator. I also test websites and mobile applications using BrowserStack, and WorkFront.

DevMountain, Lehi UT**2019 - 2021****Quality Assurance Engineer**

Wrote Manual Test Cases in Jira throughout the SDLC in order to ensure that the application worked as expected, and met functional and accessibility requirements.

- Wrote Automation Tests using Nightwatch to test the functionality of the application's components and common user flows.
- Wrote and updated Test Plans during each sprint to keep up with application requirements.
- Attended Daily Scrums and QA Stand Up meetings to provide Test Execution Report, Daily Status/Weekly Status, and Defect Triage Report.
- Conducted API Testing using Postman Runner to determine pass and fail scenarios.

NYC Department of Human Resources, Queens NY**December 2015 - July 2019****Job Opportunity Specialist**

Assisted clients by re-issuing rental checks, and issued payments for assistance in paying for rent arrears, utility arrears, storage payments, clothing vouchers, and any other public assistance needs.

- Tested the client's information, issued checks, and payments in the backend by manually checking in WMS.
- Evaluated and interpreted POS requirements in order to issue correct payments for clients.
- Ran budgets in POS after issuing checks, payments, or inputting clients income, in order to transmit results into WMS.
- Referred clients for Back to Work Programs, WeCare Programs, and other programs within the Department.
